

Abhignya Goje

(571)-407-4837 | abhignya.g@gmail.com | [LinkedIn](#) | Chicago, IL

Summary - Senior Data Scientist with about 8 years of experience and background in Data Engineering and Data Science, adept at leveraging Databricks, PySpark, SQL, Tableau, and other tools to extract insights from complex datasets. Skilled in leading data-driven projects and implementing innovative solutions to drive business growth

Technical Skills

- **Big Data and Cloud:** PySpark, Hadoop, Hive, Apache Airflow, AWS (S3, EC2, Lambda, Bedrock, SageMaker)
- **Machine Learning:** SparkML, MLflow, Scikit-learn, XGBoost, NumPy, Pandas, Matplotlib, TensorFlow, MLOps, NLP, K-Means, Decision Trees, Random Forest, Linear and Logistic Regression, GenAI - ChatGPT
- **ML Lifecycle:** Data Extraction, Pre-processing, EDA, Feature Engineering, Scaling, Dimensionality Reduction, Cross-Validation, Model Building & Validation
- **Programming:** Python, R, SQL, Bash, Basics of Java, Scala, C++
- **Tools & IDEs:** Databricks, Tableau, Jupyter Notebook, PyCharm

Employment

Senior Data Scientist - The Nielsen Company(US) LLC, Chicago, IL

May 2021 – Present

Tech Stack – PySpark, MLflow, SparkML, Machine Learning Life Cycle, BigData and Data Engineering, Databricks, Python, Statistical analysis, AWS S3, Airflow, Tableau, Scikit-Learn, XGBoost, Pandas, SQL, GitLab

- Built an award-winning LLM application using AWS Bedrock (Claude 3.5), Lambda, and S3 that generates contextual outfit recommendations based on location, seasonality, and occasions; secured 3rd place in Product Innovation category at Nielsen x AWS Hack-AI-thon
- Designed and implemented automated PySpark ETL pipelines to process ~2 billion rows of media consumption data in AWS S3 Data Lake, enabling data-driven insights that improved data quality by 30%
- Managed end-to-end ML lifecycle (data pre-processing, feature engineering, training, validation, deployment) using PySpark, Airflow, Kubernetes and Docker(on the backend of the in-house implementation platform).
- Developed and optimized ML model, improving accuracy by 28%, resolving critical data issues affecting 25% of data
- Filed and issued a US patent (Record ID – 81264447) for methodologies addressing data issues.

Software Engineer (Banking - Data)- Tata Consultancy Services, Hyderabad, India

Oct 2015 - Aug 2019

Tech Stack – Hadoop(HDFS), SQL, Hive, Shell Scripting, Oozie, Jira, Mainframes – JCL, COBOL

- Developed, tested and optimized data pipelines, using shell scripting to ingest data from Mainframe to HDFS (Hive), and managed large-scale relational databases for customer data transfers.
- Led a team of six to develop a full-stack project for an electricity company during the training period.
- Optimized SQL queries, improving performance by 20% and reducing run-time.
- Built a REXX tool to automate string replacements across modules, saving two hours of work per day.

Education

Master of Science in Computer Science and Data Science

3.88/4.0, May 2021

University of Central Missouri, Missouri, U.S.A

Certifications

- | | |
|--|--------------------------|
| • Functions, Tools and Agents with LangChain | Feb 2025 |
| • LangChain for LLM Application Development by DeepLearning.AI | Feb 2025 |
| • Machine Learning Engineering for Production (ML Ops) Specialization by DeepLearning.AI | Jul 2024 |
| • Databricks Certified Machine Learning Professional | May 2024 |
| • Generative AI for Everyone – DeepLearning.AI | Apr 2024 |
| • AWS Certified Cloud Practitioner | Jan 2021 |
| • Hands-On Essentials: Data Warehousing Workshop by Snowflake | Feb 2021 |
