EDUCATION

MS (Information Technology), GPA: 3.97/4.0 | Clark University, Worcester, MA
B. Tech (Computer Science) | Rajiv Gandhi Proudhyogiki Vishwavidyalaya, Bhopal, India

Aug 2023 – May 2025
Aug 2017 – May 2021

EXPERIENCE

- Software Engineer | CrowdDoing (AIME Project), California, CA** Jul 2025 – Present
- Developed interactive features and dynamic components for AIME's web application using Node.js, React.js, HTML, and CSS, improving responsiveness and user engagement.
 - Designed and maintained gamified skill-building modules where students earned digital badges and rewards, ensuring seamless functionality, real-time updates, and user retention.
 - Optimized front-end performance by implementing state management best practices and reusable components, reducing page load times.
 - Collaborated with cross-functional teams including designers, product managers, and backend developers to deliver scalable and reliable solutions in an Agile environment.
- Automation Test Engineer | IntraEdge, Tempe, AZ** Jun 2024 – Mar 2025
- Automated regression and smoke test suites using Selenium, Java, and TestNG, reducing manual testing effort by 80%.
 - Enhanced an existing Cucumber BDD framework with reusable steps, improving maintainability and cutting script duplication by 30%.
 - Validated REST APIs and microservice integrations with Postman and RestAssured, ensuring smooth communication between backend services and frontend modules.
 - Integrated automated tests into Jenkins CI/CD pipelines, enabling faster release cycles and early defect detection.
 - Collaborated with developers and product owners in Agile sprints to ensure test coverage met requirements.
- Software Engineer | Cognizant Technology Solutions (Humana Healthcare), India** Oct 2022 – Jul 2023
- Built and optimized reusable UI components in React.js and JavaScript, accelerating feature development and enhancing code modularity.
 - Integrated APIs into front-end modules, improving user experience and reducing manual effort.
 - Partnered with QA teams to automate workflows in Selenium and C#, supporting test-driven development and improving product quality.
 - Designed and executed functional, integration, and regression tests, ensuring smooth end-to-end delivery of healthcare features.
 - Participated actively in Agile SCRUM ceremonies, contributing to sprint planning, defect triage, and collaborative delivery.
- Software Engineer | Cognizant Technology Solutions (Credit Suisse Bank), India** Oct 2021 – Sept 2022
- Designed, developed, and deployed scalable backend microservices using Java, Spring Boot, and REST APIs, increasing platform efficiency and transaction throughput by 45%.
 - Optimized large-scale banking data handling by implementing MySQL indexing and sharding techniques, cutting data retrieval times by 22% and ensuring smooth high-volume processing.
 - Automated build and deployment workflows with Jenkins and Maven, standardizing CI/CD pipelines and reducing release cycle times.
 - Collaborated with front-end teams to integrate backend APIs with UI modules, ensuring seamless data flow and user interactions.
 - Engaged in Agile sprints, performed code reviews, and mentored junior developers in backend development best practices.
- Trainee Software Engineer | Amrut Software Pvt. Ltd., India** Mar 2021 – Aug 2021
- Contributed to the development and maintenance of software applications by applying patches, fixing bugs, and optimizing legacy code for performance improvements.
 - Assisted in the design and delivery of new features while following Agile and Waterfall methodologies, ensuring alignment with client requirements and deadlines.
 - Supported UI development by working with HTML, CSS, and JavaScript, strengthening application usability and interface design.
 - Documented processes and tracked tasks in Jira, improving collaboration and onboarding efficiency.

PROJECTS

- Cybersecurity Threat Analysis – Bots v3 Dataset** Aug. 2024 – Dec 2024
- Processed 760,000+ security events to identify anomalies, vulnerabilities, and attack patterns.
 - Built interactive dashboards highlighting correlations between privileged account misuse, high-risk ports, and AWS API anomalies.
 - Delivered insights that supported proactive threat detection and incident response strategies.

TECHNICAL SKILLS

- Programming & OOP:** Java, C++, C#, C (strong understanding of OOP concepts and design patterns)
- Frontend Development:** React.js, Angular, JavaScript (ES6+), HTML5, CSS3, Bootstrap (UI/UX-focused development and responsive design)
- Backend Development:** Java, Spring Boot, Spring MVC, RESTful APIs, Exception Handling, JUnit (API development & backend logic implementation)
- Databases & Cloud:** MySQL, MongoDB, AWS (EC2, S3, RDS) (data modeling, optimization, and cloud deployment)
- DevOps & CI/CD:** Git, Jenkins, Maven, Docker, Kubernetes, Jira, Agile (end-to-end code integration, delivery, and deployment automation)
- Testing & QA (Supporting Skills):** Selenium WebDriver (C#), Postman, Test Case Design, Regression Testing, Defect Tracking (applied in SDLC for quality assurance)

CERTIFICATIONS

- Salesforce Certified AI Associate — Salesforce, 2025
- AWS Certified Solutions Architect— Associate — Amazon Web Services, 2024
- AWS Certified Cloud Practitioner — Amazon Web Services, 2024
- Microsoft Certified: Azure Fundamentals (AZ-900) — Microsoft, 2024
- CompTIA Certification — CompTIA, 2024
