

Ben Desmarais

Senior Full-Stack Developer

Las Vegas, NV 89110 • ben.desma.dev@gmail.com • linkedin.com/in/ben-desmarais-2a670b351

SUMMARY

Senior Full-Stack Developer with **React, Angular, Django, and Node.js** expertise. Experienced in **AI development** using **TensorFlow** for machine learning applications. Skilled in building scalable apps, optimizing performance, and implementing CI/CD pipelines with **Docker** and **Kubernetes**. Proficient in **real-time data visualization**, and **leading agile teams** to deliver solutions in healthcare, gaming, and eCommerce.

SKILLS

- HTML5/CSS3, JavaScript, TypeScript, Python
- React, Vue, Angular, Next.js, Tailwind CSS
- Express.js, NestJS, Django, Flask, MySQL, PostgreSQL, MongoDB
- REST APIs, GraphQL
- TensorFlow, Keras, Transformers, LLM, Pandas, Numpy, OpenAI
- AWS, Docker, Kubernetes, Git, Jira
- Jest, Cypress, PyTest

PROFESSIONAL EXPERIENCE

Format Health

Remote

Full-Stack Developer

FEB 2024 - Feb 2025

- Led the development of AI-driven healthcare platform for personalized health insights, utilizing machine learning techniques and web development technologies like **React, Flask, and PostgreSQL**.
- Built and deployed a Q&A system using **BERT** and **Apache Lucene** for enhanced natural language understanding, improving search accuracy and content validation processes within the platform.
- Spearheaded the **creation of a video conferencing platform** for multi-participant health consultations, integrating **MediaSoup WebRTC**, ensuring scalable, low-latency video and audio quality for seamless telehealth experiences.
- Integrated external health data sources, including **HealthKit** and **Google Fit APIs**, to synchronize real-time health data across mobile apps and wearable devices, providing users with actionable insights and improving data-driven decision-making.
- Established and maintained a **CI/CD pipeline using Docker and Kubernetes**, automating deployments and reducing time to production while maintaining high-quality code through automated testing and continuous delivery.
- Collaborated with healthcare providers to gather requirements, ensure compliance with medical standards, and develop a user-centric healthcare platform.
- Conducted professional code reviews, ensuring code quality, security, and adherence to best practices.

DataToBiz

Remote

Full-Stack AI Developer

Apr 2021 - Jan 2024

- **Contributed to developing HirelakeAI**, an automated hiring tool designed to streamline the candidate selection process, reducing time, effort, and costs.
- **Trained a Named Entity Recognition (NER)** model using categorized text sections, enabling the extraction of key entities such as candidate names, education details, and work experience with enhanced precision and efficiency.

- Developed an automated interviewing system using **OpenAI Whisper** for **speech-to-text conversion**, validating candidate answers and assigning scores.
- **Participated in developing the PrepAI project** which generates questions from given content.
- **Developed and maintained client-side web applications** using **React** and **Vue.js** resulting in improved user interface responsiveness and experience.
- Designed and implemented **RESTful APIs** using **Node.js** and **Flask**, facilitating seamless communication between client-side and server-side data source.

Slalom Consulting

Seattle, WA

Full Stack Developer

JUNE 2017- Mar 2021

- Designed, developed, and maintained **over 10 web-based applications** to **enhance the performance and reliability** of the **existing applications**, as well as participated in the development of **new industry-leading products**.
- **Built 3 websites from scratch based on Figma mockups** with landing pages using **React, Tailwind CSS**, and **Node.js** in collaboration with designers.
- Developed an effective filter system tailored to specified properties for a data operating system for delivering transparency and trust in the value of private market assets.
- **Optimized more than 10 functional parts of the applications**, which increased performance by at least 20%.
- **Applied and maintained automated testing frameworks** to ensure the quality and reliability of software, integrating them into the CI/CD pipelines.
- **Improved the stability of the applications by fixing more than 40 bugs in 5 months**, and improved the stability of more than 5 functional components by covering the code with tests from 40% to 90% using **Jest**.

YouTube AI (Google Research)

San Francisco, CA

AI Research Intern

SEP 2016- Feb 2017

- **Contributed to the training and evaluation of early content moderation AI**, supporting research on automated detection of inappropriate content
- **Support large-scale data analysis and model benchmarking** for YouTube's personalized recommendation system, using TensorFlow and Google Cloud
- **Collaborate with senior researchers and engineers** from Google Research and YouTube AI, contributing to experimental design and model evaluation

EDUCATION

University of Nevada-Las Vegas

Bachelor of Science in Computer Science

LAS VEGAS, Nevada

AUG 2013 - May 2017
