RELEVANT EXPERIENCE

Apex Systems (Contracted with Fidelity, Kaiser Permanente)

Sep 2023 – Present

Software Engineer

Remote

- Delivered a POC in 7 weeks for an AI-driven customer support efficiency evaluation tool (Fidelity)
- Designed and implemented a high-performance API featuring SSO, search, filtering, sorting, pagination, and a scoring algorithm (Fidelity)
- Built a custom metrics service to diagnose and enhance database performance, achieving a 10x improvement in read latency (Fidelity)
- Enhanced SEO across multiple Kaiser Permanente public-facing career websites to drive site traffic
- Partnered with product and design teams to deliver features to specification
- *Technologies:* TypeScript, Angular, NestJS, PostgreSQL, Jest, AWS EC2, Azure AD OpenID Auth, NodeJS, Docker, Kubernetes, Helm, Swagger, DataDog

Ford Motor Company

Feb 2021 – Apr 2023

Full Stack Software Engineer

Remote

- Engineered RESTful APIs and intuitive user experiences on the Battery Electric Vehicle team
- Collaborated cross-functionally to coordinate feature development and integration across teams
- *Technologies:* VueJS, JavaScript, Kotlin, Spring Boot, SQL, Microsoft Azure, GCP, Docker, Kafka, Grafana
- *Principles:* CI/CD, Test Driven Development (TDD), Pair Programming

Randstad Technologies (Contracted with Nike)

Sep 2019 – Jan 2021

Back End Software Engineer

Beaverton, OR / Remote

- Developed and optimized high-traffic backend services for Nike's partner stores and point-of-sale systems
- Led backend development for Nike's SMS-based payment system in China, handling tens of millions in transactions annually
- Created a self-checkout payment backend for the Netherlands, driving millions in annual transactions
- *Technologies:* Java, NodeJS, Spring Boot, JUnit, Mocha, Micronaut, Docker, CucumberJS, AWS, Jenkins
- *Principles:* CI/CD, Infrastructure as Code (IaC), TDD, Behavioral Driven Development (BDD)

HP, Inc.

Jun 2018 – Aug 2019

Full Stack Software Engineer

Corvallis, OR

- Developed and refined internal support tools for HP's PageWide Web Press division
- Led design for a web/telephony app supporting on-call engineers and real-time data display for stakeholders
- *Technologies:* Angular, TypeScript, Java, Spring Boot, Oracle, PL/SQL, AWS Connect, Lambda, DynamoDB

EDUCATION

Oregon State University

Sep 2018

Bachelor of Science - Computer Science with a focus in Human Computer Interaction

Corvallis, OR

SKILLS & PASSIONS

Skills: Teamwork, written and interpersonal communication, leadership, growth mindset, punctuality, keen attention to detail, reliability, persistence, clean code, full stack development, TypeScript, Angular, Vue, Java, Node, JavaScript, Spring Boot, Kotlin, NestJS, Go, Python, Git, Redis, MySQL, PostgreSQL, k8s, AWS, GCP, Azure, TDD, BDD

Passions: Full stack development, exceptional user experiences, clean code, clean architecture, music, ping-pong, billiards, strength training, camping, hiking, traveling, snowboarding, donating blood, real estate, and investing
