

# Azhar Mohammed

## Java Full Stack Developer

✉ azharmohammed5908@gmail.com ☎ 2017571484 📍 Lodi, NJ, 07644

🌐 [linkedin.com/in/azhar-mohammed](https://www.linkedin.com/in/azhar-mohammed)

### SUMMARY

Java Full Stack Developer with **4+ years** of experience in developing and deploying secure, scalable healthcare web and mobile applications. Skilled in Java, Spring Boot, React, Flutter, and cloud-native architecture with strong expertise in HIPAA-compliant solutions, FHIR/HL7 integration, and data-driven healthcare platforms. Adept at collaborating with cross-functional teams to enhance patient experience, optimize system performance, and ensure compliance with healthcare regulations.

### Skills

#### Languages

Java, Python, Dart, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3 (SASS)

#### Databases

MySQL, PostgreSQL, MongoDB, AWS RDS

#### Healthcare Expertise

HIPAA compliance, FHIR/HL7 integration, EHR/EMR systems, Patient Portals, Secure API Design

#### Frameworks & Tools

Spring Boot, React, Node.js, Express.js, Flutter, Bootstrap, Tailwind CSS

#### Cloud & DevOps

AWS (Lambda, S3, CloudWatch), Docker, Kubernetes, CI/CD Pipelines, GitHub Actions

#### Testing & Methodologies

TDD, Agile/Scrum, Postman, JUnit, Selenium

### Professional Experience

#### Java Full Stack Developer

Aug 2023 – Present

##### CVS Health

- Designed and implemented HIPAA-compliant web and mobile applications using Java, Spring Boot, React, and Flutter to enhance patient engagement and telehealth services.
- Developed secure RESTful APIs to integrate with EHR/EMR systems and pharmacy platforms, ensuring seamless patient data interoperability using FHIR/HL7 standards.
- Led migration of monolithic healthcare applications to microservices architecture on AWS, improving scalability and reliability.
- Built real-time patient dashboards and analytics tools enabling clinicians to track patient outcomes and optimize care delivery.
- Enhanced security and compliance by implementing data encryption, role-based access controls (RBAC), and audit logging per HIPAA standards.
- Automated deployment and monitoring processes through CI/CD pipelines and Kubernetes, reducing release cycle time by 50%.
- Collaborated with clinical, product, and QA teams to ensure regulatory compliance and high-quality software delivery.

- Conducted code reviews and mentored junior developers on best practices for secure healthcare application development.

## **Java Developer**

Jan 2019 – Nov 2021

### *Clairvoyant*

- Developed healthcare analytics platforms using Java, Spring Boot, and React to provide real-time patient and claims data visualization.
- Created secure APIs for integrating healthcare provider systems with third-party vendors and telemedicine solutions.
- Optimized database performance for large-scale patient and claims data using PostgreSQL and MongoDB, ensuring high availability and data integrity.
- Integrated predictive analytics and ML models for patient risk scoring and personalized care recommendations.
- Collaborated with data science teams and healthcare clients to enable data-driven clinical decision-making.
- Conducted performance tuning, unit testing, and regression testing to ensure application stability under high load.

## **Education**

### **Master of Science in Computer Science**

Jan 2022 – Dec 2023

*Montclair State University, NJ*

### **Bachelor of Engineering in Computer Science**

Aug 2017 – Jul 2021

*Osmania University, India*
