Work History

Senior Software Engineer (React / Python / Go)

Twitch (Mar 2022 - Present)

Frontend Development & User Experience

- Pioneered client-side QoUX framework (AWS Kinesis, Lambda, CloudWatch); cut MTTD by ~40% (issues detected in 25 mins).
- Developed interactive React.js components for Twitch Extensions, engaging millions with dynamic overlays.
- Launched "Reactions" feature, enabling viewers to anonymously respond to live streams with emotes, receiving overwhelmingly positive community feedback.
- Streamlined live stream moderation by enhancing reporting tool UI for faster, intuitive content flagging.

Backend & Infrastructure Engineering

- Orchestrated Wexit monolith-to-microservices migration, architecting high-performance Go microservices; doubled PubSub server performance.
- Optimized RTMP ingestion/NGINX configs; implemented ABR, supporting ~312.8 Gbps peak traffic.
- Constructed Extension Backend Services (EBS) using Node.js, Express.js, MongoDB; integrated with PubSub, securely processing data for thousands of active extensions.
- Deployed ML model for violative username detection, automating enforcement and curbing significant abuse.

Software Engineer (React / React Native / Python)

Meta (Jul 2020 – Mar 2022)

Frontend Development & User Experience

- Rolled out "Your activity" tool via React/React Native, enabling 3+ billion users to manage content/history.
- Integrated Instagram "Favorites and Following" with React Native, boosting feed customization for millions.
- Built Instagram age verification (selfie video/UI) using React Native, enhancing global user safety.
- Introduced Personal Boundary in Horizon Worlds (VR) with React Native UI, improving comfort for ~200K-300K monthly users.

Backend & Infrastructure Engineering

- Supported AI/ML infrastructure using PyTorch and Presto for exabyte-scale data, powering 24,000-GPU clusters for advanced model training; managed data loading via Tectonic.
- Enhanced "Conveyor" CD platform, enabling 100k+ weekly deployments with 99.9% SLO.

Education

2016-2020

Bachelor's degree, Computer Science

Purdue University
