

Software QA Engineer

Alesia Alekseeva

(331)-223-6022 | qa.alekseeva@gmail.com | [LinkedIn](#) | Greater Chicago Area, IL

Accomplished Software QA Engineer with over 5 years of experience in Manual and Automated Testing, specializing in Functional, Regression and API Testing to ensure high product performance and reliability. Possesses a strong background in Test Automation using Cypress and JavaScript, leading to reduced regression testing times and enhancing application quality. Proficient in cross-functional collaboration to efficiently identify and resolve defects, driving improvements in overall product quality.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, GraphQL, HTML, CSS

Automation Frameworks & Tools: Cypress, Playwright, Postman, Node.js (SuperTest, Mocha, Chai)

CI/CD & Version Control: Git, GitHub, Jenkins, Docker, AWS

Testing Methodologies & Tools: REST API, TestRail, Notion, Jira, Xray, Confluence, Flowlu, Bugzilla

Databases: MySQL, MongoDB

EXPERIENCE

Software QA Engineer

DigitalVertex Enterprises, Atlanta, GA

June 2021 - Present

- Engaged in all application phases from design to deployment, ensuring timely delivery of high-quality software products through Agile/Scrum and SDLC processes.
- Developed and implemented a UI automation framework from scratch using Cypress and JavaScript, leading to a 30% reduction in regression testing time and improved end-to-end testing efficiency.
- Authored and executed comprehensive manual test cases and automated scripts that improved system and regression testing efficiency with Cypress.
- Automated 100% of smoke tests, resulting in a 50% reduction in manual testing and an increase in overall test coverage.
- Converted 70% of Manual Testing to Automation, increasing team productivity by 30%.
- Implemented CI/CD pipelines using GitHub Actions, reducing testing cycle time and streamlining deployment.
- Executed and maintained a suite of over 400 automated tests for API Testing in Postman, significantly enhancing test coverage and reliability.
- Partnered with cross-functional teams to define and implement best practices for testing, leading to early detection of critical defects.

Quality Assurance Engineer

AnTa Service, Minsk

December 2018 - May 2021

- Automated 60% of regression tests, reducing test cycles by 30% and enhancing product reliability.
- Optimized existing code by eliminating duplicates, achieving a 10% reduction in testing time and associated costs.
- Created and managed essential QA documentation, including Test Plans, Scenarios, and Cases, to enhance clarity and effectiveness in testing processes.
- Executed manual test scripts in Postman to verify and validate API responses from the database.
- Conducted backend testing using SQL queries to retrieve and verify data accuracy.
- Championed cross-functional collaboration, streamlining testing best practices and achieving a 25% improvement in defect detection during early development phases.

EDUCATION

Bachelor's Degree in Law, branch of BSEU "Minsk Trade College", Minsk, 2001

Volunteering

QA Engineer, Menzies Mission

May 2024 - Present

- Created key documents such as Test Scripts, Test Strategies, and Test Scenarios.
- Developed, updated, and executed comprehensive Test Cases.
- Conducted Manual Testing on Web Applications to ensure optimal functionality.
- Monitored and reported software defects using Flowlu, collaborating with developers to resolve technical issues efficiently.
