

PROFESSIONAL SUMMARY:

- 7 years of experience in Database Design, Development, Implementation, and Tuning of Relational Database Systems using MS-SQL Server 2012/2014/2016/2017/2019.
- Experienced in managing SQL Server and writing T-SQL (DDL, DML and TCL) statements; and in creating and maintaining SQL Server database objects such as Tables, Views, Stored Procedures, User Defined Functions, Triggers, Indexes, and Cursors.
- Experienced in optimization and performance tuning.
- Skilled in using table variables and Common Table Expressions (CTEs).
- Expertise in developing complex SQL queries and performed optimization of databases and tuning of long running SQL Queries by using SQL Server Native tools.
- Experience in Extraction, Transformation and Loading (ETL) tools, including SQL Server Integration Services (SSIS), Data Transformation Services (DTS), ETL package design, and RDBM systems.
- Experienced in designing SSIS packages for different Data Flow and Control Flow processes.
- Skilled in designing and implementing data warehouses and data marts using components of Kimball Methodology, like Conformed Facts & Dimensions, Slowly Changing Dimensions, Surrogate Keys, Star Schema, and Snowflake Schema.
- Well experienced in providing Logging, Error handling by using Event Handler, and Custom Logging for SSIS Packages.
- Generated various Drill-Down Drill-Through reports, Parameterized reports, Tabular reports, and Matrix reports using SQL Server Reporting Services (SSRS).
- Managing and securing reports using SSRS. Created report schedules.
- Experienced in developing Business Intelligence (BI) solutions for Decision Support Systems using SSIS, SSRS, SSAS, and Power BI.
- Expertise in Data Modeling using SSMS, Erwin.
- Worked with stakeholders and end users to meet business requirements and experienced in the proper documentation of records.
- Experienced in developing and maintaining data warehouse's functionality; and developed multi-dimensional objects and Cubes using SQL Server Analysis Services (SSAS).
- Experienced with working on Agile Projects with multiple Sprints Cycles and Scrum meetings, and on Water Fall projects with full Software (System) Development Life Cycle
- Strong interpersonal and communication skills; competitive analytical, logical, and problem-solving skills; strong management, administrative and leadership skills; and active and self-learning abilities.
- Detail oriented, working under pressure, and meeting short deadlines with exceptional problem solving and decision-making analytical skills and strong teamwork spirit.

TECHNICAL SKILLS:

- DBMS/RDBMS: MS-SQL Server (2017/2016/2014/2012/2008)
- ETL Tools: SQL Server Data Tools (SSDT), SQL Server Integration Services (SSIS), Data Transformation Services (DTS) and T-SQL
- Reporting Tools: SQL Server Reporting Services (SSRS), Power BI
- Programming Languages: T-SQL, PL/SQL
- Tools: Microsoft SQL Server Management Studio, Visual Studio.
- Operating Systems: Windows Server 201/2008/2012R2.
- Office Tools: MS word, MS Excel, PowerPoint, Outlook and Visio.

PROFESSIONAL EXPERIENCE:

SQL/ETL Developer

Truist Financials

03/ 2021- Present

Responsibilities:

- Involved in all the phases of the project e.g., requirement gathering, analyzing, design, development, validations, and deployment.
- Designed and normalized the database and created different objects like Tables, Views Stored Procedures, UDFs, Indexes Rules and defaults on MS SQL Server.
- Designed and implemented data access stored procedures and triggers for automating tasks.
- Adhered to best practices in creating a complete schema including tables, relationships, stored procedures, views, clustered, non-clustered indexes and import of data using SSIS packages.
- Created documentation on the tables, stored procedures, views and user defined functions and hands on exposure on Normalization & De-normalization of databases.
- Performed Data Analysis and Data Profiling using SSIS Data Profiling Task, SQL Queries and Excel on large volume of data.
- Worked on updating slowly running stored procedure with Query optimization techniques.
- Created Database Maintenance Planner for the Performance of SQL Server, which covers Database Integrity Checks, Update Database Statistics and Re-indexing.
- Research with team members and came up with the high-level design, impact analysis document with several solutions to the problem during implementation proposed new system.
- Developed several SSIS packages to import Flat files CSV into data tables. These packages were scheduled in regular time intervals.
- Applied various data transformations like Lookup, Sort, Multicasting, Conditional Split, Derived column etcetera.
- Used Sequence Container, Execute SQL Task, Send Mail Task, Precedence Constraint, Script Task to achieve business requirement in the control flow.
- Built master and child packages, using Execute Package Task in SSIS control flow.
- Designed and developed ETL packages using SQL Server Integration Services (SSIS) 2012 to load the data from different source systems (SQL Server, Oracle, flat files, csv files).
- Configured SQL mail agent for sending automatic emails when a SSIS package fails or succeeds.
- Used SQL Profiler for troubleshooting, monitoring, optimization of SQL Server and non-production database code as well as T-SQL code from developer and QA environments.
- Scripted SQL Server Agent jobs to schedule execution of SSIS ETL packages and cube processing packages.
- Developed different kinds of reports per requirement using SSRS reporting functionality.
- Reviewed, analyzed, and implemented necessary changes in appropriate areas to enhance and improve existing systems.
- Designed, developed and tested various Power BI and Tableau visualizations for dashboard and ad-hoc reporting solutions by connecting from different data sources and databases.
- As a Power BI and Tableau SME responsible for the design, development and production support of interactive data visualizations used across the company.

Environment: SQL Server Management Studio, Confidential Visual Studio, MS BIDS, SQL Server 2012 Data Tools, SSRS, SSIS, SSAS, MS Excel, MS SQL Server Integration Services SSIS, Team Foundation Server, SQL Profiler, Windows 2012 Advanced Server, Oracle

Database Developer

Advanced Drainage Systems

01/2018 – 02/2021

Responsibilities:

- Requirements gathering, Analysis and Design of all the client requirements.
- Performed Data Modelling and Developed logical and physical model using Erwin and implementing them to SQL server.

- Wrote custom T-SQL stored procedures and triggers to improve performance, preserve referential integrity, and provide additional application functionality.
- Created SSIS packages using various data transformations like fuzzy lookup, derived column transformation etc. to migrate the old Bills information, Customer Information, Contracts Information and other important data.
- Used Crystal Reports to track logins, mouse overs, click-through, session durations and demographic comparisons with SQL database of customer information.
- Used SSIS to upload amortization schedules sent by the client in CSV format on the staging tables, which were used for doing all the calculations. Then the data was moved to the core tables and the staging tables were deleted.
- Designed, coded and implemented ad hoc reports using existing report models in SSRS.
- Identified the Data Source and defined them to build the Data Source Views.
- Generated matrix reports, drill down, drill through, sub reports, chart reports, multi parameterized reports using Variables, Expressions and Functions for the reports.
- Managed Alerts for successful or unsuccessful completion of scheduled Jobs.
- Used Crystal Reports to track successful/unsuccessful sent emails, emails that were read, click-through and demographic comparisons with SQL database of customer information.
- Performed Index analysis for tables and came up with more efficient solutions to use Clustered and Non-Clustered Indexes for significant performance boost.
- Optimized SQL queries and stored procedures using SQL Profiler and Index Tuning Wizard.
- Involved in testing, bug fixing and documentation for the project.
- Generated test data and tested database to meet the functionalities deliverables in the project documentation and specifications.
- Developed incremental loading using MERGE statement in SQL server 2008R2.
- Improved Performance by creating Clustered and Non clustered Indexes and by Optimizing the T-SQL statements using SQL profiler.
- Used Execution Plan and Database Engine Tuning Advisor to optimize queries and enhance the performance of databases.

Environment: MS SQL Server 2012/2014, MS Visual Studio 2012/2014 (SSIS/SSRS), Power BI, Microsoft Excel, Outlook, MS SQL Profiler, Windows Server 2008/2012.

Education

Bachelor's degree
