

# ADAMS LOWE

(512) 541-2478 | adamslowe310@gmail.com | 1007 Romeria Dr, Austin, TX 78757

## PROFILE

---

Results-driven Senior Java Developer with 10+ years of experience designing, developing, and optimizing scalable, high-performance, and secure enterprise applications. Expertise in Java (8-21), Spring Boot, Microservices, Cloud-Native Development (AWS & Azure), and DevOps automation.

Proficient in distributed systems, event-driven architecture, and data-driven applications, ensuring that business goals align with technical scalability and quality. Strong background in security, performance optimization, and system architecture, with experience leading cross-functional teams in Agile environments.

## TECHNICAL SKILLS

---

**Programming Languages:** Java (8-21), Kotlin, JavaScript, TypeScript, SQL, Python, Bash, C#

**Frameworks & Libraries:** Spring (Boot, Web, Security, Data, Cloud, MVC, Batch, Reactive), Hibernate/JPA, GraphQL, RabbitMQ, Kafka, React, Next.js, Node.js, Angular, Keycloak

**Databases & Data Engineering:** PostgreSQL, MySQL, Oracle PL/SQL, MongoDB, DynamoDB, Redis, Elasticsearch, OpenSearch, Firebase, Prisma, ETL Pipelines, Data Warehousing, AWS Glue, Azure Synapse

**Cloud & DevOps:** AWS (S3, Lambda, EC2, SNS, Redshift, Glue, OpenSearch, API Gateway, CloudWatch, ECS, EKS, IAM), Azure (Functions, ADF, Synapse, Container Service), Docker, Kubernetes, Helm, Terraform, Ansible, GitHub Actions, GitLab CI/CD, Jenkins, Drone, Azure DevOps

**Testing & Performance Optimization:** JUnit, Mockito, Jest, Selenium, Playwright, Apache JMeter, Profiling & Performance Tuning (JVM, Hibernate, Caching, Load Balancing), Security Auditing & Penetration Testing

## EXPERIENCE

---

### Senior Software Engineer

June 2021 – February 2025

EPAM Systems

Remote

- Developed and optimized Spring Boot microservices using Java 17 & Kotlin, ensuring high availability and fault tolerance.
- Implemented event-driven architectures using Apache Kafka & RabbitMQ for asynchronous data processing.
- Designed and optimized SQL (PostgreSQL, Oracle PL/SQL) & NoSQL (MongoDB) databases, ensuring data integrity and performance scalability.
- Developed and secured RESTful APIs & GraphQL services with OAuth2 & JWT authentication using Spring Security & Keycloak.
- Automated CI/CD pipelines using Docker, Kubernetes, Helm, and GitHub Actions, reducing deployment time by 40%.
- Conducted performance profiling and optimized Java applications using JVM tuning, query indexing, caching (Redis, Memcached), and multithreading.
- Led Agile Scrum sprints, collaborating with cross-functional teams (Product, DevOps, QA) for streamlined development workflows.

### Senior Software Engineer

January 2016 – April 2021

Sharecare, Inc.

Remote

- Led the development of scalable microservices architectures using Spring Boot, GraphQL, and REST APIs.
- Reduced first-page load times by 15% by implementing server-side rendering (SSR) with Next.js and GraphQL optimizations.
- Utilized Spring Config Server for centralized configuration management, improving system maintainability.
- Designed data pipelines for ETL and analytics using AWS Glue, Redshift, and DynamoDB, ensuring efficient data transfers and real-time insights.
- Developed monitoring and alerting solutions with Grafana, Prometheus, and Spring Boot Admin.
- Optimized application query performance by 60% by denormalizing database structures, tuning Hibernate queries, and introducing caching mechanisms (Redis & Ehcache).
- Conducted security assessments and remediated security vulnerabilities, reducing security risks by 70%.

### Senior Java Developer

December 2013 – December 2015

The Home Depot

Charlotte, NC

- Built Spring-based backend services and integrated them with microservices & REST APIs, ensuring seamless data processing.

- Implemented Object-Relational Mapping (ORM) using Hibernate & Spring JPA, improving database efficiency.
- Automated deployments using Jenkins & Docker, reducing manual intervention and improving release cycles.
- Implemented distributed logging & monitoring solutions using Log4j, Kibana, and Zabbix for real-time system tracking.
- Developed Python scripts for system monitoring and automated troubleshooting.
- Designed role-based access control systems using Spring Security, OAuth2, and JWT authentication.

**Java/J2EE Developer**

September 2011 – November 2013

*Power Engineering Corporation**Charlotte, NC*

- Developed and maintained enterprise-grade Java applications with a 98% success rate in production deployments.
- Built responsive UI components using JavaScript, jQuery, HTML, and CSS.
- Implemented MVC architecture to enhance code maintainability and application scalability.
- Managed servlets, JSPs, and RESTful APIs, ensuring seamless data exchange between frontend and backend systems.
- Optimized SQL queries and database structures, reducing query execution time by 30%.

**EDUCATION**

---

**College of Charleston**

Charleston, SC

*Bachelor of Science (BS) in Computer Science**August 2008 – May 2011***CERTIFICATIONS**

---

- Solution and Software Architecture
- Java Spring Boot
- Azure
