Celina, TX | +1 469-664-1585 | anushabura12@gmail.com | [LinkedIn](#)

Professional Summary

Detail-oriented and results-driven Senior Frontend / Full Stack Engineer with 5 years of experience designing, developing, and deploying modern web applications using React.js, Node.js, Express.js, MongoDB, and SQL. Expertise in RESTful API development, component-based UI architecture, state management (Redux), and full-stack JavaScript frameworks. Proven success in Agile/Scrum teams, delivering enterprise-grade solutions in Healthcare, FinTech, and E-commerce. Experienced in CI/CD pipelines (Azure DevOps, Jenkins), unit testing (Jest, Karma, Jasmine), and cross-browser accessibility (WCAG 2.1).

Technologies

- **Frontend:** React.js, Angular (6/8), Vue.js, AngularJS, Redux, Redux Toolkit, JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication, MVC Architecture
- **Databases:** MongoDB, MySQL, PostgreSQL, SQL, NoSQL, SQL Joins, Data Modeling
- **UI/Styling Libraries:** Tailwind CSS, Material UI, Bootstrap, Chakra UI, Sass, Figma
- **Testing & QA:** Jest, Karma, Jasmine, TDD, Unit Testing, Integration Testing, Code Coverage
- **DevOps & CI/CD:** Azure DevOps, Jenkins, Git, GitHub, Bitbucket, Docker (basic)
- **Agile & Tools:** Agile/Scrum, Jira, Confluence, Visual Studio Code, Postman, JSON, NPM

Professional Experience

Baylor Scott & White Health, Frontend Engineer/MERN Stack– **Dallas, TX** Jan 2025 – Current

- Modernized a legacy healthcare portal by implementing scalable, reusable UI components using **React.js**, **TypeScript**, and **Redux Toolkit**, significantly improving user experience and maintainability.
- Integrated **Node.js** and **Express.js** backend services with **Mongo DB** for real-time data visualization and appointment scheduling, enhancing operational efficiency.
- Developed secure **RESTful APIs** and implemented role-based access control (RBAC) for **HIPAA-compliant** access to sensitive patient data, ensuring robust security.
- Optimized app performance using **React memoization**, **lazy loading**, and **dynamic imports**.
- Built **custom React hooks and reusable component library** to standardize UI across modules.
- Collaborated cross-functionally to translate complex **Figma** designs into responsive UIs using **Tailwind CSS**.
- Custom component libraries, resulting in pixel-perfect implementations.
- Integrated **Azure Functions** and **Application Insights** for real-time monitoring and performance tracking.
- Wrote comprehensive unit tests using **Jest**, achieving **90%+ code coverage**, and automated feature deployments using **CI/CD pipelines via Azure DevOps**.
- Applied **Agile methodology**, actively participating in sprint planning, retrospectives, and code reviews to ensure timely and high-quality deliverables.

CapGemini, ABN-AMRO Bank UI / Full Stack Developer– **Hyderabad, India** Nov 2021 – Sep 2023

- Developed robust full-stack features using **React.js**, **Node.js**, and **Express.js**, significantly enhancing banking dashboards and healthcare management tools.
- Implemented **real-time data synchronization** via **WebSockets (Socket.io)** to update transaction feeds and balance summaries instantly.
- Implemented **role-based authentication (JWT, OAuth2.0)** and **data encryption** for handling sensitive financial information in compliance with **PCI-DSS** standards.
- Integrated **REST and GraphQL APIs** for transaction history, fund transfers, and account summary, improving API response efficiency by **35%**.
- Integrated **MongoDB** and **MySQL** databases, designing efficient data models and writing optimized **SQL queries** for complex reporting modules, improving data retrieval speed.
- Migrated **AngularJS** components to **React-based micro frontends** to improve application performance and developer experience.
- Designed accessible and responsive UI components using **Bootstrap**, **Chakra UI**, and consistently followed WCAG 2.1 AA guidelines, ensuring broad usability.
- Managed **CI/CD deployment pipelines** using **Jenkins and Git**; contributed actively to **Agile** delivery cycles with sprint demos and stand-ups.
- Maintained high test coverage using **Jest** and other unit testing frameworks for both frontend and backend code, ensuring code quality and stability.
- Collaborated with QA and backend teams in Agile sprints for **feature delivery, sprint demos, and code reviews**, improving velocity and code quality.

- Developed and maintained a **meal delivery web application** (similar to DoorDash model) using **AngularJS, JavaScript (ES6+), and Bootstrap**, enabling users to browse menus, customize orders, and track deliveries in real time.
- Built and consumed **custom REST APIs using Express.js and MySQL**, handling order data, user profiles, and payment status efficiently.
- Implemented **responsive UI and dynamic search/filter components**, improving user engagement.
- Optimized frontend performance with **lazy loading, image compression, and caching**, reducing load time by **15%**.
- Designed **cross-browser compatible and mobile-first interfaces**, ensuring consistent user experience across all devices.
- Wrote **unit and integration tests using Karma and Jasmine**, achieving over **90% code coverage** for key features.
- Conducted performance optimization and debugging, improving frontend load times by **15%**, enhancing user satisfaction.
- Ensured responsive layout using **Bootstrap** and applied cross-browser compatibility standards across all features.
- Collaborated with designers and backend developers in Agile sprints to deliver on time and ensure a seamless **end-to-end order workflow**.

Education

Webster University at St. Louis, MO, MS in Information Technology	Dec 2024
JNTUK University, BE in Electronics and Communication	Jul 2021
