

Abhilash Shah (USC)

Senior SQL Server Database Administrator

Troy, Michigan | +1(908) 456-6954 | abhilashshahdba@gmail.com

Professional Summary:

- Experienced IT professional with **20+** years in various technologies including **over 17+** years of Database Administrator experience leading database design, development, migrations and upgrade teams working with SCM and Oracle Databases **9i/10g/11gR2/12c (RAC)/19c** in development, test, UAT and production environments.
- Experience in Oracle/MYSQL/MSSQL Server/DB2 LUW design, patching, cloning, upgrade, performance tuning, migration and implementing standards and best practices.
- Experience with Oracle RAC, ASM, RMAN, Data guard, while implementing solutions following the Agile Methodology, participating in design and code reviews.
- Experience in Golden Gate 12c installation, configuration, troubleshooting replication issues. Experience in leading and handling DBA team as well as multiple projects simultaneously and good exposure to Database Management and Release Management. Coordinating various project related activities involving project Planning, Execution and Risk Management in tune with the core business objectives.
- Migration Experience in using Oracle Goldengate or HVR to heterogeneous platforms like Teradata, MYSQL, MSSQL or AWS and Azure.
- Familiar with AWS services like S3, EC2, RDS (DynamoDB, MySQL, Redshift), VPC. Also, Familiar with Azure implementation for Golden gate.
- Experience migrating SQL Server to Azure cloud. Experience working with Azure Data Factory.

Professional Experience:

PNC Financial | Jun 2024 – Present

Senior SQL Server DBA (Contract)

- Managed over 250 SQL Server instances across production and development environments.
- Configured and supported Always on Availability Groups to achieve high availability.
- Automated maintenance tasks using PowerShell scripts and SQL Server Agent Jobs.
- Performed index optimization, query tuning, and statistics updates to improve performance by up to 40%.
- Implemented auditing and compliance checks to align with SOX and GDPR policies.
- Led a team of 3 junior DBAs in supporting a 24x7 enterprise SQL environment.
- Developed ETL processes using SSIS for healthcare data integration.
- Created and scheduled complex SQL Jobs for backup, index, and consistency checks.
- Diagnosed and resolved database locking/blocking, deadlocks, and high CPU queries.

TCS, Troy MI | Feb 2018- May 2024

Customers Boeing, McKesson, WEBSTER BANK, WALGREENS, and BOEING

SQL Server Database migration

- Received **ARC files to Azure cloud blob storage** and extracted the data and **Azure SQL database**.
- Migrated **on premises SQL Server Database** to Azure Cloud using **Database migration assistant** on a VM
- Migrated large-scale SQL Server databases to Azure SQL Managed Instances ensuring minimal downtime and high availability.
- Managed Azure SQL Server Databases and administered them, wrote T-SQL procedures.
- Designed and automated data ingestion workflows using Azure Data Factory (ADF) to support seamless cloud data integration across SQL Server, Azure Blob Storage, and Azure SQL Databases.
- Supported team of 24x7x365 Database admin, in the Data Solutions group.
- Implemented Golden Gate 12.1/12.2/12.3 across Boeing for migration of Oracle 12.2/12.2 databases to heterogeneous data across platforms like **Teradata, MS Sql server, AWS, Azure, Postgres**.
- Implemented and supported Goldengate on **Oracle 12.2** RAC for PSDH application using XAG. Also was on-call DBA for PSDH.
- Maintained **SOX** compliance for BEDW/CDW.
- Worked on multiple projects of Database hardening and SOX related databases. Supported user management for SOX and non-SOX databases.
- Installed SQL Server 2016 and SQL management studio.
- Upgraded databases in non-production and production from **12c to 19c using DBUA**.
- Designed and developed databases for SQL Server, Trouble shoot issues, Wrote procedures and functions
- Performance tuned SQL server issues caused due to queries and solved backup issues.
- Gathered requirements for data designing and fine tuning databases as per customer requirements. Took backup snapshots and restored them as necessary.
- Installed golden gate 12c on SQL Server 2016 for replication from Oracle to SQL server.
- Monitored the implementation of Golden gate, managed databases using OEM 13c.

- Implemented Goldengate Micro Services Architecture for multiple clients, maintained the extracts and replicates, Troubleshoot them.
- Monitored disk space for trail files.
- Upgraded Golden Gate 12.2 to 12.3.
- Implemented Classic, Integrated and coordinated replicates.
- Mentored other members of the team in Golden gate 12c features and worked with infrastructure and application developers directly to resolve any replication issues.
- Wrote monitoring scripts for Golden gate, general maintenance scripts for daily automation tasks.
- Troubleshooting, Performance Tuning Golden Gate issues.
- Working on shell scripts, developing them
- Provided L2/L3 level of support, Designed and maintained databases in Oracle 12c.
- Created Oracle SRS, and worked on them.
- Also, working on PostgreSQL 9.6.7 on the Linux servers as DBA maintaining databases for applications, used PgAdmin 4 and installing pgClient.
- Monitoring databases using OEM 13c.
- Actively monitored and optimized Azure SQL databases post-migration, focusing on performance tuning, resource utilization, and cost management within the Azure environment.

Infinite Technologies, Roswell, GA | Sep 2017 – Nov 2018

Conduent Healthcare - ORACLE DBA SME

- Conduent Healthcare - ORACLE DBA SME
- This was a short project and the client wanted someone to fill a production DBA role.
- Actively involved in GG troubleshooting
- Involved in Deploying production related code in PL/SQL and executing sql scripts for application teams in AK/NH/ND regions
- Troubleshooting user issues, resolving Service Center tickets on time
- Administering Oracle 10g/11gr2 databases
- Providing Support 24/7 in a production environment
- Working on shell scripts, database migrations, and OEM 13c.
- Followed HIPAA rules for compliance and accuracy in Revenue cycle management (RCM) process databases for claims to member providers and revenue management databases.
- Implemented SOX related database objects for before and after images.
- Worked with Oracle Identity Manager (OID)11g in integrating it with Oracle Internet directory, registering new and old databases, access to the databases, and LDAP account management
- All oracle databases on Aix 7.1 and Linux 7.1

Trinity Health, MI | Jan 2017 –Jul 2017

Lead Oracle DBA - Consultant

- Administered multiple 11gr2 and 12c databases as part of a team completing a complete DB migration, of 300-400 DBs, with over 50 TBs in memory, from NY to MI, setting up Active Data guard and configuring Data guard broker in 12c.
- Followed DB Availability Disaster Recovery standards to ensure DB performance and availability, working with Data guard.
- Used Shell Scripts to configure Data guard, to monitor space and backups.
- Replicated DBs to ensure availability to ensure DB protection across the network, ensuring standby DBs were properly working.
- Created shell scripts to add table spaces automatically when needed to databases.
- Installed and configured Golden Gate 12c and configured uni-directional replication.
- Resolved and troubleshoot issues in Golden Gate replication and worked with Oracle support, when needed.
- Migrated databases using GG and RMAN for 2 node RAC and implemented and configured GG in 2-node RAC cluster.
- Handled Supply Chain /Clinical databases for Trinity Health and administered them via OEM 13c.
- Configured RMAN Backups of all databases and created user accounts following company's standards
- Analyzed performance issues in the application and troubleshoot them using SQLT and TKPROF.
- Executed processes for evaluation of system space, database allocation and storage metrics.
- Supported a 24x7x365 environment with on-call responsibilities, actively participating in problem resolution management.
- Patched Oracle DB environments and cloned database, completed upgrades and implemented backup and monitoring procedures.
- Worked with ServiceNow tickets, change requests and resolved them as per the defined SLA.
- Worked with Oracle Identity Manager (OIM)11g in integrating it with Oracle Internet directory, registering new and old databases, access to the databases, user provisioning, resources assignment and LDAP account management
- Followed HIPAA rules for compliance and accuracy in Revenue cycle management (RCM) process databases for claims to member providers and revenue management databases.
- Implemented SOX related database objects for before and after images.
- Also maintained PeopleSoft databases and applications with OIM.

Cognizant Technologies, Kaiser Permanente, CO and Comerica Bank, MI | Jul 2013- Jan 2017

Sr. Oracle DBA (Consultant through Cognizant Technology Solutions)

- Part of the team in charge of process improvement of ITIL and handled DBA projects in Oracle 11gr2, 12c and DB2 9.7 to 10.5, MSSQL Server 2005/2008.
- Managed OEM installation plan and managed OEM for 40 servers and 200 databases.
- Followed HIPAA rules for compliance and accuracy in Revenue cycle management (RCM) process databases for claims to member providers and revenue management databases. Implemented SOX related database objects for before and after images.
- Managed MSSQL Server 2005/2008 databases and completed regular backups via scheduler and ensured Availability Disaster Recovery plans were met, by transferring backup copies from one server to another.
- Managed quarter wise patching of Oracle/SQL Server databases/Db2 Databases
- Actively part of WOMBAT(DR) testing of Oracle/Db2 databases.
- Partitioned tables, RAC, completed performance tuning and worked closely with the Database and SOX Compliance team to ensure and implement SOX standards and controls across the organization.
- Actively represented all the changes in the CAB
- Installed and configured GG 12c and configured replication between primary and target servers using bi-directional replication and troubleshoot replication issues.
- Configured Data guard brokers, installed and configured active Data guard for 12c databases.
- Supported a 24x7x365 environment with on-call responsibilities; actively participating in problem resolution management and working with ServiceNow for change requests, tickets as per the SLA defined.
- Provided Level 3 support on production issues
- Partitioned tables, RAC and completed performance tuning of Oracle Databases.
- Defined database standards, administered databases for KP nationwide, working with different IT application and support groups.
- Executed queries in TOAD 9.5, completed database design and modeling while working with different Application Teams in order to gather and implement Logical and Physical Design.
- Used different modeling Tools such as Erwin and TOAD, for ERD generation.
- Coordinated production deployments with IBM and ensured successful implementations.
- Planned and upgraded 11.2.0.3 to 11.2.0.4/12.1.0.2 with latest PSU patch for all databases.
- Installed and configured OEM 12c agents.
- Provided successful performance recommendations to improved database performance and ensured 99.95% availability targets.
- Developed UNIX shell and SQL scripts for database monitoring.
- Approved production schema changes, database design and control migration of Oracle schema objects, nodes and implemented Oracle failover technology.
- Configure and implement non-prod and prod Active Data guard in 11gr2 and 12c.
- All oracle databases on Aix 7.1

Syntel Inc, New York, NY | May 2001- Jun 2013

Oracle DBA, Project Lead (Database Services)

- Administered and troubleshoot Oracle RAC in CRS, node sync issues and SCAN issues on two-node implementation in Oracle 11gR2 using OEM and adhere to PCI security standards.
- Tested OLTP transactions, SQL response time, and database workload during peak hours, and generated AWR reports for any database related issues.
- Responded and resolved incident tickets, and provided timely updates.
- Maintained Oracle software (upgrades, patches etc.) and fine tune Oracle instance components and cron jobs for SQL and PL/SQL.
- Developed UNIX shell and SQL scripts for database monitoring.
- Lead production deployments every week with the SCM Team for all 140 applications including Planning and managing the releases for critical apps like Pyramid, BFM and Accurate.
- Setup auto-deployment environments for legacy applications, documented high-level system environments, service catalogues, etc
- Working on partitioning of tables, RAC, performance tuning of Oracle Databases.
- Locally managed table spaces were used which track all extent information in the table space itself. This results in improved performance as it eliminates recursive operations and reliance on data dictionary.
- Approve production schema change, database design and control migration of Oracle schema objects, nodes and implement Oracle failover technology - Data guard.
- Design and implement a backup & recovery using RMAN and data modeling and Oracle database design.
- Create Standby databases to maintain consistency over the data during Disaster on Production site.
- Manage the database size of more than 1.3 TB.

- Provided training to DBA Team on Oracle 10gRAC in IMS Practice and involve in RFP and POC activities

Rapidigm Inc| Jan 2001- Mar 2001

Oracle DBA, Project Lead (Database Services)

Clients: BCBS, Diametric, PGE.com, First American Corp, Texas Instruments

- Managed databases for multiple Customers in DB2(9.7), MySQL (5.5) and Oracle 10gR2/11gR2 and 11g on multiple projects.
- Work closely with project leads (PM, BA and QA), product managers and developers to deliver quality software to deadlines, Participate proactively in all stages of System Analysis, Design, Development, Code Review and Implementation. Single handedly designed and implemented PL/SQL modules for security of 9i DB using DBMS_OBFUSCATION packages and wrote custom algorithm in PL/SQL

Educations:

- **Masters of Business Administration, Marketing in IT**, Canadian School of Management (TASMAC) | India
- **Bachelors of science in Physics**, MG Science Institute (Gujarat University) | India

Trainings:

- Azure Administrator Associate AZ104.
- Oracle 12c Administration.
- Oracle 10gR2 Administration.
- Project Management Professional (QAI, Bangalore).
- ITIL v2.
- AWS Trained.
- Mongo DB 4.0 Trained.
- HVR (High Volume Replication).

Certifications:

- Azure Fundamentals AZ900 Certified
- Oracle 10G Database SQL Expert
- Brain Bench J2EE Professional
- Novell Certified Internet Professional
- IBM Clear Case UCM, IBM Build Forge
