
PROFESSIONAL SUMMARY

I am a Dynamics 365 Business Central Developer with about 9 years of experience in Dynamics 365. My expertise includes developing integrations with third-party applications using REST APIs / Webservices, as well as integrating various business organizations with Dynamics Business Central. I have a proven track record of creating customizations, new extensions, and reports for Dynamics 365 Business Central. I am proficient in SRSS, Word Layouts, RDLC, and RDL Designs for Report Development. In addition, I have experience in customizations and reports development. I possess additional skills in developing desktop applications and APIs using C# and .Net.

- Experienced in all phases of Software Development Life Cycle (SDLC).
- In-depth understanding of integrating third party applications with Dynamics 365 Business Central using APIs.
- Capable of adapting to any programming environment with a very short learning curve
- Experienced with SQL, MySQL, LINQ, and SQL Server Management Studio.
- Expert experience in designing & developing REST APIs & SOAP Web Services.
- Experienced with SRSS, Word Layouts, RDLC, RDL Designs for Report Development.
- Expert in creating Dynamics Business Central forms, customizations and reports customizations using AL Language.
- Configure and manage Single Sign-On (SSO) solutions, such as Azure Active Directory or third-party identity providers, to streamline user authentication processes across various platforms and applications.
- Implement Multi-Factor Authentication (MFA) to enhance security measures, ensuring secure access to sensitive data and applications.
- Lead Security and Compliance administration efforts, including the development and enforcement of security policies, conducting regular security assessments and audits, and ensuring compliance with industry standards and regulations (e.g., GDPR, HIPAA).
- Collaborate with cross-functional teams to design and implement security controls, monitor security incidents, and respond to security breaches or vulnerabilities promptly.
- A hands-on expert in data migration, customization, and training to drive user adoption and achieve optimal outcomes.
- Experience as a Microsoft Dynamics AX consultant involved in designing new e-commerce solution using Magento e-commerce, Dynamics AX 2012 R3, AX Retail POS and Call Centre functionality to support funeral service customer service and sales teams.
- Hands-on experience in developing Web/Windows applications using C#, ASP.net, ADO.net, SQL Server 2012R2, and .Net Framework 4.0 with strong knowledge of Object-Oriented concepts.
- Expertise in designing and developing cloud solutions based on Microsoft Power platform using Power Apps, Power Automate, Power BI, Power Apps portals, and Common Data Services. (CDS).

PROFESSIONAL EXPERIENCE:

Lead Dynamics 365 Developer

June 2023 – Present

Client: McGladrey (RSM US LLP), Illinois

Responsibilities:

- Identify the client's requirements through discovery meetings. Create business requirements document and functional specifications.
- Responsible for gathering Business Requirements, change requests and analyzes the requirements given by the client.
- Extensive experience of designing and developing software applications with ASP.NET 4.0, 4.5 & 4.7. · Entity Framework, Web API, HTML, XML, CSS, Java Script, AJAX, jQuery, Web Forms, and Win Forms. · Customize Dynamics CRM entities, create multiple forms (security based) on entities, add custom JavaScript on
- form events, and add web resources, navigation links to achieve the business Power Apps Cloud requirements. · Used CRM web service Power Apps and Java Script developed a custom service using WCF to provide extended functionalities to design and customize CRM forms, ribbons, site map, workflows, Dialogue etc. · Upgrading various plug-ins and custom workflow libraries code to use the Microsoft Dynamics CRM SDK libraries, Messages etc.
- Extensively worked on CRM Plug-in, Custom Workflow, and Console Application activities development. · Created Custom Entities, Custom Forms, Custom Views, Custom attributes, Relationships & Option-sets for individual Business Units in MS Dynamics CRM 2015/2016 as per the Business Process.
- Developed dynamic reports using Power Apps reporting interface and SSRS and deployed it on the CRM that were used in the application Web services Power BI depending on roles.
- Involved in deployment of the WPF application in the production and maintained postproduction Power Apps activities.
- Customize Dynamics CRM entities, create multiple forms (security based) on entities, add custom JavaScript on form events, and add web resources, navigation links to achieve the business Power Apps Cloud requirements. · Used CRM web service Power Apps and Java Script developed a custom service using WCF to provide extended functionalities to design and customize CRM forms, ribbons, site map, workflows, Dialogue etc.
- Created a few Power App Portals to expose CRM data.

- Created instances for Power Automate and Power Apps and set up the configuration for both security access to the environments and the connections with CDS/Gateway.
- Implement Plug-ins, Workflows, Custom Actions, Business rules, Business Process flows to automate the business processes.
- Customized Dashboards based on the custom reports and charts (requirements) created Used Visual studio test project and accomplished unit testing including both automated and manual testing.
- Document management with SharePoint integration.
- Involved in Code reviews. Peer Reviews for developing quality code.
- Participated in various testing-related review meetings to analyze defects.
- Writing test cases for the new system, testing the application and documenting issues.
- Analyzing and documenting the functional specifications.
- Training end-users to explain the new CRM system and leading support effort for any internal technical/functional issues.
- Actively participated in Development, Testing and Deployment Planning meetings.

Environment: MS Dynamics 365, .NET, PowerApps, Microsoft SQL Server 2014, SSIS, Scribe, SSRS, jQuery, JavaScript, WCF, AJAX, XRM Toolkit, SDK, Ribbon Editor Tool, Visual studio 2017, HTML, C#, CSS, SharePoint, PowerBI, TFS.

Dynamics 365 Developer

July 2020 – December 2022

Client: PNC Financial Services, Pittsburgh

Responsibilities:

- Involved in all key phases of the project life cycle. Worked on gathering requirements, development, testing, deployment and support of the solution in the MS Dynamic CRM.
- Extensive working experience with all versions of Dynamics 365 Implementation, configuration and customization using JavaScript, Typescript, C# and jQuery.
- Performed R&D on Document Core pack to use the tool to print templates with advanced features.
- Responsible for the Enhancements in Product Application and Bug Fixing.
- Responsible for Development of plug-ins and custom workflows.
- POC given on Integration of two environments using Power Automate to create record in Target environment, when record created in Source Environment.
- Involved in Unit testing to ensure the code accurately captures the existing business processes
- Worked on creating new CRM Organizations by restoring existing DB.
- Involved in version updates of MS Dynamic 365.
- Performed Builds and Releases to the Target Environment using DevOps Pipeline.
- Responsible for code merging using Microsoft TFS for source code maintenance needs.
- Involved in developing the customizations using Actions.

Environment: MSCRM 2016/15, On-Premises Deployment, C#, Plugin Registrations Tools, XRM Toolkit, Visual Studio .NET 2013, Dynamics AX, SCRIBE, SSIS ETL Tools, ADO.NET, ASP.NET 4.0, Master Pages, SSRS Reports, HTML, JavaScript, SQL Server 2014 and Transact-SQL, Web Services.

MS Dynamics CRM Developer

January 2018 – June 2020

Client: Sapient Health, Texas

Responsibilities:

- Upgraded the CRM system starting from Microsoft Dynamics CRM 2011 till Dynamics 365 and actively involved in each stage of upgrade process
- Actively developed both Managed and Unmanaged solutions in Microsoft Dynamics CRM to support the enhancements and published the customizations into the system.
- Experience in configuring MS CRM with MS outlook and SharePoint Integration
- Responsible for CRM on premise installations and deployment managements.
- Performed complete implementation of custom modules based on the client requirements.
- Worked on implementing Full Security Features through the application based on roles.
- Worked on Client-side validations using JavaScript and Business rules.
- Performed Ribbon customizations using Ribbon Workbench and sitemap changes using Xrm Toolbox or sitemap editor.
- Extensive working experience with Dynamics 365, 2016 Implementation, customization with JavaScript, C#, HTML, CSS and jQuery.
- Performed Deployment of Managed and Unmanaged solutions to the Target environments.
- Customized Workflows and Plugin for automated processes, based on requirement
- Actively developed both Managed and Unmanaged solutions in Microsoft Dynamics CRM to support the enhancements and published the customizations into the system.

- Experience in configuring MS CRM with MS outlook and SharePoint Integration.
- Created Dashboards, Views, Reports, charts and all the security roles and users accordingly in the system based on roles. Customized Dashboards based on the views, charts and performed unit testing.
- Developed Duplicate detection rules to prevent Duplication in entities.

Environment: MS Dynamics 365, .NET, PowerApps, Microsoft SQL Server 2014, SSIS, Scribe, SSRS, jQuery, JavaScript, WCF, AJAX, XRM Toolkit, SDK, Ribbon Editor Tool, Visual studio 2017, HTML, C#, CSS, SharePoint, PowerBI, TFS.

Software Developer

June 2016- December 2018

Client: Sears Retail, Illinois

Responsibilities:

- Collected existing infrastructure information including Active Directory, SQL server, Reporting Server instance for implementation of MS Dynamics CRM 2011 system.
- Created custom asp.net pages and configured forms and views for new modules to be added to MS Dynamics CRM system.
- Participate in application design sessions and code reviews to ensure accuracy towards business requirements and development guidelines.
- Implement several plug-ins, custom workflows, Console apps using C# and asp.net.
- Created custom dashboard, created custom Ribbon button, and configured sitemap using Pragma toolkit.
- Created SSIS packages for different data loading operations for many applications.
- Used Bing Maps API to design and develop dashboards to display incoming customer requests and update address coordinates in the Microsoft Dynamics CRM.
- Provided CRM end user training for case and service management for department staff.
- Provided technical guidance to the team and participated in several sessions of code review.
- Assisted the team in basic testing and deployment of the solution.

Environment: Microsoft Dynamics CRM 2013, ASP.NET, Visual Studio 2008, JavaScript, XML, Team Foundation Server 2008, SQL Server 2008, SSRS.

EDUCATION:

Masters in Information Systems

University Of Colorado, Denver

(3.84 / 4.0 CGPA)

TECHNICAL SKILLS:

Dynamics 365 Finance and Operations	Customizing and Creating Forms, Tables, SSRS Reports, UI Builders, Data Provider Classes, Chain of Commands, Events, Queries, Data Entities, Views, Workflows, APIs, Data Entities, APIs / Webservices, and Integrations.
Dynamics 365 CRM	JavaScript, C#, Plugin Development, Customizations Development, Fluent Query Expression, Query Expressions, Query By Attribute, Fetch XML, Integrations Development, XRM Toolbox, Plugin Registration Tool.
Power Platform	Canvas Apps, Model Driven Apps, Power Automate, Integrations, Power BI Data modeling, DAX, Power Query, Power BI Report, and Power BI dashboard development.
Languages	X++, .Net, C#, C++, HTML, XML, XAML, CSS, Java Script, Python
Tools and Repos	Docker, Git, Azure DevOps, Visual Studio, Visual Studio Code, SQL Report Builder, SQL Server Management System (SSMS), Postman, Power BI Desktop.
Databases	SQL, MySQL
