PROFESSIONAL SUMMARY

Accomplished **ServiceNow Developer** and Software Engineer with proven experience in **designing, configuring, and automating enterprise workflows**. Skilled in building custom **ServiceNow applications, Service Catalogs, Workflows, and integrations** to streamline IT and business operations. Strong expertise in **Glide APIs, Flow Designer, Script Includes, Business Rules, and UI Policies**, with hands-on experience across **ITSM, ITOM, SecOps, EA (former APM) and HRSD** modules. Adept at instance administration, performance tuning, and upgrades, as well as DevOps **CI/CD** integrations for scalable delivery. Full-stack developer background with strengths in **Java, SQL, and ReactJS** and cloud experience in **AWS**. Known for translating business requirements into innovative, user-centric technical solutions.

WORK EXPERIENCE

Service Oriented Solutions

Newark, CA

ServiceNow Developer/Administrator

July 2024 - Present

- Designed and configured **Service Catalog items, workflows, UI policies, and client scripts** to optimize request fulfillment processes.
- Developed custom applications and leveraged **Glide APIs, Script Includes, and Business Rules** to extend platform capabilities while adhering to best practices.
- **Integrated** ServiceNow with **third-party platforms** such as **JIRA, Lexmark, LDAP, SSO**, and custom **REST/SOAP APIs**, enabling seamless data exchange, identity management, and cross-platform automation.
- Administered multiple ServiceNow instances, managing **ACLs, roles, groups, and user administration** to maintain system security and compliance.
- Built **dashboards, scheduled jobs, and performance analytics** reports to improve operational visibility and decision-making for stakeholders.
- Implemented integrations with **third-party tools (REST/SOAP APIs, LDAP, and SSO)** for seamless data exchange and identity management.
- Gained expertise in **ITOM (Discovery, CMDB), SecOps (Incident Response, Vulnerability Response), and HRSD (case management, lifecycle events)** to support enterprise service delivery.
- Configured and maintained DevOps CI/CD pipelines with Change Velocity, automating change requests, testing, and deployments for faster, compliant releases.

University of Cincinnati

Cincinnati, OH

Administrator

February 2023 - April 2024

- Acted as the primary point of contact for residents and staff, ensuring smooth **communication and secure handling of confidential data**.
- Strengthened operational efficiency by coordinating **incident responses** and implementing process documentation to support compliance.

Cognizant Technology Solutions

Hyderabad, INDIA

Servicenow Administrator/Developer

May 2021 - December 2022

- Provided L2/L3 support and administration across multiple **ServiceNow instances**, including **patching, cloning, and upgrades**, ensuring minimal downtime.

- Configured **Incident, Problem, Change, and Knowledge Management** modules, improving IT service delivery and **SLA** adherence.
- Implemented automation using **workflows, notifications, and inbound email actions**, reducing manual effort and response times.
- Supported **CMDB population and Discovery configuration**, improving accuracy of infrastructure data and dependency mapping.
- Developed custom **dashboards and performance analytics** reports to track KPIs for IT service management.
- Contributed to **web application development (Java, Spring Boot, ReactJS)** for internal tools, showcasing versatility across **ServiceNow and full-stack solutions**.

EDUCATION

University of Cincinnati	Cincinnati, USA
<i>Master's Degree in Information Technology</i>	April 2024
Visvesvaraya College of Engineering & Technology	Hyderabad, India
<i>Bachelor's Degree in Computer Science Engineering</i>	April 2021

PROJECT EXPERIENCE

- Cyber Threats in the Banking Sector**
Research on Cyber Threats and Mitigation in Banking
- Authored a research paper detailing various cyber threats in the banking sector and proposing solution prototypes and visual models for mitigation.
- Leaf Infection Detection**
Employed AI computer vision and Deep Learning to detect leaf infections
- Developed and deployed a Deep Learning model using AI computer vision to automate leaf infection detection, enhancing agricultural monitoring through accurate, real-time analysis of leaf images.
- Mushroom Classification**
Classification of mushrooms as edible or non-edible using advanced Machine Learning techniques
- Developed and deployed a Machine Learning model for classifying mushrooms as edible or non-edible, involving comprehensive data preprocessing and analysis, enhancing safety and decision-making in mushroom consumption.

COMPUTER & TECHNICAL SKILLS

ServiceNow: ITSM, ITOM, SecOps, HRSD, Flow Designer, Script Includes, Glide APIs, UI Builder (UIB), Integrations (REST, SOAP, LDAP, SSO)

Programming: Java, JavaScript, Python, SQL, HTML, CSS, ReactJS, Data Structures & Algorithms

Cloud & Networking: AWS, OSI & TCP/IP Models

Other Domains: Cybersecurity, Artificial Intelligence, Machine Learning

CERTIFICATIONS

ServiceNow, WordPress, Core Java, Advanced Java, Spring, Spring MVC, Spring Boot, HTML, CSS, Bootstrap, JavaScript, MYSQL and ReactJS
