

ANTHONY PERALES

Senior Software Engineer

(917) 732-2241 • anthonyperaleswork20@gmail.com • www.linkedin.com/in/anthony-perales-7b272a37a • Fort Worth, TX

Summary

As a seasoned Senior Software Engineer, I bring nearly 8 years of experience in building robust web applications. My frontend expertise includes **JavaScript**, **TypeScript**, **React**, and **Angular**, which I use to create dynamic, user-centric interfaces. On the backend, I work with **Node.js** and **Python**, leveraging **Django** for advanced development. Proficient with databases such as **SQL Server**, **DynamoDB**, and **PostgreSQL**, and comfortable using cloud platforms like **AWS** and **Azure** to deploy scalable applications. With a strong track record of collaborating in cross-functional teams, I consistently deliver projects that exceed client expectations.

Experience

MedEvolve

Senior Software Engineer

07/2022 - 09/2025

- Built robust backend logic using **Node.js**, **Express.js**, and **Python**, leveraging **Django** along with **Pandas** and **NumPy** for advanced data processing.
- Spearheaded the migration of a mission-critical frontend from jQuery to **React**, collaborating with backend teams to refactor **REST** and **GraphQL APIs** using **Nest.js**, while containerizing services using Docker for consistent development and production environments.
- Designed modular, scalable **React** front-end architecture with reusable components and atomic design principles, improving delivery velocity, UI consistency, and onboarding of new developers.
- Developed a robust cloud-native single-page application (**SPA**) using **React**, **Express.js**, and **DynamoDB**, achieving a 25% increase in customer engagement and session duration.
- Delivered a real-time customer analytics platform using **Django** and **Amazon S3**, providing stakeholders with immediate insights from over 20,000 customer records.
- Engineered a high-performance real-time messaging system using **WebSockets** and **RabbitMQ**, enabling seamless communication, diverse event handling, and instant notifications for over 1,000 concurrent users.
- Designed and optimized a high-performance **Node.js** application, reducing page load times by 40% and improving cross-device UX through smart caching and async data loading strategies.
- Developed a customer-facing command-line query interface in **Python** for a **NoSQL** data warehouse product.
- Streamlined **CI/CD** pipelines by integrating **Bitbucket** for source control with **AWS CodePipeline**, **Docker**, and **CodeBuild**, automating tests, container builds, and deployments across development, staging, and production environments.
- Championed **GitFlow** branching strategy, enforced standardized **Git** commit conventions, and led code reviews, ensuring secure, consistent, and scalable code aligned with **OWASP** and enterprise best practices.

IntePros

Software Engineer

12/2020 - 05/2022

- Used **React** and **FastAPI** to build a platform for setting company marketing alerts.
- Developed **Node.js** services as a middleware between the application and third-party APIs, resulting in a 25% reduction in response time in overall system performance.
- Led the transition to a component-based and micro-frontend structural design using **Next.js** and **TypeScript**.
- Built a live result-tracking hybrid application using **NestJS** and **Firestore**. Ensured synchronous communication-based microservices using **NestJS** and **Apache Kafka**.
- Conducted comprehensive unit testing and debugging using **Mocha** and **Chai**, ensuring the robustness of the applications.
- Collaborated in the creation of an analytics platform using **React**, **Material UI**, **D3.js**, **Three.js**, **Node.js**, **Python**, and **Django**, which was deployed on **AWS Lambda**, **Amplify**, and **RDS Postgres**.
- Utilized **Ansible** and **Terraform** for infrastructure provisioning and configuration management, ensuring consistent environments across Azure platforms.
- Designed a new AWS landing zone architecture considering the network, compute, and other **AWS Well-Architected Framework**, including networking (**VPC**), compute (**EC2**, **Lambda**), and **IAM** policies, and deployed cloud resources using **CloudFormation** and **Terraform**.

Experience

Luxoft

Software Engineer

07/2017 - 11/2020

- Developed and maintained responsive user interfaces using **React** and **TypeScript**, enhancing user experience for payment solutions.
- Used **HTML**, **CSS**, and **JavaScript** to create 100 responsive landing pages for both company and clients.
- Developed over 200 reusable **React** components using both class-based and functional approaches, supporting scalable and maintainable front-end architecture.
- Managed and stabilized legacy applications for car parking reservation systems while developing modern solutions using **Python microservices**, **Node.js APIs**, and event-driven architecture with **AWS EventBridge**, improving scalability and performance.
- Employed **React Hooks** to improve both user and developer experience by generating testable functional components.
- Performed web scraping over a catalog of 10K school supply products using mainly **NodeJS** and **MongoDB**; completed in one month.
- Coordinated closely with QA Engineers to ensure applications undergo strict testing and are devoid of critical issues before production.
- Experienced in prompt engineering and fine-tuning large language models.
- Contributed to web-based projects that utilized **AMP** stacks (Apache Web Server, MySQL RDBMS, and PHP extensions).

Skills

Server Side: Node.js · NestJS · Puppeteer · Express.js · Python · Django · FastAPI · .NET · ASP.NET Core · Restful APIs · GraphQL

Client Side: HTML · CSS · JavaScript · TypeScript · React · Angular · NextJS · Redux · RxJS · jQuery · Bootstrap · Tailwind CSS · NgRx

Database & Data: Microsoft SQL Server · PostgreSQL · MySQL · MongoDB · DynamoDB · Redis · Kafka · RabbitMQ

DevOps & Testing: Azure · AWS · GCP · Docker · Kubernetes · Terraform · Bitbucket · Git · Jest · Mocha · Chai · TDD

Education

Texas Tech University

2013 - 2017

B.S. in Computer Science
