Work Experience

Foundation for Innovative New Diagnostics (FIND)

Deputy Director of Information Systems | February 2022 – March 2025

FIND is an International non-profit organization and a strategic partner of the World Health Organization (WHO).

- Reporting to the COO, delivered \$2.3M in value over 3 years by developing and executing FIND's digital transformation roadmap covering its 23-country operations.
- Led the Agile-driven development of the AI-enabled Tuberculosis diagnostics validation platform, reducing test validation time by 25% and improving diagnostic precision.
- Developed and implemented an enterprise-wide cybersecurity framework, including risk assessment, policy, training, and incident response, strengthening data protection, threat detection, and compliance.
- Managed the deployment of an Enterprise Performance Management (CCH Tagetik), reducing the budget planning cycle by 35% and improving forecast accuracy.
- Streamlined Salesforce CRM processes for the Organization's \$160M grants portfolio, covering resource mobilization, grants management, and donor engagement.

AP Moller-Maersk

Senior Program and Country IT Manager | June 2021 – November 2021

AP Moller Maersk is the world's second-largest provider of container shipping, port operations, and logistics solutions.

- Designed the IT infrastructure modernization plan, reducing downtime by 15% across port operations.
- Delivered the Terminal Operating System upgrade, leading 16 cross-functional team members to deliver a major version upgrade, improving system performance and introducing simplified business processes.
- Led the review and redesign of the technology organizational structure across the West Africa region, aligning capabilities with strategic business needs and regional growth priorities.

Tropical General Investments Group

Information Technology Director | October 2019 – May 2021

Tropical General Investments Group (TGI Group) is an international investment and holding company that manufactures consumer goods and pharmaceutical brands.

- Led \$4.6M digital transformation across six countries and 15 subsidiaries, covering SAP S/4HANA, MS Dynamics 365 BC ERP deployments, and digital workplace solutions.
- MS Dynamics 365 BC ERP deployment delivered an 18% improvement to the financial reporting timeline by automating critical data consolidation steps
- Launched ITIL-aligned service desk, cutting incident response time by 40% and resolution time by 16%.

Diageo Plc

Senior Program Manager, IT Business Engagement and Transformation | March 2017 – September 2019

Diageo is a premium drinks business, the owner of the Johnny Walker, Smirnoff, Guinness, and Baileys brands.

- Program Manager on the Commercial Lean Review for the West Africa region, uncovering \$8.2M in operational inefficiencies and optimizing business processes.
- Led the strategic review of the Order to Cash (OTC) process for East Africa, unlocking \$4.6M in financial gains within 18 months.
- Managed seamless technology integration for two mergers and acquisitions, achieving business and IT alignment.

Diageo Plc

Regional IT Service Delivery Manager | July 2013 – March 2017

- Service Introduction Lead on cross-country SAP ERP implementations, ensuring seamless transition into operations, validating readiness across business units, and embedding support structures to sustain adoption.
- Promoted cloud computing adoption, cutting infrastructure costs by 4% while improving availability.
- Developed the IT capacity planning and enterprise architecture roadmaps, aligning resources and IT strategy to business growth objectives.
- Established Agile practices, integrating automation tools to streamline deployment operations.

Diageo Plc

M&A Technology Integration Lead | December 2011 – July 2013

- Led technology integration for \$225M factory acquisition, developing an integration strategy, ensuring optimal performance, scalability, and high availability of services.
- Directed change management efforts, achieving seamless adoption of new technologies and systems for 6,000+ end users.
- Strengthened cybersecurity management, implementing robust security policies, security monitoring, and endpoint management solutions.
