PROFESSIONAL EXPERIENCE:

AKI / Not Just Snacks

3/2024 – Present -- San Francisco, CA

Corporate Technology PMO

- Led the successful implementation and management of IDP for streamlined identity and access management, enhancing security across the organization
- Oversaw the deployment and lifecycle management of corporate devices and hardware tools, with a strong focus on endpoint security to protect corporate and customer data
- Managed Vendors for implementation of software tools such as JAMF and CrowdStrike, as well as managing logistics for onsite support across offices worldwide
- Directed PCI compliance initiatives, maintaining stringent security protocols to safeguard sensitive payment information and ensure regulatory compliance
- Acted as Chief Information Security Officer (CISO), providing strategic security direction, leadership, and governance to strengthen the company's security posture
- Developed and executed comprehensive IT roadmaps, aligning technology initiatives with business goals and driving long-term planning
- Designed and led company-wide security training programs, resulting in a significant reduction in security incidents through improved user awareness and best practices
- Implemented advanced endpoint security measures, proactively identifying and mitigating threats to minimize risk and protect critical data assets
- Collaborated cross-functionally with engineering, security, and operations teams to align technology solutions with corporate objectives and security requirements
- Provided leadership and mentorship to the global technology team, fostering a culture of security, innovation, and continuous improvement

Sephora

1/2017 – 3/2024 -- San Francisco, CA

Retail Technology PMO / PMO Governance

- Developed and led a high-performing team of project managers, reporting and governance, ensuring consistent results on time and within scope
- Oversaw of all retail systems at Sephora, including store systems, digital systems, and POS systems, ensuring seamless integration across platforms
- Led projects for Application Development across Retail Technologies, including POS, mPOS, E Commerce as well as Supply Chain implementations
- Collaborated with cross-functional teams to design and implement custom mobile POS solutions, enhancing operational efficiency in retail environments
- Managed the development and enhancement of POS and warehouse management applications, contributing to improved inventory control and store operations through demand planning and logistics
- Worked closely with developers and architects to ensure that customized applications were aligned with Sephora's technology infrastructure, supporting the scalability and performance of retail systems resulting in a significant improvement in store performance and reduction in support incidents
- Directed the modernization and custom development of POS and Supply Chain systems, Store Digital systems and custom software solutions, resulting in improved efficiency business performance
- Created an in-depth training program for all Sephora project managers, leading to improved efficiency against our KPIs and metrics
- Implemented a custom hybrid PMO methodology that took into account the needs of all technology groups and customized the program to each org and their requirements resulting in consistent development across all of our technology groups

Williams Sonoma Inc.

12/12- 1/2017 -- San Francisco, CA

Global IT– Retail PMO

- Drove initiatives from design to deliverable by working with the business to identify requirements and working with technology and architecture teams to design and build the required solution
- Led project to implement tokenized credit card numbers and pin-pad development to the stores
- Responsible for multi-million-dollar budgets for resource and project management surrounding the supply chain process and applications
- Led teams of onshore and offshore developers to build and customize Supply Chain, Merchandising, inventory and e-commerce platforms
- Managed a team of internal and external resources to implement retail technologies in stores
- Implemented Agile based project management methodologies and standards
- Developed standardized dashboard reporting for executive review and budget tracking
- Initiated the International Expansion and created new reporting tools and standards for all systems across the international expansion
- Recognized for outstanding performance in London and Australia SWAT deployment
