EDUCATIONAL BACKGROUND

University of Washington

WA, U.S.

Master of Science in Computer Science and Systems

September 2023 – March 2025

- **IoT Teaching Assistant (TA):** Assisted the professor in IoT lab experiments, focusing on hardware/software integration using Raspberry Pi platforms, and guided Students to use of tools such as **Node-RED**, **Azure**, **Grafana**, and **MongoDB**.
- Engineered the TOPSIS algorithm to optimize complex decision-making processes and enhance resource allocation efficiency. Successfully deployed the algorithm on **AWS Step Functions**, enabling seamless integration and facilitating future research for other scholars.
- Led a team to integrate IoT-enabled robotic arm controls with real-time sensor data, developing a dynamic monitoring system with an interactive interface that enhanced automation, data-driven decision-making, and operational precision.
- Established **Logistic Regression**, **Neural Network**, and **SVM** models to analyze real-world likes data, achieving up to 83% accuracy in gender prediction and 73% accuracy in age-group classification.

Institute for Information Industry

Taipei, Taiwan

Degree Certificate: Java Full-Stack Development Programing (Active Team Leader)

October 2016 – April 2017

- Supervised a team in developing a cycling meetup platform with **Java** and **Spring MVC**, ensuring seamless task allocation and timely project completion.
- Mediated team conflicts and fostered collaboration, resulting in the successful deployment of a user-ready application through strategic planning and negotiation.

PROFESSIONAL EXPERIENCE / ACCOMPLISHMENTS

Wistron ITS Corporation.

Taipei, Taiwan

Senior Admin Software Engineer

June 2024 – September 2024

- Devised an admin web application with an intuitive interface using **Python's Django** framework, collaborating with clients to gather requirements, deliver tailored solutions, and streamline workflows, reducing weekly administrative effort by **20%**.

Envotions Technology Services.

Taipei, Taiwan

Senior Banking Software Engineer

March 2023 – July 2023

- Directed a team of five engineers to design a batch processing system for banking operations, advancing batch functionalities and leveraging **Spring Boot** APIs to accelerate execution, achieving a **25%** performance improvement.
- Refactored **Oracle database** query syntax, simplifying and optimizing complex search code to reduce average query time by **30%**.

Mirror Technology Co., Ltd.

Taipei, Taiwan

E-Commerce Software Engineer

October 2021 – June 2022

- Implemented a promotional system by reengineering monthly workflows, refining page layouts, and streamlining operations, resulting in a **25%** increase in user engagement and a **16%** growth in sales revenue.
- Redesigned and optimized the e-commerce platform architecture, introducing middleware solutions to offload complex computations, enhancing task distribution, and **tripling** page response speeds.

Shengsen Co., Ltd.

Taipei, Taiwan

Mobile Application Software Engineer

Junn 2019 – March 2021

- Architected backend functionalities for a banking application, utilizing **Java Persistence API (JPA)** to optimize data retrieval, doubling terminal system retrieval speed and reducing transaction execution time by **one-third**.
- Developed and deployed a personalized push notification feature, collaborating with cross-functional teams to refine database schemas, resulting in a **20%** boost in system performance.
- Enhanced the online account opening interface using **React and REST APIs**, applying responsive design principles to cut page load times by **40%** and improve registration completion rates by **15%**.

Wistron ITS Corporation.

Taipei, Taiwan

MES Software Engineer

June 2017 – March 2019

- Facilitated MES system enhancements for Corning Inc.'s factories in China and Taiwan, delivering multi-factory-compatible production tracking and data analysis features, reducing inter-regional development time by **20%**.
- Designed and optimized on-site MES functionalities by partnering with factory users to identify key requirements and deliver effective technical solutions, nearly **doubling** development speed.
- Refined MES database logic by simplifying complex queries, removing redundancies, and leveraging **Hibernate**, improving execution efficiency by **30%** and halving report generation times.
- Upgraded Corning Inc.'s attendance management system by optimizing **SQL procedures**, doubling query speed and achieving **95%** customer satisfaction during quarterly reviews.

EXCEPTIONAL SKILLS

- ❖ **Programming Languages:** Java, Python, C++, C#, JavaScript, Visual Basic.NET
- ❖ **Cloud & DevOps:** Amazon Web Services (Lambda, Step Functions, S3, EC2, RDS), Azure, Docker, Kubernetes, Apache Tomcat, Maven
- ❖ **Frameworks & Libraries:** Spring Boot, Hibernate, JPA, Django, ReactJS, NodeJS, Angular, RESTful API, AJAX, jQuery, HTML, CSS
- ❖ **Databases & Tools:** Oracle, SQL Server, MySQL, MongoDB, NoSQL, Git, SVN
- ❖ **Fluent in Chinese** and well versed in both Chinese and American cultures
