PROFESSIONAL SUMMARY

Quality Assurance Analyst with over 5 years of experience in quality assurance and testing. Specializes in close collaboration with cross-functional teams to ensure the successful implementation of quality control practices throughout the Software Development Life Cycle (SDLC).

Proficient in test automation with Selenium and Java, as well as manual and regression testing. Skilled in using tools like SQL, Jira, and Selenium for effective test execution and documentation. Known for strong communication skills and innovation in testing methodologies, with a focus on delivering high-quality results through thorough analysis and user acceptance testing.

SKILLS

- **API testing:** REST, SOAP, GraphQL, Postman, DevTools, Swagger, Charles Proxy, Kube Forwarder, Kibana, Kafka.
- **SQL:** Oracle, MongoDB, PostgreSQL, MySQL.
- **Automation Tools:** Java, Gradle, JUnit, Selenium, Cucumber, Git, Bash, Kubernetes, Docker, HTML, CSS.
- **Cloud Services:** AWS, Microsoft Azure.
- **CI/CD:** Jenkins, GitLab, GitHub, Drone.
- **OS:** Windows, Linux, macOS.
- **Methodologies:** Agile, Scrum, Waterfall.
- **TMS & Bug Tracking:** TestRail, Zephyr, Allure TestOps, Jira, Asana, Confluence.

EXPERIENCE

Quality Assurance Analyst

Rx2Go, New York, January 2024 - Present

Projects: Medical supplies, Logistic.

- Developed and executed test cases for the medical supply tracking system, identifying critical issues that were fixed before deployment, ensuring accurate tracking and timely delivery of essential supplies.
- Collaborated with cross-functional teams to perform comprehensive user acceptance testing (UAT) for logistics software, enhancing its performance and reducing operational errors by 12%.
- Designed and implemented automated test scripts for inventory management systems, resulting in a 20% reduction in manual testing time and improved overall efficiency.
- Performed compliance testing for medical supply distribution systems, ensuring all processes met regulatory standards and reducing audit-related issues by 15%.

Quality Assurance Analyst

Uzum Technologies, Remotely, May 2022 - January 2024

Projects: E-commerce, ERP system.

- Accomplished a 34% increase in photo studio throughput, as measured by the number of successfully processed images, by reducing AI error rates by 61% through targeted testing and quality assurance practices.
- Reduced customer support tickets by 30% in the e-commerce project through comprehensive manual testing of all microservices, ensuring a more stable release cycle.
- Accomplished a 25% reduction in regression testing time, as measured by automated test suite execution, by integrating Selenium-based test automation and refining test case selection based on risk analysis.
- Achieved a 50% improvement in compliance and documentation processes for e-commerce and ERP systems, as measured by internal audits, by establishing comprehensive test plans and detailed defect tracking in Jira.

Quality Assurance Analyst

Magnit, Remotely, June 2020 - April 2022

Projects: E-commerce, Logistic.

- Accomplished a 25% reduction in warehouse processing time for a marketplace project, as measured by order-to-delivery time, by implementing rigorous refining manual testing processes for the warehouse management system.
- Achieved a 30% reduction in data discrepancies within the logistic systems, as measured by internal database audits, by implementing detailed SQL-based tests and rigorous database validation processes.
- Achieved a 30% reduction in production defects for an E-commerce project, as measured by bug reports, by focusing on comprehensive quality assurance testing, including Selenium-based test automation and manual regression testing.

EDUCATION

Kazan State University, Master's degree.
