Location: Plano, TX

Skills

Languages: Swift, Objective-C, Dart

Technologies & Tools: SwiftUI, UIKit, Combine, ClockKit, WatchKit, WidgetKit, Charts, WCSSession, SwiftData, Flutter, Firebase, Android SDK, iOS SDK, POS Terminal, Stripe

Work Experience

GlobalLogic (Medical Project, US), Ukraine

iOS / watchOS Developer

August 2021 – December 2024

- Developed Apple Watch applications with focus on UI design, complications, and notifications to improve user engagement.
- Optimized application performance using multithreading for faster startup times and improved stability.
- Migrated complications to WidgetKit, enhancing functionality and modernizing the app.
- Rewrote UI for two projects using SwiftUI, significantly improving performance and maintainability.
- Integrated watchOS components into Flutter-based projects for seamless cross-platform functionality.
- Independently managed critical workflows and supported Apple Watch functionalities during the team lead's absence.

Innovations TH, Ukraine

Junior iOS Developer

February 2021 – March 2021

- Improved UI/UX by creating visually appealing and consistent designs across the app.
- Fixed minor UI bugs, optimizing app performance and improving responsiveness.
- Strengthened skills in UIKit and Swift, building a solid foundation for future iOS development.

Education

National Technical University of Ukraine "Igor Sikorsky Kyiv Polytechnic Institute"

Master's Degree in Materials Science

2015 – 2020

- Specialized in advanced material properties, developing strong analytical and research skills.

Personal Projects

App Store Projects

Published Apps: Chat Bot - AI Assisted Writer, Gift Helper

2024

- Strengthened expertise in SwiftData, API integration, and Swift concurrency for efficient, data-driven iOS applications.
- **Chat Bot - AI Assisted Writer:** An AI-driven writing assistant exploring advanced Swift-based frameworks. [App Store Link](#)
- **Gift Helper:** An app for organized gift planning, focusing on data management and user experience. [App Store Link](#)
