

Adharsh Katraj

Full Stack Developer

| +1(817) 754-0432 | adharsh.k@protectmymails.com | <https://www.linkedin.com/in/adharsh-katraj-8303b4179/> |

SUMMARY

Full-Stack Developer with Around 4 years of experience delivering end-to-end web solutions using Java 8+, Spring Boot, Spring MVC, and Hibernate (JPA), with a strong focus on building secure, scalable, and cloud-ready applications. Experienced in developing microservices and RESTful APIs secured via OAuth2/JWT, integrating with relational and NoSQL databases such as MySQL, PostgreSQL, and MongoDB. Proficient in modern frontend stacks including React.js, Redux, HTML5, CSS3, Tailwind CSS, and Bootstrap, ensuring responsive and user-friendly interfaces. Skilled in deploying containerized applications using Docker and Kubernetes on AWS (EC2, Lambda, RDS, S3), and automating CI/CD pipelines with GitHub Actions and Jenkins. Well-versed in Agile workflows, test-driven development (JUnit, Mockito), and collaborative coding practices like peer reviews and code optimization.

SKILLS

Languages: SQL, Python, JavaScript, Java, SpringBoot, Hibernate

Frameworks/Libraries: React.js, Redux, Bootstrap5, jQuery

Cloud/Application Server: AWS(CloudFront, S3, Lambda, EC2, RDS, APIGateway, Amplify)

Frontend Technologies: Responsive Web Design, Cross-Browser Compatibility, RESTful API Integration

Web Technologies: HTML5, CSS3, Bootstrap5, jQuery, AJAX, JSON, XML

Database: SQL, MYSQL, PostgreSQL, MongoDB, DynamoDB,

Testing & Debugging: Cypress, Jest, React Testing Library

Methodologies & Tools: SDLC, Agile/Scrum, Waterfall, Chrome DevTools, JIRA, Git, GitHub, Jenkins, Postman

Deployment & CI/CD: Netlify, Vercel, GitHub Actions, Docker, Kubernetes

WORK EXPERIENCE

JPMorgan Chase & Co, Dallas, Texas (Contract)

Dec 2024 – Present

Full Stack Developer

- Led redesign of a corporate loan system using Java 17, Spring Boot, and Hibernate, which automated risk assessment workflows, reduced credit processing time by 35%, and improved underwriting consistency for high-net-worth institutional clients.
- Revamped internal trading dashboard UI using React.js, and Tailwind CSS, enhancing real-time visibility into equity and derivative positions, and boosting analyst productivity by 26% across the Asset & Wealth Management division.
- Developed secure RESTful APIs to integrate client onboarding platforms with KYC/AML engines, ensuring end-to-end identity verification workflows were scalable and compliant with OCC and FINRA regulations, cutting onboarding delays by 40%.
- Optimized PostgreSQL-based transaction settlement modules, accelerating batch processing of fixed income instruments, which reduced daily reconciliation delays by 31% for the investment banking operations team.
- Implemented CI/CD pipelines with GitHub Actions, Docker, and AWS CodePipeline, streamlining the release of microservices tied to real-time payment monitoring, reducing rollback incidents by 55% and enhancing deployment transparency for devOps teams.

Wipro, Hyderabad, India

May 2022 – Aug 2023

Full Stack Developer

- Directed the modernization of financial client platforms by re-engineering monolithic applications into microservices using SpringBoot, MongoDB, and Docker, resulting in a 42% boost in transaction processing efficiency and easier scaling across geographies.
- Constructed and responsive frontend dashboards with React.js, Redux, and CSS3, integrated with Flask APIs, which enhanced UI load time by 30% and improved user satisfaction scores for internal banking operations tools.
- Streamlined credit risk evaluation workflows by developing secure RESTful APIs using SpringBoot and implementing schema validations, enabling real-time scoring logic and reducing approval turnaround by 35% for a Fortune 100 finance client.
- Executed blue-green deployment on AWS for uninterrupted availability and smoother quarter-end rollouts, reducing release risks.
- Automated full-stack testing suites using Jest for frontend and Postman for backend API validations, increasing test coverage and reducing manual regression effort by over 60%, thereby accelerating production cycles within agile sprints.
- Configured and maintained CI/CD pipelines using GitHub Actions, SonarQube, and Docker Hub to streamline code integration, reduce build issues by nearly 50%, and support reliable deployments across multiple healthcare environments.

LTIMindtree, Hyderabad, India

Jan 2021 – Apr 2022

Junior Full Stack Developer

- Spearheaded the development of a real-time financial reconciliation tool using React.js, Spring Boot, and PostgreSQL, reducing transaction mismatches by 38% and enhancing the accuracy of monthly financial statements and compliance reporting.
- Strengthened data privacy and improved regulatory alignment by developing encrypted RESTful APIs for finance operations, streamlining secure transaction handling and reducing audit exceptions by over 23% across departments.
- Designed modular, WCAG-compliant frontend components with validation and access control using React.js and Redux, accelerating expense approval workflows and boosting UI accessibility across multiple financial modules.
- Containerized and deployed finance-critical microservices using Docker on AWS EC2, integrating with ELK and CloudWatch for seamless logging, monitoring, and high availability during quarterly closing operations.
- Executed API testing using Postman, increasing coverage by 30% and reducing post-release defects across transaction modules.
- Collaborated in Agile sprints using Jira, ensuring timely delivery of critical finance features and enhancing team coordination

EDUCATION

Master of Science in Information Technology and Management (GPA 3.9/4) | Webster University, St. Louis, MO
