Contact: 404-692-9818

Professional Summary

- 11 years of experience as a Java Developer in IT industry.
- Expertise in Health Care, Telecom, and Card Payments domains.
- Proficient in Object-Oriented Analysis, Design, and Programming.
- Extensive knowledge of Java/J2EE technologies, including Spring, Struts, Hibernate, JAX-WS (SOAP), and RESTful web services.
- Skilled in cloud computing with AWS and database migration from Oracle to Aurora.
- Strong debugging skills using log4J and server debug mode.
- Proficient in build automation tools such as ANT and Maven.
- Adept at preparing and executing unit and integration test cases.
- Experienced with both Waterfall and Agile project management methodologies.
- Excellent team player with the ability to work independently.
- Full-stack development experience, including JSP, Servlet and React JS.
- Expertise in microservices architecture and API development.
- Skilled in performance optimization techniques, including Redis caching.
- Hands-on experience with CI/CD pipelines using Jenkins.
- Proficient in version control systems like GIT, SVN, and CVS.
- Experience in asynchronous communication with Kafka.
- Experienced in supporting production environments and troubleshooting issues.
- Strong SQL skills and experience with databases including Oracle, MySQL, and PostgreSQL.
- Knowledgeable in DevOps practices with Docker and Kubernetes for containerization and orchestration.
- Advanced degrees in Telecom and Software Engineering, and Computer Science & Engineering.

Technical Expertise

Programming Languages:

- Java, J2EE

Databases:

- Oracle, MySQL, PostgreSQL

Frameworks and Technologies:

- Spring Core, Spring MVC, Spring JPA, Spring Boot, Hibernate, Struts 1.2
- Web services: SOAP, REST, XML, JMS
- JSP, Servlet, Node JS, Swings, Apache POI, HSSF, J3270 screen scraping, React JS, Kafka, Redis
- WebSphere, Apache, Tomcat

Tools and Platforms:

- Eclipse, RAD, IntelliJ, SQL Developer, DBeaver, Bitbucket, SourceTree, Docker, Kubernetes
- HP-UX, Windows, AWS
- SVN, CVS, QC/ALM, GIT
- ANT, Maven

Education

- **M.S. in Telecom and Software Engineering**
Birla Institute of Technology and Sciences, Pilani (2011 - 2013)
- **B. Tech in Computer Science & Engineering**
Amity School of Engineering and Technology, Noida (2006 - 2010)

Professional Experience

Opus Technologies

Java Developer

Sep 2022 - May 2024

Client: MerchantE

Location: Alpharetta, GA

Project: Payment Processing Solutions

MerchantE is a payment acquirer offering solutions for Credit/Debit cards and ACH payments through POS terminals, payment gateways, and web-based payments.

Roles and Responsibilities:

- Designed and developed a comprehensive payment processing product.
- Collaborated with a multidisciplinary team to implement new features.
- Developed and maintained invoicing applications using the React framework.
- Implemented caching mechanisms using Redis to optimize performance.
- Migration of database from Oracle to Aurora(Postgres).
- Designed and developed microservices using message-driven events for asynchronous communication.
- Worked in AWS Cloud technologies - AWS EC2, ElasticSearch, Aurora and Spring Cloud(SCDF).
- Created RESTful APIs for seamless integration with internal and external systems.
- Analyzed business requirements and refined user stories for system requirements.
- Conducted design reviews to ensure alignment with business objectives.
- Developed application code and unit tests for new functionalities.
- Optimized SQL queries to enhance system performance.
- Managed on-premises application servers on Unix platforms.
- Performed root cause analysis and resolved application issues using log analysis.
- Conducted peer code reviews to ensure code quality.
- Built and deployed application code using Jenkins CI/CD pipelines.
- Reviewed QA test cases to ensure comprehensive test coverage.
- Oversaw the deployment process across Dev, Integration, Stage, and Production environments.
- Supported production releases and monitored application logs using Splunk.

Technologies:

Java, Spring Boot, Kafka, Hibernate, RESTful services, React JS, Apache Tomcat, AWS, Kubernetes, Docker, Maven, Jenkins, Oracle, GIT, PostgreSQL, React, Redis, Unix, Splunk

Hitech Info Group LLC
Java Developer
May 2018 – Sep 2022
Client: MerchantE
Location: Alpharetta, GA

Project: Payment Solutions Integration

Worked on integrating payment solutions for POS terminals, payment gateways, and web-based platforms for MerchantE.

Roles and Responsibilities:

- Developed and maintained microservices for payment processing.
- Implemented Redis caching for enhanced performance.
- Created RESTful APIs for system integration.
- Analyzed and refined business requirements.
- Developed, tested, and optimized application code.
- Managed Unix-based application servers.
- Performed root cause analysis and bug fixes.
- Supported production deployments and monitored logs using Splunk.
- Conducted code reviews and maintained development documentation.

Technologies:

Java, Spring Boot, Hibernate, RESTful services, React JS, Apache Tomcat, Kubernetes, Docker, Maven, Jenkins, Oracle, GIT, PostgreSQL, Unix

United Health Group
Java Developer
Sept 2014 – Feb 2016
Location: Noida, India

Project: Integrated Clinical User Experience (ICUE)

ICUE is a web-based application for delivering clinical management programs at United Health Group.

Roles and Responsibilities:

- Developed and maintained the ICUE application.
- Conducted unit testing and peer code reviews.
- Fixed defects and performed maintenance activities.
- Collaborated with business stakeholders and integrated upstream and downstream applications.
- Enhanced application functionalities based on user stories and business requirements.
- Developed and tested new application modules.
- Conducted code reviews for quality assurance.

Technologies:

Java/J2EE, Spring, Hibernate, SOAP, Oracle 10g, HP-UX, WebSphere, JMS, CVS

Tech Mahindra Ltd.
Java Developer
Location: Noida, India
Project: Web Access Ordering System (WAO)
Client: AT&T, USA
June 2013 – Sept 2014

WAO is AT&T's Online Access Ordering System to streamline the Access Service Request (ASR) process.

Roles and Responsibilities:

- Developed and enhanced the WAO application.
- Prepared test cases and strategies for unit and integration testing.
- Analyzed requirements and provided development support.
- Fixed defects and conducted maintenance activities.
- Collaborated with system analysts for requirement analysis.
- Developed and tested application enhancements.
- Conducted code reviews to identify and fix errors.

Technologies:

Java/J2EE, Struts 1.2, JSP, Servlet, Oracle 10g, HP-UX, Unit Testing, J3270 screen scraping, SVN, ANT

Project: Automation Framework

Client: AT&T, USA
March 2011 – June 2013

The Automation Framework is a set of Quality Centre Business Components for automated test execution.

Roles and Responsibilities:

- Developed and enhanced the Automation Framework.
- Conducted unit testing and fixed defects.
- Analyzed client specifications and provided development support.
- Developed and tested components for automated execution.
- Reviewed and refined requirements based on client feedback.

Technologies:

Swings, Core Java, XML, Oracle 9i, UNIX
