SKILLS SUMMARY

- **Languages:** Java, JavaScript, TypeScript, C
- **Database and Repositories:** MS SQL, MySql, PostgreSQL, NoSQL(MongoDB), Git, GitHub, BitBucket, Nexus
- **Front-end:** HTML5, CSS, Bootstrap, Angular
- **Back-end:** J2EE, OOPS, JDBC, Spring boot, Spring REST, Spring MVC, Hibernate, Spring Data JPA, MyBatis, Spring Core, IOC, Spring Security, OAuth, JWT, Spring Cloud, Cron Jobs, Log4j, Tomcat, Apache Kafka, Drools, JMS, JAXB, JUnit, Swagger, Mockito, Powermock
- **DevOps/Tools:** AWS, Docker, TeamCity, Jenkins, Postman, Jira, IntelliJ, STS, VsCode, Maven, SonarQube, Splunk, Jira, Confluence
- **Methodologies/practices:** Agile Methodologies, Scrum, Kanban, TDD

EXPERIENCE

- **Barclays** Whippany, NJ
Java Developer (contract role) Jan 2023 - current
 - Engineered critical features for **LoanTrading & Settlements** application, utilizing Java Spring Boot microservices and REST APIs, prioritized high availability to manage hundreds of loan trades daily with minimal latency.
 - Implemented a responsive UI using Angular and integrated with RESTful APIs, achieving a 50% improvement in trade management processes by enhancing KYC checks, fee generation, wire instructions, and document validation.
 - Pioneered a robust asynchronous processing framework using Spring Cloud & Kafka to automate the settlement of grouped trades based on parent trade status changes, improving settlement time by 60% and eliminating manual user intervention in the process.
 - Enhanced application performance by 20% through implementing caching and optimizing database queries using Mybatis.
 - Prepared optimistic locking mechanisms using JPA with versioned entities, ensuring data integrity and preventing conflicts in concurrent updates, reducing update failures by 85%.
 - Enabled trade lifecycle tracking with detailed statuses and implemented a decision-making workflow using core java to trigger the next event in LoanIQ based on trade status updates.
 - Scheduled jobs in Spring Boot to process queued trade updates, ensuring timely and reliable delivery to downstream systems while mitigating the impact of potential processing delays.
 - Collaborated with senior developers to design and implement automated CI/CD pipelines utilizing Jenkins, streamlined build processes achieved a 40% decrease in deployment times.
- **Capgemini** Mumbai, India
Software Engineer Oct 2018 - Aug 2021
 - Developed and maintained Disney's Magical Express application using Java spring boot for integrating airline flight data APIs to optimize shuttle scheduling and routing, resulting in a 25% reduction in guest wait times.
 - Created a microservice based RVS application, integrating Java APIs with the Angular frontend, enabling the resort parking security team to manage guest parking and process over 500 guest transactions daily.
 - Created SQL Views, Stored Procedures, and Functions to optimize data retrieval, encapsulate complex business logic, and enhance database performance, leveraging Spring Data JPA & MyBatis.
 - Teamed with four developers for migrating a legacy Spring-based application to Spring Boot, streamlining application configuration, enhancing deployment efficiency with embedded servers and simplified profiles management.
 - Developed inventory ordering platform for retail business, integrating with supply chain APIs which streamlined stock management and replenishment processes, reducing order processing time by 60% .
 - Established rigorous automated test suites, utilizing JUnit, Mockito, and PowerMock for unit testing, ensuring a remarkable 99.9% accuracy in release quality throughout the software development lifecycle.
 - Diagnosed and resolved critical production issues within 24 hours, identifying root causes and implementing targeted fixes that improved application stability and increased user satisfaction by over 30%.
 - Leveraged SonarQube to identify and address 200 critical and blocker bugs and worked on improving Sonar coverage for legacy applications.

EDUCATION

- **University Of Central Missouri** LeeSummit, MO
Masters in Computer Science Jan 2022 - May 2023
