SUMMARY

- DevOps Engineer with 5+ years of experience in designing and implementing automation solutions across multi-cloud and hybrid environments.
- Skilled in building and maintaining CI/CD pipelines using Jenkins, GitLab CI, and GitHub Actions to support efficient software delivery.
- Proficient in Kubernetes, Docker, and Helm for containerization and orchestration of scalable microservices architectures.
- Experienced in writing Infrastructure as Code using Terraform and managing configurations with Ansible for consistent deployments.
- Strong command over monitoring and logging tools including Prometheus, Grafana, and ELK Stack to ensure system reliability and performance.
- Well-versed in implementing secure DevOps practices using IAM, Vault, TLS/SSL, and Kubernetes RBAC.
- Adept at scripting in Python, Bash, and Go to automate workflows and streamline operational tasks.
- Collaborative team player with a solid foundation in Agile methodologies, skilled in using Jira, Confluence, and Slack for cross-functional coordination.

SKILLS

- **Programming & Scripting:** Python, Bash, Go
- **Cloud Platforms:** AWS, Microsoft Azure, Google Cloud Platform (GCP)
- **Containerization & Orchestration:** Docker, Kubernetes (Helm, RBAC, Ingress)
- **CI/CD Tools:** Jenkins, GitLab CI, GitHub Actions
- **Version Control Systems:** Git, GitHub, GitLab
- **Infrastructure as Code & Configuration Management:** Terraform, Ansible
- **Monitoring & Logging:** Prometheus, Grafana, ELK Stack, AWS CloudWatch
- **Operating Systems:** Linux (Red Hat, Ubuntu), Windows
- **Databases:** MySQL, PostgreSQL, Redis
- **Networking & Security:** VPN, Vault, IAM, TLS/SSL, Security Groups
- **Collaboration & Agile Tools:** Jira, Confluence, Slack
- **Other Skills:** Microservices, Hybrid & Multi-cloud Environments

WORK EXPERIENCE

DXC Technologies

Jan 2025 – Present

Senior DevOps Engineer

- Architected and deployed multi-cloud infrastructure using modularized Terraform across AWS and GCP, enabling platform scalability and reducing environment setup time by 50%.
- Implemented GitHub Actions workflows integrated with advanced Ansible playbooks for zero-touch, policy-compliant CI/CD automation across Kubernetes-managed microservices.
- Designed service mesh-enabled Kubernetes clusters with observability stacks (Prometheus, Grafana, ELK), cutting incident detection time by 40% and improving system uptime.
- Enforced zero-trust security policies using IAM, Vault, and TLS/SSL across containerized applications, achieving full compliance with internal cybersecurity standards.

Infosys

Jan 2020 – July 2023

DevOps Engineer

- Engineered and maintained cloud-native CI/CD pipelines using GitLab CI and GitHub Actions to support AI-driven microservices across hybrid cloud environments.
- Built reusable Terraform modules for provisioning GCP and Azure infrastructure, reducing provisioning time by 45% across development and production stages.
- Containerized machine learning models using Docker and deployed them via Kubernetes with Helm, improving deployment consistency and scalability.
- Implemented RBAC and Ingress configurations in Kubernetes clusters to enforce access control and ensure secure service exposure.
- Integrated Prometheus and Grafana for proactive monitoring of AI pipelines, reducing mean time to detect (MTTD) anomalies by 35%.

- Leveraged Vault for secrets management, automating credential rotation and enhancing pipeline security compliance with enterprise policies.
- Collaborated with data scientists to streamline model retraining workflows through GitOps practices and GitLab CI pipelines.
- Automated database provisioning and configuration (PostgreSQL, Redis) to support high-performance data operations across AI workloads.
- Contributed to Agile sprints using Jira and Confluence, achieving a 98% on-time delivery rate across iterative development cycles.

Trigent Software

July 2018 – Dec 2019

Associate DevOps Engineer

- Designed and integrated automated test stages into Jenkins-based CI/CD pipelines, reducing manual QA efforts by 40% and accelerating release cycles.
- Developed shell and Python scripts to automate environment setup, deployment, and test execution across Red Hat Linux and Windows servers.
- Collaborated with QA and development teams to incorporate unit, integration, and smoke testing into build pipelines, achieving 30% higher test coverage.
- Managed version control and pipeline triggers using Git and GitHub to ensure reliable code integration and deployment workflows.
- Provisioned AWS EC2 instances and configured IAM roles, enabling secure access and compute scalability for testing environments.
- Deployed and maintained Ansible playbooks for consistent environment provisioning and configuration across test and staging servers.
- Monitored pipeline performance and system health using AWS CloudWatch and CloudTrail, identifying bottlenecks and optimizing build times by 25%.
- Facilitated agile ceremonies and sprint reviews via Jira and Slack to ensure real-time collaboration across cross-functional DevOps teams.

PROJECTS

CI/CD Pipeline Optimization

- Designed and implemented an end-to-end GitLab CI pipeline with integrated Docker container builds and Kubernetes deployment strategies to automate and streamline the application delivery process.
- Introduced pipeline efficiency improvements by configuring parallel job execution, artifact caching, and dynamic environment provisioning, significantly enhancing deployment speed and consistency across environments.

Kubernetes Monitoring Stack

- Architected and deployed a monitoring solution using Prometheus and Grafana to enable real-time visibility into microservice health, resource utilization, and performance metrics.
- Centralized log aggregation using the ELK Stack (Elasticsearch, Logstash, Kibana), ensuring comprehensive observability across Kubernetes clusters, improving incident diagnosis and traceability across distributed applications.

EDUCATION

Master in Computer and Information Sciences

Aug 2023 – May 2025

Saint Louis University, Saint Louis, MO | GPA: 4.0

Bachelor in Electronics and Communication Engineering (ECE)

Apr 2015 – Apr 2019

MTIET, Palamaner, India | GPA: 7.0 / 10
