Redis

AWS

GCP

Docker

Kubernetes

PROFILE

Senior Full Stack Engineer with 9 years of experience delivering scalable, data-driven web platforms using Python technologies. Specialized in Django, Flask, and FastAPI, with advanced integration of AI systems into production environments. Skilled in machine learning model deployment, LLM API integration, and building user-centric web apps with React and Vue. Proven track record in leading cross-functional teams, optimizing backend performance, and delivering business-focused AI features.

EMPLOYMENT HISTORY

AI Engineer at Prezent

November 2023 — Present

- Built multi-tenant web platforms with Django and React, handling over 500k API calls per day.
- Integrated LLMs via OpenAI and Hugging Face APIs into backend workflows for analytics automation.
- Implemented CI/CD pipelines with GitHub Actions, Docker, and ECS for zero-downtime releases.
- Increased frontend performance by 43% by optimizing asset delivery and SSR rendering with Next.js.
- Established unit and E2E testing frameworks with PyTest and Playwright.

Full Stack Developer at Microsoft

February 2020 — September 2023

- Redesigned legacy web apps using Flask + React, enhancing performance and UX for 80k monthly users.
- Deployed serverless features on AWS Lambda and managed data pipelines using DynamoDB and S3.
- Built AI-based sentiment analysis dashboards for customer support using scikit-learn and spaCy.
- Created secure APIs for 3rd-party integrations and developed async background jobs using Celery + Redis.

Frontend Developer at Teladoc Health

March 2017 — December 2019

- Migrated large-scale frontends to React + TypeScript, boosting code maintainability by 65%.
- Developed real-time collaboration UI components for Dropbox Paper using WebSockets and Redux.
- Optimized bundle size and page load times, resulting in 38% faster navigation speeds.
- Collaborated with backend team to implement GraphQL APIs for document and user data services.

GitHub Actions

Terraform

PyTest

Postman

Swagger

Selenium

Sentry

Prometheus

ELK Stack

Python Developer at Wealthsimple

January 2016 — February 2017

- Developed internal CMS tools and dashboards using Django and jQuery.
- Wrote data scrapers and enrichment pipelines using BeautifulSoup and pandas.
- Integrated 3rd-party APIs (Stripe, Mailchimp) and deployed to Heroku/AWS EC2 instances.
- Built RESTful APIs for logistics systems and designed role-based admin dashboards.

EDUCATION

Bachelor' Degree of Science in Computer Science & IT, University of California,

August 2015
