SUMMARY

Backend-focused full-stack developer with 20+ years of advanced software development and systems problem solving experience. Proven expertise in building scalable APIs and automation workflows using Python, FastAPI, and SQL while adapting to evolving customer needs. Experienced in agile collaboration and mentoring less experienced engineers to deliver high-quality, data-driven solutions remotely.

TECHNICAL SKILLS

- **Languages & Frameworks:** Python, Java, FastAPI, SQLAlchemy
- **Frontend Tools:** HTML, CSS, JavaScript, Angular, React
- **Backend Tools:** FastAPI, SQLAlchemy, REST APIs, Pytest, Nodejs
- **Data & Modeling:** SQL, Excel, MATLAB
- **Dev Tools:** Git, Jupyter, VS Code
- **Platforms:** Webex, MyMathLab

PROFESSIONAL EXPERIENCE

Palm Coast Publishing, Inc.

Jun 2021 - Present

Python/SQL/Full Stack Developer

Jacksonville, FL

- Engineered modular RESTful APIs using FastAPI that effectively interfaced with front-end frameworks such as Angular and React, reducing data retrieval time by 40%
- Designed and deployed Python automation pipelines processing over 100K rows/month, cutting manual data preparation by 60%
- Refactored legacy Excel datasets into normalized SQL schemas, improving query speed by 3x and enabling seamless integration with reporting tools
- Collaborated with cross-functional teams and instructional designers to refine product requirements and ensure user stories were developer-ready, reducing support requests by 30%
- Directed iterative testing and debugging cycles that maintained 95% uptime across backend services and incorporated agile feedback for continuous improvement

Florida State College at Jacksonville

Aug 2004 - Present

Professor of Mathematics

Jacksonville, FL

Delivered mathematics instruction while integrating innovative flipped-classroom models that led to a 45% increase in pass rates

- Redesigned 10+ course shells to integrate data tools, enhancing instructional delivery and student engagement
- Presented original algorithms at two statewide MAA meetings (2023, 2025), demonstrating complex problem-solving and technical acumen
- Mentored 10+ faculty members in effective use of modern collaboration tools such as Webex and MyMathLab, and actively participated in hiring and textbook committees

Princess Cruises

2001 - 2003

Cruise Ship Pianist

- Performed nightly sets across international itineraries, adapting to diverse audiences and high-pressure performance environments
- Developed improvisational fluency and collaborative instincts—skills later applied to technical problem-solving and cross-functional engineering work
- Used downtime to reflect and prepare for a return to academia and backend development

Art Technology Group (ATG)

2000 - 2001

Customer Support Engineer

Cambridge, MA

- Supported enterprise e-commerce clients during ATG's hypergrowth phase, resolving 100+ platform issues across dynamic content and personalization engines
- Collaborated with engineering and product teams to triage bugs, improve documentation, and deliver client-facing solutions under tight deadlines
- Gained firsthand exposure to startup volatility, equity structures, and founder-led decision-making during ATG's peak valuation period
- Contributed to international deployments, including a 7-week client engagement in Sydney, Australia

Comverse Network Systems

2000 - 2000

Technical Support Engineer

Technical Support Engineer, Comverse Network Systems

- Resolved 100+ software issues across voicemail platforms for 10+ telecom clients; promoted to team lead within 1 year

Computer Sciences Corporation

2000 - 2000

Software Engineer

- Repaired 20+ bugs; enhanced geospatial software accuracy; documented network tools

EDUCATION

Virginia Polytechnic Institute and State University

Master of Science, Mathematics

North Carolina State University

Bachelor of Science, Computer Science and Mathematics

PROJECTS

Real Estate Hub — Full-Stack Web Application

- Full-stack property search platform with FastAPI and SQLAlchemy, featuring dynamic housing data ingestion and modular backend architecture.

Image Alchemist – Interactive GUI for modifying grayscale images

- Python-based GUI and FastAPI backend for grayscale image enhancement and OCR, with cloud storage integration in progress.
