

ANIKET KSHIRSAGAR

FULL STACK DEVELOPER

New Jersey, USA | kshirsagaraniket.work@gmail.com | +1 (929)-483-5576 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY:

Experienced Full Stack Developer with around 5+ years of expertise in building secure, scalable and high-performance applications across Banking, Finance, Retail and Ecommerce domains. Proficient in frontend technologies like React, Angular and Vue.js and backend frameworks including Java Spring Boot, Python Django, Node.js and PHP Laravel. Skilled in designing robust databases (Oracle, PostgreSQL, MySQL), implementing CI/CD pipelines (Jenkins, GitHub Actions) and leveraging cloud and big data tools such as AWS, Kafka and Hadoop. Strong focus on security and compliance standards like OAuth2, PCI-DSS, GDPR, Basel III and AML. Adept at collaborating with cross-functional teams to deliver innovative solutions aligned with business goals.

TECHNICAL SKILLS:

Frontend:

React, Angular, Vue.js, HTML5, CSS3, JavaScript, Bootstrap

Backend:

Java (Spring Boot), Python (Django/Flask), Node.js, .NET, PHP (Laravel), Ruby on Rails

Database:

Oracle, PostgreSQL, MySQL, MongoDB, Redis

DevOps & CI/CD:

Jenkins, Git, Docker, Kubernetes, GitHub Actions, Maven

Cloud & Big Data:

AWS (S3, Lambda), Azure, GCP, Firebase, Hadoop, Kafka

Security & Compliance:

OAuth2, JWT, SSL/TLS, PCI-DSS, GDPR, KYC, AML, Basel III, IFRS 9

BI & Analytics:

Power BI, Tableau, Excel, Google Analytics, Mixpanel, ELK Stack

Monitoring Tools:

Prometheus, Grafana

Payment & Platforms:

Stripe, PayPal API, Shopify, Magento, WooCommerce, BigCommerce

PROFESSIONAL EXPERIENCE:

Full Stack Developer | State Street- NJ, USA

Sep 2024 -Present

- Develop secure and robust frontend applications using Angular to create intuitive banking interfaces for online banking, loan processing and wealth management.
- Architect backend services using Java (Spring Boot) and Python (Django/Flask) frameworks, improving transaction processing efficiency by 45% and reducing latency for critical financial operations.
- Design and maintain relational databases like Oracle and PostgreSQL, optimizing queries to achieve ~35% faster data retrieval and ensuring full ACID compliance.
- Implement stringent security protocols including OAuth2, JWT for authentication and authorization and enforce PCI-DSS, Basel III, GDPR and IFRS 9 regulatory compliance.
- Integrate external APIs and payment processing systems such as Stripe and PayPal API with banking applications while maintaining compliance.
- Utilize Kafka and Hadoop for real-time data streaming and big data analytics to monitor financial transactions and detect anomalies.
- Automate build and deployment processes using Jenkins, Docker and Kubernetes ensuring continuous integration and delivery with zero downtime.
- Used Tableau and ELK Stack for advanced financial reporting, dashboards and audit trails.
- Implement SSL/TLS protocols to secure data in transit and use encryption standards for sensitive customer information.
- Collaborate with compliance, risk management and cybersecurity teams to embed KYC (Know Your Customer) and AML (Anti-Money Laundering) checks into workflows.
- Monitor system performance and security posture through Prometheus and Grafana dashboards to proactively address issues.
- Participate in code reviews, unit testing and security audits to maintain high code quality and regulatory standards adherence.

Full Stack Developer | Capgemini - India

Aug 2019 – Aug 2023

- Develop and maintain responsive frontend applications using React, Vue.js, HTML5, CSS3 and Bootstrap to ensure seamless user experience across devices.
- Build scalable backend services with Node.js and PHP (Laravel), contributing to 40% performance improvement in product catalog and order management systems.

- Design and optimize databases using MySQL, PostgreSQL, or MongoDB, resulting in 30% faster query response times and improved data integrity across large product datasets.
- Integrate and manage payment gateways such as Stripe, PayPal API and e-commerce platforms like Shopify, Magento and WooCommerce to enable secure transactions.
- Implement RESTful APIs and microservices architecture for efficient communication between frontend and backend.
- Use Docker and Kubernetes for containerization and orchestration to ensure smooth deployment and scaling of ecommerce applications.
- Set up CI/CD pipelines using Jenkins, GitHub Actions and Maven for automated testing and deployment.
- Monitor application performance and user behavior through Google Analytics and Mix panel, enabling data-driven improvements.
- Ensure compliance with industry standards and data privacy regulations, applying SSL/TLS encryption and GDPR best practices for user data protection.
- Collaborate with cross-functional teams to deliver features that improve customer engagement, personalization and retention.
- Utilize Firebase for real-time data syncing and push notifications to enhance user interaction.
- Employ Prometheus and Grafana for real-time monitoring and alerting of application health and infrastructure.

EDUCATION:

Masters in Computer Science - Pace University, New York, USA

Bachelors in Computer Science - Savitribai Phule University, Pune, India
