EXPERIENCE

XCentium, remote — Sr. SFCC Developer

February 2023 - Present

I was responsible for designing and overseeing the implementation of complex e-commerce solutions. My role involved architecting scalable and robust Salesforce Commerce Cloud systems, leading technical strategy, and ensuring the alignment of project objectives with business goals. I collaborated with clients and development teams to deliver innovative solutions that enhanced system performance and supported business growth.

Alpenite, remote — Sr. SFCC Developer

April 2020 - February 2023

I specialized in developing and implementing Salesforce Commerce Cloud solutions. My responsibilities included crafting customized e-commerce experiences, integrating various third-party services, and optimizing system performance to meet client needs. This role allowed me to deepen my expertise in SFCC and collaborate with cross-functional teams to deliver high-quality solutions that drove business growth.

Tryzens, remote — Sr. SFCC Developer

October 2017 - March 2020

My role involved designing and implementing scalable e-commerce platforms, enhancing system performance, and providing technical guidance to ensure successful project delivery.

EDUCATION

University of Engineering & Technology, Computer Science

MONTH 2003 - MONTH 2008

I hold a Bachelor of Science (Hons) in Computer Science from the University of Engineering and Technology. My coursework included Data Structures, Object-Oriented Programming in Java, MySQL database management, and the Theory of Automata. This education provided a solid foundation in software development and computational theory, equipping me with practical skills to tackle various challenges in the tech industry.

SKILLS

- SFCC
 - Pipelines
 - Controllers
 - SFRA
 - PWA
- SF Marketing Cloud
- Magento
- JavaScript
- Scrum Master
- PHP
- MySQL

Proficient in English

PROJECTS

Vineyard Vines — <https://www.vineyardvines.com/>

Platform: SFCC [Pipelines, Controllers & PWA Kit]

Responsibilities:

- Lead requirements analysis, technical/functional specs, and architectural planning for SFCC projects, ensuring alignment with client goals.
- Oversee development and optimization of SFCC modules across multiple sites, maintaining high standards and consistency.
- Manage end-to-end deployment from development to production, ensuring seamless and reliable rollouts.
- Facilitate third-party integrations, conduct project analysis, and provide accurate estimations for new initiatives.
- Guide onboarding and training for new technical team members, fostering skill development and project readiness.

Lighting New York — <https://lightingnewyork.com/>

Platform: SFRA

Responsibilities:

- Develop and customize SFCC modules using SFRA, ISML, JavaScript, and SCSS for responsive e-commerce solutions.
- Implement third-party integrations with OCAPI and SCAPI, including payments, CRM, and inventory systems.
- Optimize site performance through caching, content slots, and best practices to enhance user experience.
- Manage data imports/exports and support pipeline-to-controller migration for better site architecture.
- Troubleshoot, debug, and deploy code efficiently using version control and deployment processes.

Stitch & Tie — <https://stitchandtie.com/>

Platform: SFRA

Responsibilities:

- Build and tailor SFCC modules with SFRA, ISML, and JavaScript for high-performing, responsive e-commerce features.
- Integrate third-party systems via OCAPI/SCAPI, covering payment, CRM, and inventory functions.
- Enhance site speed and user experience through optimized caching and content configuration.
- Oversee data flows and streamline pipeline-to-controller migrations for improved structure.
- Resolve issues and manage seamless code deployment with version control practices.

3rd Party Integrations

- Cybersource
 - Credit Card
 - ApplePay
- Braintree
 - Credit Card
 - PayPal
 - ApplePay
- Adyen
 - ApplePay
- AmazonPay
- BorderFree
- GiveX
- Avalara
- B2B Implementation
- SF Marketing Cloud
- Manhattan OMS
- AfterPay
- AmazonPay
- Affirm

Golden Goose — <https://www.goldengoose.com/ww/en>

Platform: SFRA

Responsibilities:

- Develop and customize SFCC modules using SFRA, ISML, JavaScript, and SCSS for responsive e-commerce solutions.
- Implement third-party integrations with OCAPI and SCAPI, including payments, CRM, and inventory systems.
- Optimize site performance through caching, content slots, and best practices to enhance user experience.
- Manage data imports/exports and support pipeline-to-controller migration for better site architecture.
- Troubleshoot, debug, and deploy code efficiently using version control and deployment processes.

Christopher Ward — <https://www.christopherward.com/>

Platform: SFRA

Responsibilities:

- Develop and customize SFCC modules using SFRA, ISML, JavaScript, and SCSS for responsive e-commerce solutions.
- Implement third-party integrations with OCAPI and SCAPI, including payments, CRM, and inventory systems.
- Optimize site performance through caching, content slots, and best practices to enhance user experience.
- Manage data imports/exports and support pipeline-to-controller migration for better site architecture.
- Troubleshoot, debug, and deploy code efficiently using version control and deployment processes.

Caffe Borbone — <https://www.caffeborbone.com/gb/en/>

Platform: SFRA

Responsibilities:

- Develop and customize SFCC modules using SFRA, ISML, JavaScript, and SCSS for responsive e-commerce solutions.
- Implement third-party integrations with OCAPI and SCAPI, including payments, CRM, and inventory systems.
- Optimize site performance through caching, content slots, and best practices to enhance user experience.
- Manage data imports/exports and support pipeline-to-controller migration for better site architecture.
- Troubleshoot, debug, and deploy code efficiently using version control and deployment processes.
