

Anesh Reddy

Software Developer

Arlington, TX | +1(682) 313-2175 | aneshreddy7893@gmail.com | [LinkedIn](#)

Summary

- Results-driven Software Developer with 4+ years of experience in designing cloud-native, high-performance applications using Java, Spring Boot, and Microservices.
- Expertise in distributed systems, API Gateway (AWS/Kong), Spring Cloud (Eureka, Feign, Hystrix), and caching with Redis. Proficient in event-driven architectures using Kafka Streams and RabbitMQ.
- Hands-on experience with CI/CD automation (Jenkins, GitHub Actions, ArgoCD) and container orchestration (Kubernetes, Helm, Terraform) across AWS & Azure.
- Extensive experience developing enterprise-level applications with J2EE (JSP, Servlets, EJB, JPA, JMS), leveraging REST & SOAP Web Services (JAX-RS, JAX-WS) for scalable backend processing.
- Skilled in developing interactive web apps with React.js and Angular, ensuring seamless UI and backend integration
- Strong background in API security (OAuth2, OpenID Connect, SAML) and system observability using ELK Stack and Prometheus.
- Skilled in Agile (Scrum/Kanban), problem-solving, and mentoring developers to drive innovation and high-quality software solutions.
- Adept at unit testing and integration testing using JUnit, Mockito, and Postman, ensuring application reliability and maintainability.

Skills

Methodologies:	SDLC, Agile (Scrum, Kanban), Test-Driven Development (TDD), Behavior-Driven Development (BDD)
Programming Languages:	C, C++, C#, Java 11+, Java Streams API, Python, JavaScript, TypeScript, SQL
Frameworks & Technologies:	Spring Boot, Spring Cloud (Eureka, Feign, Hystrix, Config), Hibernate, Multithreading, Kafka Streams, RabbitMQ, GraphQL, RESTful APIs
Web & Frontend:	React.js, Angular, Redux, Next.js, HTML, CSS, Bootstrap, Material UI, WebSockets
Backend & Microservices:	Java Microservices, Spring Boot, Node.js (Express), .NET Core (C#), API Security (OAuth2, JWT, SAML), API Rate Limiting & Throttling, Distributed Systems & Microservices
Cloud & Deployment:	Cloud-Native Architecture & Serverless Computing (AWS Lambda, Azure Functions), AWS (EC2, S3, RDS, Lambda, API Gateway, CloudFormation), Azure (App Services, DevOps), Kubernetes, Docker, Helm, Terraform, ArgoCD
Databases:	PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch
DevOps & CI/CD:	Git, GitHub Actions, Jenkins, Maven, Gradle, GitLab, ArgoCD, Spinnaker
Testing & Tools:	JUnit, Mockito, Cypress, Selenium, Prometheus, Grafana, ELK Stack

Experience

Clairvoyant, USA | Software Developer

Jan 2024 – Present

- Designed and developed real-time event-driven microservices using Spring Boot, Apache Kafka, and RabbitMQ, improving message processing efficiency by 40%.
- Designed AWS cloud-native architecture using EC2, S3, RDS, Lambda, and API Gateway, reducing infrastructure costs by 25% and improving system uptime by 40%. Optimized caching with Redis and implemented Helm charts for Kubernetes deployment.
- Built optimized RESTful and GraphQL APIs using Spring Boot and Spring Cloud, integrating third-party services via API Gateway (AWS/Kong). Improved API response times by 40% using Redis caching and async processing with Kafka Streams.
- Developed dynamic, high-performance UI components using Angular and React, reducing page load times by 35% and enhancing user experience through optimized rendering and state management.
- Automated CI/CD pipelines with Jenkins, Docker, and Kubernetes, reducing deployment time by 50% and increasing release frequency by 30%, ensuring faster feature rollouts and minimal downtime.
- Enhanced application security by implementing OAuth2 with OpenID Connect and SAML-based authentication, achieving 40% better access control and regulatory compliance.
- Managed version control using Git, GitHub, and Maven for seamless collaboration while optimizing MySQL and MongoDB queries, reducing execution time by 30% and enhancing performance.

- Implemented distributed logging and monitoring using ELK Stack (Elasticsearch, Logstash, Kibana) and Prometheus, improving system observability and reducing debugging time by 50%.
- Implemented AWS SQS and SNS for asynchronous messaging in microservices, improving event-driven communication efficiency by 30% and enhancing system scalability.
- Designed and implemented a high-performance data processing system using Python, Node.js, and MySQL, optimizing data retrieval by 35% and improving operational efficiency by 50% through automation and streamlined workflows.
- Enhanced REST and SOAP web services using JAX-WS, Apache CXF, and JAXB, ensuring backward compatibility with legacy systems while improving API performance.
- Collaborated closely with cross-functional teams, aligning frontend and backend integration, ensuring a seamless user experience, and enhancing application performance and security.

Plaxonic Technologies, India | Software Developer

Jul 2021 - Dec 2022

- Led Agile transformations, implementing Scrum methodologies to drive iterative development cycles, increasing project delivery speed by 30% and improving adaptability to changing client requirements.
- Engineered and deployed a robust data pipeline between multiple database servers using Java, Spring Boot, and Hibernate, improving data synchronization and reducing retrieval time by 25%.
- Designed and developed scalable, high-performance web applications using Spring MVC, Servlets, JSP, and JDBC, achieving a 35% increase in system reliability and efficiency.
- Designed and developed intuitive user interfaces with ASP.NET and VB.Net, enhancing application usability and streamlining workflows, leading to a 20% improvement in user satisfaction.
- Designed and deployed fault-tolerant microservices with Spring Boot and Spring Cloud (Eureka, Feign, Hystrix, Config), reducing system failures by 30% and improving service resilience.
- Deployed applications on Azure using DevOps and App Services, reducing deployment times by 40%.
- Optimized SQL queries and database schema restructuring in MySQL and PostgreSQL, cutting query execution time by 35%, enhancing application performance, and reducing response times by 25%.
- Leveraged AWS IAM (Identity & Access Management) to enforce role-based access control, enhancing cloud application security and compliance with enterprise security policies.
- Worked with cross-functional teams to refine product requirements, resulting in a 20% increase in customer satisfaction.
- Refactored JSPs and Action Servlets within a Struts-based MVC architecture, improving maintainability and separation of concerns, leading to a 20% reduction in technical debt and faster development cycles.

ACL Digital, India | Software Developer

Aug 2019 – July 2021

- Engineered a highly scalable microservices architecture using Spring Boot and Docker, enhancing system scalability by 40% and reducing infrastructure costs by 25% through efficient resource allocation and containerization.
- Developed dynamic front-end applications with React.js, Vue.js, and Angular, improving user engagement and enhancing the user experience by 30% through optimized UI/UX design and responsiveness.
- Incorporated AWS services such as EC2, S3, Lambda, and CloudWatch for scalable application deployment and proactive monitoring, ensuring high availability and performance.
- Spearheaded the CI/CD pipeline development with Jenkins, Docker, and Kubernetes, reducing release cycles by 50%, accelerating the software development lifecycle, and improving deployment automation.
- Led the migration of legacy systems to cloud-based solutions (AWS & Azure), increasing performance by 25% and reducing infrastructure overhead.
- Integrated GraphQL and RESTful APIs for efficient data fetching, optimizing network requests by 20% and improving application performance and load times.
- Migrated SOAP services to RESTful microservices with Spring Boot and GraphQL, reducing latency by 30%.
- Reviewed code, mentored juniors, and improved productivity by 30% while ensuring quality development.
- Automated testing processes using JUnit and Jenkins, achieving 95% test coverage and significantly reducing production defects.

Education

Master of Science in Computer Science

The University of Texas at Arlington, Arlington, Texas

Bachelor of Technology in Information Technology

VNR VJIET, Hyderabad, India
