

Archana Reddy

Sr. .Net & Azure Full Stack Engineer

Mobile: +1 4693926057

E-Mail: archanareddy0508@gmail.com

PROFESSIONAL SUMMARY

- A highly skilled Senior .NET Developer with over 10 years of experience in designing and developing .NET applications, using the latest technologies such as .NET Core and .NET 6.
- Expertise in all areas of the **Systems Development Life Cycle (SDLC)**, including strategy, analysis, design, coding, testing, and documentation for software products using **Agile, Scrum, and Waterfall** approaches.
- Strong comprehension of **OOPS** concepts such as **encapsulation, inheritance, abstraction, and polymorphism**.
- Proficiency in designing **Single Page Applications (SPA)** with rich UI and responsive features using **JavaScript** and UI frameworks such as **Bootstrap, ASP.NET, AJAX, HTML5, and CSS3**.
- Experience in web development frameworks including **React.js 15/16, Angular 2/8/12/15**, as well as **MVC** and **MVVM** design.
- Demonstrated expertise in utilizing **Terraform** to build, manage, and version infrastructure as code (**IaC**) in the Azure cloud environment.
- **CICD** Experience working in **Github Actions, Azure Devops** build and release automation pipelines
- Experience with **Micro frontend, Microsoft technologies** such as **C#, .Net Core 3.0/6.0, ASP.NET MVC, ASP.NET WEB API, Entity Framework, SQL Server, Cloud Services, ADO.NET, VB.NET, Postgre SQL** and **IIS**.
- Practical experience with several **Azure services**, including **Azure Infrastructure, compute, storage, Azure Active Directory, Azure Infrastructure Functions** and **Data Lake store**.
- Expertise in designing **UML** design patterns such as **Adapter, Proxy, Bridge** and **Facade**.
- In-Depth understanding of the entire web related technologies, architectures, frameworks, component technologies and cross-platform **UI/UX** development.
- Proficient at developing **N-tier** distributed .NET Core applications that use **SOAP** and **SOA-based Web services**.
- Database design and development experience includes **SQL Server, PL/SQL, T-SQL, and Oracle**.
- Skilled in version control with systems like **TFS (Team Foundation Server), Sub-Version, GitHub, and Git**.
- Competence in using **NoSQL** databases like **MongoDB, DB2** and **Cassandra**.
- Strong expertise in developing applications using **MVC, Web API, WCF, LINQ, Visual Studio** and **Visual Studio Code**.
- Extensive experience implementing **Microservices**.
- I am proficient at automating build and deployment processes with **Jenkins, Apache Maven, and Ant**.
- Experience managing backend data sources using **RDBMS** such as **Micro frontend, DB2, MS SQL Server, Oracle, and Microsoft Access**.
- Familiarity with unit testing frameworks such as **N Unit, X Unit, MS Unit, Jasmine, Karma, Jest, and Enzyme**.
- Experience with **Web API** services that need explicit **HTTP** methods such as **GET, POST, DELETE, PATCH** and **PUT**.
- Hands-on expertise with **Azure services** such as compute (**Azure Infrastructure, web roles and worker roles**), **Azure websites, caching, SQL, Azure storage, network services, Azure Active Directory, API management, scheduling, auto-scaling, and PowerShell automation**.
- Extensive knowledge **Silverlight** control authoring using **control templates, data binding** and **visual state management**.
- Used **Xamarin IOS** and **Xamarin Android** for creating native user interface.
- Proficient in message brokers like **RabbitMQ, Kafka, and ActiveMQ**, and experienced in **SQL Server** for high-performance database management.
- Demonstrated ability to develop scalable, distributed applications using **microservices architecture** and **cloud-based technologies (Azure or AWS)**.

- Experienced in providing on-call support in a production environment and leading teams in Agile software development processes.
- Developed **Data Access Layer (DAL)**, **Business Logic Layer (BLL)** also implementing Business Processes.
- Having strong knowledge of **PowerBI, Jenkins, AWS, Kubernetes, Redis, EventGrid, Redis queues** and **Docker**.
- Worked on **SSRS** to Generate the reports in **Excel** and **PDF** Formats.

TECHNICAL SKILLS:

Methodologies	Agile, Scrum, Waterfall, TDD, Kanban
Web Technologies	HTML5, CSS3, XML, Bootstrap, JavaScript, jQuery, AJAX, React.js 15/16, Redux, Flux, Redux Thunk, Angular JS, Typescript, Angular 2/8/12/15, Angular CLI, Angular Material, Vue.js
Languages	.NET (ASP.NET, C#.NET, VB.NET)
.NET Technologies	C#, ASP.NET, MVC, ASP.NET Core, ADO.NET, ASP.NET WEB API, C#.NET, ASP.Net Core, WCF, WPF, ASP.NET MVC 4/5, SOAP, SOA, LINQ, VB.NET, UWP, Win32
Databases	SQL Server, Oracle, MS Access, Cosmos DB, MongoDB, Cassandra, PL/ SQL.
ORM	Entity Framework Core, Entity Framework Code First, LINQ to SQL
Cloud Service	MS Azure, AWS, Azure Infrastructure
Version Control	Git, GitHub, Team Foundation Server (TFS), Subversion
CI/CD	Jenkins, Kubernetes, Docker
IAC	Terraform
IDE & Other	Visual Studio, SQL Server Management Studio, Visual Studio Code
Reporting Tools	SQL Server Reporting Services (SSRS), Crystal Reports
Design Patterns	Repository, Dependency Injection, Singleton, Factory
MS Office	MS Word, MS Excel, MS PowerPoint
Server	IIS, Windows Server
Testing Tools	Karma, Jasmine, N Unit, X Unit, Jest, Enzyme, MS Test
Code Quality & Automation	Sonar Qube, Fortify, Contrast, selenium etc
Bug Tracking	Jira, Bugzilla, Asana

PROFESSIONAL EXPERIENCE:

Client: Albertsons, Plano, TX

Dec 2022 – Till date

Role: .Net Full Stack Developer

Albertsons is a major U.S. supermarket chain offering groceries, pharmacy services, and household essentials. It operates under various banners like Safeway, Vons, and Jewel-Osco, focusing on quality products, customer service, and digital shopping convenience.

Responsibilities:

- Worked with **Vue.js** Forms, Validations, Modules, Components , controllers and HTTP requests.
- Responsible for designing and implementing application performance monitoring for Confidential production environment.
- Actively participated in **UAT** transition, retested **UAT** defects and updated comments in the **JIRA** tool.
- Successfully completed the **Software Development Life Cycle (SDLC)**, including **business analysis, design, development, testing**, and implementation of **standalone, intranet, client-server**, and **web-based applications**.
- Developed a responsive hybrid application with **Vue.js, Angular 15, Web UI** for **desktop, tablet**, and **mobile** users for Harness Test Application, Q-stats and call-logger.
- Experienced in **front-end** development using **Angular 15, HTML5, CSS3, JavaScript, jQuery, Ajax**, and **Bootstrap**.
- Retrieving Wave files from the **Azure Blob Storage** using **Event Grid** and retrieving the **Queue Storage data** from **Azure Infrastructure**.
- Extensively developed Web API's with latest **.NET Core 6.0**

- Use the **Swagger Editor** to create and document **GraphQL, RESTful APIs** for both technical and non-technical audiences.
- Utilised **MVC** frameworks like **Vue.js, Angular 15** to develop **single-page applications (SPA)** with principles like **dependency injection, promises, services, scope, controllers, and directives**.
- Extensively used **HD insight** to create **PowerShell, Hadoop** powered big data solution and services, Analyse and report statistics on big data availability and utilization.
- I created presentation layer views with **ASP.NET Core MVC, C#.Net, HTML, CSS, jQuery, PostgreSQL and JavaScript**.
- Used **Angular CLI** to optimise and bundle application assets, resulting in **faster load times**.
- Used **dependency Injection** to inject **Angular 15** services into **Angular controllers**, allowing for **AJAX** calls. I also developed custom directives to construct **HTML** elements and add functionality.
- Developed and deployed applications using **Micro frontend, Microsoft services**, including **Azure Data and Azure DevOps**.
- Contributed to **Vue.js, Angular 15** module and component documentation, ensuring accurate and current project information.
- Developed features and effects using **Angular 15 and Vue.js, JavaScript**, including accordions, infinite scroll bars, sliders, drag and drop, resizable, and progress bars.
- Developed business and data layer components in **PostgreSQL, WPF, UWP, Win32, C#.Net, VB.NET and ADO.Net**, as well as controllers to handle razor view events in the **.Net Core MVC**.
- Created **Azure functions, Azure DevOps** to combine incoming and outgoing messages from streaming tools like the **Azure Service Bus, Kafka**.
- Planned, organised, and maintained the full stack **Kubernetes** environment running on **AKS(Azure Kubernetes Service)**
- Implemented **JWT token-based authentication** to safeguard **ASP.NET Core** and grant authorization to users.
- Utilised **ASP.NET** for server-side controls and **JavaScript** for validation controls.
- Created data tables, columns, and views in **SQL Server, Kafka, Event Grid, Redis queues and Redis**.
- Implemented **ORM** models such as **Entity Framework** and **SSRS Reports**.
- Developed **database schemas**, including **tables, views, triggers, stored procedures, functions, and indexes**.
- Implemented **LINQ to query, sort, and filter** complicated objects.
- Testing the **GraphQL, RESTFUL Web API, RPC** with **Swagger** and **POSTMAN**.
- Configured **Docker** Engine with Docker specific commands, Create Custom Docker Images, and Deployed Docker.
- Developed **unit test** cases for the **UI** with **Karma and Jasmine**.
- Used **Redis queues, N-Unit, MS Test, Redis, Event Grid** for **unit performance, and functional testing**.
- Used **Tidal** Scheduling tool to schedule **SSIS** packages and **SSRS** reports.
- Developed and optimized high-performance **.NET Core 6** applications handling large-scale retail transactions.
- Integrated message brokers (**RabbitMQ, Kafka**) to enable seamless inter-service communication.
- Designed and maintained **SQL Server** databases, ensuring high availability and optimal query performance.
- Implemented monitoring and logging solutions using **Azure Application Insights** for production support.
- Collaborated with cross-functional teams to implement DevOps best practices in **CI/CD** pipelines.

Environment: HTML5, CSS3, JavaScript, jQuery, Ajax, Bootstrap, Angular 15, Azure Infrastructure, Blob, Queue Storage, Swagger Editor, ASP.Net Core MVC, C#.Net, Microsoft Azure, ADO.Net, Razor Views, Azure Functions, JWT Token, SQL Server, Entity Framework, LINQ, POSTMAN, Karma, Jasmine, N Unit, Scrum, JIRA, VB.NET, Postgre SQL.

Client: State of Kentucky, Kentucky

Jan 2021 to Nov 2022

Role: Senior .Net Developer

Responsibilities:

- Experienced on **WCAG 2.0** level A & AA success criteria and widespread knowledge on US ADA digital assets to fix HTML, CSS and JavaScript issues.
- Experienced with **HTML5, CSS3**, backgrounds, layouts, positioning, text, borders, margins, and CSS behaviours.
- Used **HTML5, CSS3, ReactJS, jQuery, Vue.js** and **Bootstrap** to create a **single-page** web app with a **GraphQL, RESTful API's** using **.Net Core 6.0**.
- Developed **React.js 16** views using **Redux** architecture to manage states.
- Manipulated **DOM**, handle events and applied animation effects with **Vue.js**.
- Developed **GraphQL, Restful services, RPC** with an **WPF, UWP, Win32, ASP.NET Web API** for mobile devices.
- Developed Integration process using **Boomi** using **MSI** connectors and Listeners through **Message Queues, Kafka** and connect to the **OAuth 2.0** Authenticated web service using the **HTTP** connector.
- Implemented **ASP.NET** features including calendar controls, repeater controls, validation controls, datasets, and form authentication.
- Developed **SPA** using **Blazor** Web Assembly and **Bootstrap CSS**.
- Involved with bug fixing on functionality, performance and designing issues with **Vue.js** Plugin and Chrome Developer Tools.
- Acted as build and release engineer, deployed the services by **Azure DevOps** pipeline.
- Used **Azure Service bus** for the automatic rendering of the wave files to the production servers.
- Implemented the Drag-and-drop functionality using **React-Draggable**.
- Adding Wave files to the **Azure Blob, Azure DevOps** and adding a notification to the **Azure Table Storage**.
- Creation, development, and maintenance of structured and well-documented code in **C#** using **Visual Studio 2019** and **Visual Studio Code**.
- Worked on **cloud computing** using **PowerShell, Windows Azure, Azure Infrastructure** and **Server Azure**.
- Worked on designing **AWS** Cloud migration strategy from on-prem servers and **Redis, EventGrid** and **Redis queues**.
- Worked with **PowerShell, Micro frontend, Microsoft Windows Azure** including a complete set of enterprise-ready data services, including **Windows Azure Storage** and **SQL Databases, Kafka, Event Boos** and **Redis, EventGrid** and **Redis queues**.
- Developed **Data Access Layer** Using **Entity Framework** using Repositories.
- Implemented **React.js 16** code to handle cross-browser compatibility issues in **Google Chrome, Mozilla, Safari**, and **Firefox**.
- Actively supported business users for changes in reports as and when required using **SSRS**.
- Proficient developing applications using **MVC, Blazor** server-side and **WebAPI** with Entity Framework.
- Migrated several **SQL** server tables to **Cosmos DB** collections.
- Designing, implementing, and supporting fully automated **Continuous Integration** and **Continuous Delivery (CI/CD)** processes using **Azure DevOps, Azure Infrastructure** and **SSRS Reports**.
- Involved in **unit testing** and code reviews while developing and fixing the bugs.
- Used **JIRA** as the **bug tracking** tool and integrated with **Source Tree** to use **GIT** for code versioning and repository.
- Ensured **GET, POST, PUT, and DELETE** functionalities worked as expected through Web API using **Postman** services.
- Developed RESTful APIs and GraphQL services in **.NET Core 6** for secure data exchanges.
- Implemented OAuth2 authentication and JWT-based authorization for secure access control.
- Integrated ActiveMQ for efficient message queue processing in government applications.
- Optimized SQL Server stored procedures and indexing strategies to enhance query performance.
- Automated deployments and monitoring using **Azure DevOps** and **Terraform**.

Environment: C#, HTML5, CSS3, jQuery, Bootstrap, React.js 16, React-Draggable, Redux, RESTful API, ASP.NET Web API, Entity Framework, Azure Blob, Azure Table Storage, Azure Service Bus, Cosmos DB, Azure DevOps, Visual Studio, Visual Studio Code, Windows Azure, JIRA, GIT, Jest, Enzyme, MSTest, N-Unit, Vue.js.

Client: Blue Cross Blue Shield of Michigan, MI

Sep 2019 to Dec 2020

Role: .Net Developer.

Responsibilities:

- Design **database** structures, including **tables, stored procedures, views, indexes, and relationships**.
- Created **SQL** scripts to migrate data from various sources **SQL Integration Services (SSIS)**.
- Developed **SQL** scripts for data sets to generate reports using **SQL Server Reporting Services (SSRS)**.
- Worked with databases such as **PostgreSQL, SQL Server, DB2, and MySQL**.
- Worked on designing single page applications using **Vue.js** Components such as Router and **Vue.js** core components.
- Implemented **HTTP** protocol and **SSL** to secure information between **WCF**, Service and Client.
- Experience in using **Vue.js** to create a simple API to loop through an array of bound data and also done two way binding of data using **Vue.js**
- Implemented forms-based security and **Windows** authentication, **OAuth** authentication and **Web Forms**.
- Used the **Route Provider service** to connect views and controllers in **AngularJS**.
- Migrated Application from **KnockoutJS** and **AngularJS** to **Angular 13**.
- Implemented client-side common libraries by using **Angular 13, Vue.js**.
- Implemented business logic, data exchange, **XML** processing and created graphics using **python**.
- Used **jQuery** and **AJAX** to make asynchronous calls to the server that can be processed by **ASP.Net Core MVC controllers**.
- Wrote complex **T-SQL** queries for data extraction.
- Deployed **Micro frontend, Microsoft Azure Cloud Service (PaaS, IaaS)** and **Web Apps**.
- Developed **REST APIs** for **Azure Service Fabric stateless Micro services** using **ASP.NET Core**.
- Developed a **Single Page Application (SPA)** using **Angular 13** framework to bind data to specific views and synchronise with the server.
- Used **MVC5 new AttributeBasedRouting functionality** to achieve URL control.
- Developed business logic in **Python** for planning and tracking functions using PowerShell.
- Developed **MVC** and **web forms**.
- Used **Razor** Syntax to create views for various pages.
- Used **event handlers** with **JavaScript, Typescript, Entity Framework**, and **SQL Server** databases to improve logging on public-facing **Angular 13** pages.
- Created a **JSON-returning GraphQL, RESTful web service** using **Entity Framework** and ASP.NET Core **WebAPI**.
- Developed **single-page applications (SPA)** using Web UI, **Angular 13, TypeScript, Vue.js** and **Bootstrap**.
- Worked on **Mac, Windows, and Linux (Ubuntu)** responsible for **front-end UI** development with **HTML5, SCSS, Typescript, Vue.js** and **Angular 13**.
- Designed and developed microservices using **.NET Core 5** and **Azure Service Bus**.
- Built event-driven applications leveraging **Kafka** for real-time claim processing.
- Improved **SQL Server** database efficiency through partitioning, indexing, and query tuning.
- Developed and managed API Gateway solutions for seamless integration with third-party systems.

Environment: Angular 13, Azure, Bootstrap, C#, CSS, Entity Framework Core, Gherkin Automation, GIT, HTML5, IIS, JavaScript, jQuery, MS SQL Server 2014, .NET Core, Python, Visual Studio 2019, Visual Studio Code, Web Services, WCF, XML.

Client: Fidelity Investments, Dallas, TX

Jul 2018 to Aug 2019

Role: .Net Developer

Responsibilities:

- Managed the entire **software development life cycle (SDLC)** project, including analysis, design, implementation, and maintenance.
- Collaborate with a cross-functional **scrum** team to produce **agile** and continuous software solutions.
- Expertise in **Python API** and **Web Service Development**.
- Experience with **AWS Serverless Lambda Functions, Simple Queue Service (SQS), CloudWatch, AWS API Gateway, S3 buckets, RDS, Redis, EventGrid, Redis queues** and **EC2**.
- Used **Kendo UI** controls using **HTML razor view, Vue.js** engine to make the pages more responsive and attractive.
- Performed debugging in a multithreaded environment in .NET framework.
- Designed and developed **AWS Lambda APIs. Net Core, Redis, Redis queues** and **Event Grid**.
- Conducted **AWS PostgreSQL** database conversion.
- Worked on the entire application stack in **Amazon Web Services (AWS)**, including **EC2** and **S3** buckets.
- Lambda expressions define criteria for filtering, sorting, and grouping data.
- Create UI pages and layouts with **HTML5, CSS3, jQuery, JavaScript, Typescript, Bootstrap**, and **Material UI**.
- Created **React JS** pages, **Web services**, and **AJAX** calls for the app.
- Developed a web application using **React JS** to bind data or models fetched from a database through controller services to the view via scope.
- Configured and administered **JDBC Connection Pools /Multi Pools/Data Sources** on **WebLogic** Server.
- Used **React JS** to create **React** components using **JSX**.
- Evaluated database performance and performed maintenance duties such as tuning, backup and restoration.
- Developed a reusable **React JS** component for **DOM** manipulation.
- Developed front-end screens with **React JS** and preset components from **NPM** and **Redux** packages.
- Optimised three members' account administration workflows with **React-Redux** and **React-Hooks**.
- Improved live chat on desktop, tablet, and mobile apps with **React-Redux, React-Hooks, JavaScript, HTML5**, and **CSS3**.
- Used **Axios** to manage **HTTP** requests in a **React** and **Redux** project.
- Developing **APIs** for integration projects. Implemented and extensively used object-oriented programming concepts in **C#** and **SOLID** principles.
- Proficient in **GraphQL**
- Used **Python-based GUI** components for front-end functionality, including selection criteria.
- Developed scripts for **unit** and **system testing** to be used in the quality assurance process.
- Automating all deployment steps with **infrastructure as code (IAC)** and **Jenkins pipeline as code (JPAC)** concepts.
- Maintaining the team capacity and supporting them in peer reviews and development.

Environment: AWS, Bootstrap, C#, CSS, Entity Framework Core, Gherkin Automation, GIT, HTML5, IIS, JavaScript, jQuery, MS SQL Server 2014, .NET Core, Python, Visual Studio 2019, Visual Studio Code, WCF, Web Services, XML.

Client: *Avon Technologies Pvt Ltd Hyd India*

Jul 2013 to Jun 2017

Role: Dot Net Developer

Responsibilities:

- Developed web-based database-driven intranet applications and components to meet corporate needs utilising **ASP.NET, C#.NET, ADO.NET, and MVC 3.0.**
- Used **Visual Studio 2013** to design and construct an **ASP.NET MVC** Framework application.
- Developed **WCF**-based web services for client communication and data exchange.
- Extensive experience designing backend applications using **Python** and the **Django** Framework.
- Develop web applications with the **ASP.NET Web API.**
- Used **jQuery** for Client-Side Validations, calling the Controller Actions, and making calls to the **WCF** Services.
- Used **ASP.NET** Validation Controls and was involved in Client-side validations using **JavaScript.**
- Used **AJAX** Controls such as **Script Manager** and Update Panel to develop the rich User Interface
- Used **ADO.NET, Entity Framework** extensively for retrieving, querying and manipulating data in the **SQL SERVER 2012.**
- Design **database** structures, including **tables, stored procedures, views, indexes, and relationships.**
- Writing **GraphQL, SQL** scripts to migrate data from various sources using **SQL Integration Services (SSIS).**
- Developed **GraphQL, SQL** scripts for data sets to generate reports using **SQL Server Reporting Services (SSRS).**
- Used Web UI, **Cascading Style Sheets (CSS)** classes to maintain the uniformity throughout the application
- Strong skills in **SQL** and **PL/SQL.** Backend programming, creating database objects like Stored Procedures, Functions, Cursors, Triggers, and Packages.
- Worked on **Agile** Methodology (**Scrum** Framework) to meet timelines with quality deliverables.
- Directly accountable for various aspects of product design including assessment, coding, testing and optimization.
- Involved in code reviews and performance improvement as well as documentation.
- Provided production and end user support as well as involved in bug fixes using user acceptance testing environment.

Environment: Agile Methodology, AJAX, ADO.NET, Angular JS, ASP.NET, ASP.NET WEB API, C#.NET, CSS3, GIS, HTML5, IIS, JavaScript, jQuery, jQuery UI, MVC 3.0, PL/SQL, Python, SQL SERVER 2008 / 2012, SSRS, T-SQL, Visual Studio 2013, Visual Studio Code, WCF.

EDUCATION

- **Bachelor's in technology from JNTUH – May 2013.**
