

ABHILASH BUSIREDDY

Java Full Stack Developer

Austin, TX || (913) 263-3595 || abhilash.busireddy@hotmail.com || [LinkedIn](#)

SUMMARY

Java Full Stack Developer with 4+ years of experience building secure, high-performance web applications. Skilled in Java (Spring Boot, Spring MVC, Hibernate), PHP (custom modules, Moodle LMS), and modern frontends with Angular and React, with expertise in RESTful APIs, microservices, and cloud-native solutions on AWS and Azure. Experienced in backend optimization, scalable CI/CD pipelines, database performance, and secure coding. I have also applied AI and machine learning to real projects, developing predictive, recommendation, and anomaly detection models, and deploying microservices on AWS to deliver intelligent, data-driven solutions.

CORE SKILLS

Languages: Java 17, PHP, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Backend: Spring Boot, Spring MVC, Hibernate/JPA, PHP (LMS plugins, REST APIs), Microservices, REST APIs

Frontend: Angular 14+, React.js, Bootstrap

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS), Azure, Docker, Kubernetes, Jenkins, Terraform, GitHub Actions

Databases: PostgreSQL, MySQL, Oracle, MongoDB, Query Optimization

Testing: JUnit, Mockito, Selenium WebDriver, Cypress, Postman, TDD, BDD

Messaging: Kafka, RabbitMQ, WebSockets

Tools & Practices: Git, Jira, Confluence, Agile Scrum, SOLID Principles

AI & ML: Python, TensorFlow, scikit-learn, Hugging Face, Generative AI (LLMs), Pandas/NumPy, and deploying models on AWS (SageMaker, Lambda, EKS).

PROFESSIONAL EXPERIENCE

Java Full Stack Developer, Dell

Feb 2025 – Present

- Built and delivered full-stack web applications using Java 17, Spring Boot, and Angular, collaborating with UI/UX teams to improve page load performance by 35%.
- Designed and deployed 12+ RESTful microservices with Spring Boot, Kafka, and RabbitMQ, enabling real-time data processing, boosting throughput by 30%, and ensuring OWASP-compliant security.
- Updated core services to AWS cloud, improving system uptime from 96% to 99.9% and reducing infrastructure costs by 20%; implemented CI/CD pipelines with Jenkins, Docker, and Kubernetes, cutting release time from 2 days to 2 hours.
- Optimized PostgreSQL/MySQL queries and Hibernate mappings to reduce API response times by 40%; increased automated test coverage to 85% using JUnit, Mockito, and Selenium
- Integrated AI-driven anomaly detection into monitoring systems, reducing false alerts by 30% and improving reliability and operational efficiency.
- Built and deployed a generative AI microservice using Hugging Face and AWS, automating document classification and knowledge extraction, streamlining business workflows and saving manual effort.

Software Developer, Avenir Technologies

Jan 2020 – Jul 2023

- Rebuilt the insurance claims backend from a monolithic system into Spring Boot microservices, improving uptime from 94% to 99.9% and reducing deployment failures by 50%.
- Modernized a large AngularJS application to Angular 13 with TypeScript and Redux Toolkit, increasing UI performance by 40% and improving maintainability by 60%. Developed secure REST and GraphQL APIs for ERP and CRM integrations, streamlining workflows and improving data accuracy by 25%.
- Optimized SQL queries and stored procedures, reducing nightly batch job times by 45% and enhancing overall system performance.
- Implemented role-based access control (RBAC) using Spring Security, JWT, and Okta; increased automated test coverage to 85% with JUnit, Cypress, and Postman, reducing QA cycles by 30%.
- Built machine learning models for insurance fraud detection, improving accuracy by 25%, and developed an AI-powered recommendation engine for CRM workflows, increasing user adoption by 20%.
- Developed and maintained PHP-based modules for Moodle LMS, including custom plugins and MySQL integrations, improving user enrollment automation and reporting capabilities.

EDUCATION

Master of Computer Science | University of Central Missouri

CERTIFICATIONS

AWS Certified Developer - Associate
