SUMMARY

- Experienced IT Professional with a 10-year career focused on data. Expertise in data privatization, database development, and data analysis across large institutions and startups.
- Earned MCSA SQL2016 Database Development certification and two IIBA business analysis certifications.
- Excels in project management, leveraging both technical skills and business knowledge to bridge communication gaps and turn underutilized data into high impact insights.

PROFESSIONAL EXPERIENCE

Bealls Inc.

Bradenton, FL

April 2022 - January 2025

Application Administrator / Business Data Analyst

- Managed new PLM and PIM projects; gathered and validated requirements, analyzed risks to develop mitigation strategies, developed timelines and budgets, presented solution proposals to leadership, developed SOPs.
- Managed a new project implementation including RFP, vendor selection, ROI analysis and training support.
- Organized testing after system updates, handled user access and permissions, worked with end users to develop reports
- Created data visualizations for business and technical teams using Excel, SmartSheets, LucidCharts, and Miro.
- Led a team of 6 developers. Reviewed timesheets, delegated work, and managed performance expectations.

Webstaurantstore

Tampa, FL

January 2019 – March 2022

Database Developer

- Optimized existing procedures for consistency, performance, and scalability.
- Analyzed transactional sales and shipping data to find trends, inconsistencies, and areas of potential business improvement.
- Lead developer on a new HR tool that required precise security and privatization requirements.
- Worked with Product Owners and business leaders to translate business rules into functional and non-functional requirements.
- Created and maintained automation jobs.
- Analyzed large data sets to provide one-time reports on sales trends and fraud risks.
- Performed as data lead and project manager on multiple simultaneous projects and trained new employees.
- Gathered requirements, created appropriate work items, and designed data modeling diagrams for new projects.

Electronic Data, Inc.

St. Petersburg, FL

January 2017 – October 2018

Data Analyst / ETL Developer

- Sole database developer on the creation and operation of a custom ETL process in Oracle. This automation replaced the manual, Excel-based system in place allowing the company to take on more and larger clients.
 - Extracts from a variety of existing client systems could be loaded into flexible staging tables. Minimizing the amount of prep work needed to standardize the data before a project began.
 - A variety of data cleansing and modification steps would categorize and iterate the data into a loadable format to be used during an IBM Maximo implementation.
 - This process leveraged error handling, reports and data import processes to allow non-technical users switch between the automated process and traditional manual methods for unique situations
- Met directly with external clients to gather requirements, verify technical details, and suggest process improvements.

Raymond James Financial

St. Petersburg, FL

May 2014 – December 2016

Database Administrator / Data Security Analyst

- Performed standard administration tasks such as data maintenance, access control, and troubleshooting.
- Monitored and documented data flows in SSIS and SSMS replication.
- Worked on data classification and privatization of sensitive data.
- Developed RegEx patterns to identify sensitive data that was used to secure PII data found on non-prod environments across several database platforms.
- Evaluated new data privatization programs for vendor selection advice. Through this evaluation gained exposure to IBM's InfoSphere Optim & Information Analyzer and Informatica's Secure@Source, TDM, and PowerCenter tools.

CERTIFICATIONS

CBDA – Certification in Business Data Analytics from IIBA, May 2024

ECBA – Entry Certificate in Business Analysis from IIBA, November 2022
