WORK EXPERIENCE

R1 RCM - QA Automation Engineer

OCTOBER 2022 – PRESENT

- Designed and developed a BDD automation framework from scratch using Cucumber, JUnit, and Java.
 - Automated REST API testing using REST Assured for complex POST/PUT requests.
 - Created and executed test cases in Postman and Swagger with database validation via Azure Data Studio.
 - Developed reusable Selenium WebDriver scripts with TestNG for regression testing.
 - Collaborated within a Kanban Agile team, documenting results in TestRail and Confluence.
 - Managed code in Git/GitHub and optimized CI/CD pipelines with GitHub Actions.
-

Wells Fargo - SDET

NOVEMBER 2021 – SEPTEMBER 2022

- Automated and manually tested web applications in Agile development cycles.
- Developed and maintained reusable Selenium WebDriver scripts for regression and smoke tests.
- Implemented BDD with Cucumber, writing feature files, step definitions, and scenarios.
- Validated cross-browser compatibility using Selenium Grid on Chrome, Firefox, and Edge.
- Logged and tracked defects in Jira, ensuring resolution before release.
- Performed desktop, mobile testing with WinAppdriver, Perfecto and BrowserStack.

**Blue Cross Blue Shield Association -
QA Automation Engineer**

JANUARY 2019 – OCTOBER 2021

- Created and executed automation test scripts for functional, integration, and regression testing.
- Developed data-driven frameworks using Apache POI for dynamic test data inputs.
- Conducted cross-browser testing with Selenium Grid and mobile testing using Perfecto.
- Optimized build and deployment processes via Maven and Jenkins, reducing build time and errors.
- Authored SQL queries for database validation, ensuring data integrity across multiple systems.
- Actively participated in Agile Scrum ceremonies, including sprint grooming, planning, retrospectives, and daily stand-ups.

Sierra Pacific Mortgage - QA Automation Engineer

APRIL 2016 – JANUARY 2019

- Designed, developed, and executed automation test scripts for UI (Selenium WebDriver) and API (REST Assured, Postman) testing covering Functional, Integration, and Regression scenarios.
- Built and maintained Data-Driven and BDD frameworks using Java, Apache POI, Selenium, and Cucumber, enabling dynamic test data inputs and reusable test components.
- Implemented API validation and automation, verifying request/response payloads, status codes, headers, and database updates.
- Optimized CI/CD pipelines by integrating automated test suites with Maven and Jenkins, ensuring faster builds and reliable deployments.
