

SUMMARY

- AWS Cloud Security Engineer with hands-on experience in **cloud security, infrastructure automation, and compliance**.
- Expertise in **AWS services**, including **EC2, VPC, IAM, S3, RDS, Lambda, AWS Security Hub, GuardDuty, AWS WAF, and CloudTrail**.
- Skilled in designing and implementing **secure, scalable, and cost-effective cloud environments**.
- Proficient in **Infrastructure as Code (IaC)** using **Terraform and AWS CloudFormation** to automate cloud resource provisioning.
- Strong knowledge of **identity and access management (IAM), network security, vulnerability management, and compliance auditing** (SOC 2, NIST, ISO 27001).
- Experience in **incident response, monitoring, and remediation** using **AWS CloudWatch, SIEM tools, and automation scripts (Python, Bash, PowerShell, AWS CLI)**.

SKILLS

Cloud Security & Compliance	AWS IAM, AWS Organizations, Security Hub, GuardDuty, AWS WAF, Shield, AWS KMS, Secrets Manager, AWS Config, CloudTrail, AWS Audit Manager
Networking & Security	Amazon VPC, VPC Peering, Transit Gateway, Direct Connect, PrivateLink, Route 53, Elastic Load Balancers (ALB, NLB), AWS Network Firewall, Security Groups, Network ACLs
Infrastructure as Code (IaC)	Terraform, AWS CloudFormation, AWS CDK, YAML, JSON
Automation & DevOps	AWS CLI, Python (Boto3), Bash, PowerShell, AWS Lambda, AWS Systems Manager (SSM), Step Functions, EventBridge, AWS Service Catalog
Monitoring & Incident Response	Amazon CloudWatch (Logs, Metrics, Alarms, Events), AWS X-Ray, AWS OpenSearch, AWS Trusted Advisor, SIEM integration
Containers & Serverless	AWS ECS, AWS EKS, AWS Fargate, Docker, Kubernetes, Lambda, API Gateway
Cost Optimization & Performance	AWS Cost Explorer, Compute Optimizer, Savings Plans, Auto Scaling, AWS Global Accelerator, AWS ElastiCache (Redis, Memcached)

EXPERIENCE

SR AWS Cloud Security Engineer/Cloud Engineer

American Family Insurance, United States

| June 2022 – Present

- Architected secure AWS environments utilizing CloudFormation and custom Python scripts, enforcing strict IAM least privilege policies across 50+ accounts and slashing potential attack vectors by 60%.
- Orchestrated AWS Security Hub integrated with GuardDuty and AWS Config, which facilitated automated threat detection and real-time compliance monitoring across 50+ AWS accounts, and improved security posture by 60%.
- Developed Terraform modules for repeatable AWS infrastructure deployments, reducing provisioning time by **40%**.
- Expedited incident resolution by architecting automated workflows with AWS Lambda, EventBridge, and Step Functions, slashing mean time to resolution (MTTR) by 60% and boosting operational efficiency.
- Fortified application defenses by configuring AWS WAF custom rules and integrating Shield Advanced, achieving zero critical vulnerabilities reported during quarterly penetration testing exercises.
- Audited AWS environments against CIS benchmarks, NIST 800-53, and SOC 2 to ensure regulatory compliance.

AWS Cloud Security Engineer/Cloud Engineer

BEAUMONT PRODUCT INC, United States

| Dec 2018 – June 2022

- Spearheaded AWS IAM security audits, pinpointing and resolving excessive permissions using AWS IAM Access Analyzer, reducing potential attack vectors by 40% and improving overall security posture.

- Fortified network security posture for ten applications by architecting AWS VPCs featuring granular security groups and AWS Network Firewall, limiting access to sensitive data stores.
- Engineered AWS Lambda functions to automate security patching across all VPCs, ensuring continuous compliance with security policies and eliminating manual patching efforts which saved 20 hours weekly.
- Established AWS Config rules across 20+ accounts, ensuring continuous enforcement of PCI-DSS and HIPAA security standards, resulting in a 99.9% audit pass rate.
- Reduced AWS operational costs by 25% by optimizing EC2 instance types, S3 lifecycle policies, and AWS Reserved Instances.

AWS Cloud Engineer

| Jan 2017 – Dec 2018

CloudTier, United States

- Pioneered the automation of AWS infrastructure setup leveraging CloudFormation and Terraform, leading to a 40% decrease in manual errors and slashing deployment times by 15 hours weekly.
- Established secure and scalable networking infrastructure using VPC, load balancers, and security groups, supporting cloud-based application traffic of 200,000+ users daily, and 99.99% availability.
- Developed automated scripts using AWS Lambda to streamline routine operational tasks, freeing up 20 hours weekly for the most junior member on the team to focus on complex projects.
- Leveraged AWS Cost Explorer to identify underutilized EC2 instances and adjusted instance sizes, decreasing monthly AWS spend by \$40,000 and improving overall application performance by 15%.
- Configured AWS Auto Scaling policies for Docker containers on ECS/EKS, automatically adjusting resources based on real-time demand and saving 20% on infrastructure costs annually.

EDUCATION

Bachelor's Degree in Computer Science

| 2007

Enugu State University of Science and Technology

Certification

- **AWS Certified Solutions Architect – Professional**
- **AWS Certified Security – Specialty**
- **CompTIA Security+**
- **Certified SAFe 6 Practitioner**
