

Amna Batool

Houston, Texas

(347) 475-2982 | Amnabatool0212@gmail.com

Summary

Passionate Computer Science graduate with a solid background in Quality Assurance, eager to apply my skills in programming, web development, and software testing. With the ability to manage projects independently by running a successful online business, while gaining hands-on experience in data analysis, software development, and machine learning. Diverse experiences in both retail and tech environments have sharpened my teamwork, leadership, and problem-solving skills. Excited to bring technical expertise and analytical mindset to a dynamic professional setting.

Education

University of Houston

Bachelor of Information Systems: Overall GPA 4.0 Summa Cum Laude

Houston, Texas

Completed: August 2025

Work Experience

SAT Accounting and Consulting LLC

Quality Assurance Intern

Easton, Pennsylvania

Jul 2024 – Jul 2025

- Proficiency in writing and executing SQL queries to verify data integrity and consistency while writing queries containing Select, Insert, Create, Update, Group By, Inner Join, Outer Join, Left Join, Right Join, and Union
- Used Postman to test APIs by sending requests such as GET, PUT, POST, and DELETE, and found 50+ bugs by analyzing the responses for status codes and body content
- Performed mobile browser and mobile app testing on both Android and iOS devices while using simulators such as Sauce Labs, Android Studio and XCode
- Used JMeter and LoadRunner to evaluate a web application's performance, measuring the load, speed, and reliability which increased the applications efficiency by 20%
- Utilized data visualization tools such as Tableau, Microsoft PowerBI to present data directly to partners
- Conducted Performance testing such as Load testing and Stress testing by using IBM Rational to ensure the program can handle large amounts of users during tax busy season
- Pulled logs for user actions and analyzed them based on the Response Type using Charles Proxy
- Performed cross-browser and cross-device testing to ensure consistent functionality across various platforms and devices

Accenture

Developer Program

New York, New York

Aug 2023 – Dec 2023

- Conducted comprehensive unit testing and user acceptance testing (UAT) to validate software functionality and meet client requirements
- Wrote, debugged, and optimized Java and Python code for client projects, ensuring efficient performance and accuracy
- Developed a machine learning algorithm to predict future trends based on historical data, improving client decision-making
- Worked with clients to assess security maturity levels using the NIST cybersecurity framework, providing strategic recommendations for improvement
- Assisted in deploying applications in cloud environments, ensuring scalability and high availability
- Participated in agile team meetings to discuss project progress, challenges, and solutions, enhancing overall project collaboration and efficiency

JP Morgan Chase

Virtual Software Engineering Experience

New York, New York

Jan 2023 – Aug 2023

- Interfaced with real-time stock price data feeds and built systems for data analysis using Python
- Used proprietary JPMorgan Chase frameworks to implement perspective open-source code, enabling traders to visualize stock data
- Developed interactive charts and dashboards to display stock price trends, helping traders make informed decisions
- Conducted performance analysis of the data feed system to ensure real-time, error-free data streaming
- Collaborated with a team of engineers and data scientists to integrate visualization tools into the trading platform
- Gained insights into financial market behavior and the impact of real-time data analysis on trading decisions

Skills, Activities, & Interests

Languages: Fluent in English, Hindi, & Urdu; Conversational Proficiency in Spanish
