

BENEDICT ASAKA

benedict.asaka1@gmail.com | 678-861-3724 | Atlanta, GA 30339

Professional Summary:

A results-driven and highly motivated AWS Cloud Security, Infrastructure & DevOps Engineer with over 9 years of extensive hands-on experience in cloud orchestration, security, identity and access management, and cost optimization. I bring deep expertise in AWS, Kubernetes, Terraform, CI/CD, Ansible, Git, Linux, Shell Scripting, Python, Docker, Jenkins, and monitoring tools. I excel at designing and deploying scalable, secure cloud environments and am highly adept at real-time issue resolution and process optimization. My proficiency in Security, automation and infrastructure as code ensures efficient, reliable, and cost-effective solutions that align with business objectives. My approach is rooted in a commitment to continuous improvement, driving innovation, and delivering tangible results..

Key Skills

- **Version Control System:** Git, GitHub
- **Continuous Integration (CI):** Jenkins, GitHub Actions
- **Build automation and Code analysis tools:** Maven, Sonarqube, Checkov
- **Artifactory and package manager:** Nexus, Docker Hub, Helm for Kubernetes
- **Configuration Management Tools:** Ansible
- **Containerization:** Docker
- **Container Orchestration:** Kubernetes, AWS EKS (Elastic Kubernetes Services)
- **Container Registries:** Docker Hub, AWS ECR (Elastic Container Registry)
- **Deployment tool:** ArgoCD Cluster
- **monitoring tools:** Prometheus, Griffin
- **SDLC (Software Development Life Cycle):** Agile, Scrum Web Servers: Apache Tomcat, Nginx
- **Languages:** Bash Shell scripting, Python, JavaScript Infrastructure as code: Terraform, Jenkinsfile
- **Databases:** MySQL, Postgres, MongoDB, Redis
- **Bug Tracking and Documentation:** Jira, Confluence
- **Security:** SAST (Static Application Security Testing): SonarQube
- **DAST (Dynamic Application Security Testing):** OWASP ZAP, Burp Suite
- **SCA (Software Composition Analysis):** Snyk
- **Communication Tool:** Slack, TeamCloud Technologies: AWS: EC2, IAM, S3, VPC, Route53, ECS, SNS, Lambda, CloudWatch, Autoscaling Security group, Elastic Load Balancer.
- **GCP:** IAM, Prisma Cloud, Google CSPR. Cloud Risk Assessment
- Security Incident Response
- Data Encryption Techniques
- Container Security
- Multi-Factor Authentication

Relevant Experience

MORGAN STANLEY

CLOUD SECURITY ENGINEER/ARCHITECT

OCT 2023 – Present

- Delivered reliable 24/7 production support with an average response time of under 10 minutes and issue resolution within an hour.
- Continuously stayed up-to-date with the latest AWS advancements and industry trends, actively refining skills and proposing innovative cloud solutions.
- Assisted in the assessment and implementation of IAM solutions, including access policies, role-based access control (RBAC), and authentication mechanisms. - Conducted regular user access reviews to ensure the principle of least privilege and adherence to security policies.

- Analyzed migration from the existing on-premises infrastructure to Office365 and Azure directly.
- Set up and executed Active Directory and Azure Risk Assessment plans on board using Azure Migrate and Azure Site Recovery.
- Analyzed and implemented plans concerning capacity planning and performance tuning.
- Engaged customer ISPs to link new connections to reduce the time spent accessing confidential deployments in the cloud.
- Facilitated knowledge transfer (KT) sessions to customer representatives on Microsoft Azure IaaS services such as Compute, Networking, Database, Storage, Backup and Archive, DR, Security, Monitoring, etc.
- Managed and maintained IAM tools and systems, ensuring their availability,
- reliability, and performance. - Collaborated with IT and security teams to respond to security incidents, enforce access controls, and investigate unauthorized access.
- Assisted in the development and documentation of IAM processes and procedures.
- Conducted user training and awareness programs to foster a security-conscious culture.
- Monitored AWS Security events, performed log analysis, and responded to
- security incidents.
- Conducted regular security awareness training for employees to promote security best practices.
- Assisted in compliance efforts by maintaining documentation and ensuring adherence to regulatory standards.
- Managed encryption and key management for sensitive data stored in AWS

**DELOITTE – CLOUD SOLUTIONS
ARCHITECT.**

Oct 2021 – Oct 2023

- Orchestrated the migration of legacy systems to AWS, significantly reducing on- premises hardware costs while enhancing system scalability and agility.
- Improved deployment processes by implementing and maintaining CI/CD pipelines using Jenkins and AWS CodePipeline, leading to increased deployment frequency.
- Contributed to the optimization of AWS security processes, improving efficiency and reducing risks.
- Automated infrastructure provisioning and configuration management with Terraform and Ansible, reducing manual efforts and increasing operational efficiency.
- Engineered highly available and fault-tolerant AWS architectures, ensuring uptime for critical applications and maintaining seamless business continuity.
- Optimized AWS operational costs through strategic use of auto-scaling, instance rightsizing, and spot instances for cost-effective resource allocation.
- Developed and managed comprehensive monitoring and alerting frameworks using
- AWS CloudWatch and Grafana, improving incident detection and resolution times.
- Performed regular performance optimizations of AWS services, boosting
- application responsiveness and enhancing the overall user experience.
- Led security initiatives by integrating IAM policies, encryption, and VPC configurations, ensuring robust security and compliance with industry standards.
- Mentored and developed junior team members in AWS solutions, DevOps practices, and automation tools, fostering a culture of continuous learning and professional growth.
- Provided reliable 24/7 production support with rapid response and resolution times, ensuring maximum system reliability and availability.

**MANHATTAN ASSOCIATES Atlanta,
GA DEVOPS ENGINEER**

Sept 2016 - Oct 2021

- Managed and optimized AWS cloud infrastructure to enhance scalability, reliability, and cost-efficiency by strategically leveraging services like EC2, S3, RDS, and Route 53.
- Designed and deployed fault-tolerant systems on AWS, achieving high availability and implementing disaster recovery solutions with a recovery time objective (RTO) of under one hour and a recovery point objective (RPO) of under 15 minutes.
- Automated of manual provisioning and configuration tasks using infrastructure as

- code (IaC) with Terraform, significantly reducing deployment times and errors.
- Conducted in-depth performance monitoring and capacity planning, optimizing resource utilization and achieving a significant reduction in overall AWS service costs.
- Led security improvements across cloud environments, implementing robust IAM policies, VPC configurations, and encryption strategies, reducing security incidents by 50% and enhancing data protection.
- Spearheaded migration projects from on-premises to AWS, successfully transitioning over 10 major applications and databases with minimal disruption.
- Mentored junior engineers, increasing team productivity and AWS best practices proficiency by 20%.
- Orchestrated containerization strategies with Docker and managed container deployments using Amazon ECS and Kubernetes, optimizing scalability and resource efficiency.
- Implemented a comprehensive monitoring and logging framework using AWS CloudWatch and the ELK stack, improving issue detection and accelerating mean time to resolution.
- Designed fault-tolerant, high-availability architectures spanning multiple AWS regions, ensuring uptime for mission-critical applications.
- Spearheaded security initiatives by implementing encryption, IAM policies, and VPC configurations, significantly reducing security vulnerabilities.
- Drove cost optimization efforts in AWS by managing cost allocation tags and right-sizing resources, reducing overall operational expenses.

EDUCATION

- Bachelor of Science: Computer Science – University of Benin
- Masters of Science: Project Management - University of East London

CERTIFICATIONS

- AWS Certified DevOps – Professional
- AWS Certified Security Specialty Professional
- Google Cloud Engineer Professional
- Security+601
- Certified Kubernetes Developer (CKAD)
- Terraform Associates
- Microsoft Azure Solutions Architect
