

Bhagya Raj Meesala

Sr. Oracle Database Administrator

ORACLE
Certified Associate
Oracle 11g Administrator

Email: m.bhagyaraj@gmail.com | **Cell:** +1(925) 528-1589 | **LinkedIn:** [Linkedin.com/in/mbhagyaraj/](https://www.linkedin.com/in/mbhagyaraj/)

Location: California, US.

Summary

- Highly accomplished and results-oriented Oracle Certified Database Administrator with 18 years of experience managing mission-critical Oracle environments across the full DBA lifecycle.
- Expertise encompasses RAC implementations (up to 9 nodes), cloud migrations (AWS RDS), robust backup and recovery strategies, disaster recovery planning, performance tuning at all levels (server, instance, query, and application), high availability, and robust security practices.
- Proven ability to lead complex migrations and upgrades, including cross-platform and cloud transitions.
- Proficient in a wide range of Oracle versions (8i through 19c) and related technologies, including ASM, Data Guard, GoldenGate, RMAN, OEM, Terraform, and scripting languages (Shell, Python).
- Deep understanding of Oracle architecture and internals, complemented by experience in Redshift, Snowflake, PostgreSQL, and MySQL administration.
- Reduced long-running query instances by an estimated 30% through automated alerting and escalation, minimizing performance bottlenecks and improving overall database responsiveness.
- Accelerated key DBA operational tasks by an estimated 50% through automation of password management, user provisioning/deactivation, and data refreshes, freeing up DBA time for strategic initiatives.
- Minimized potential data loss and improved data replication reliability by 20% by implementing proactive GoldenGate monitoring and alerting for process abends, hangs, lags, and trail file skipping.
- Automated multiple daily operational activities related to database administration using shell scripting, including proactive query management, temp space monitoring, automated backups, and archive log management. This automation significantly reduced manual effort and improved the overall efficiency of database operations.

Technical Skills

- **Databases:** Oracle (8i-19c), Exadata, MySQL, PostgreSQL, Redshift, Snowflake, Amazon Aurora
- **Operating Systems:** RHEL/CentOS, Oracle Linux, HP-UX, Sun Solaris, AIX, Windows
- **Programming & Scripting:** SQL, PL/SQL, Shell Scripting, Python, C, Windows Batch
- **Data Replication:** GoldenGate, Data Guard, Materialized Views
- **DBA Tools & Utilities:** RMAN, Data Pump, SQL*Loader, Performance Tuning (Tkprof, SQL Trace, Explain Plan, Statspack, AWR, ADDM), OEM Grid Control, Cohesity, Rubrik, Data Domain, Alation, Toad, SQL Developer, PuTTY, xterm, UC4, Cron, Alation, DBeaver
- **Cloud:** AWS (RDS, DMS, Redshift), Terraform

Professional Experience

Salesforce Inc., San Francisco, CA

Sr. Database Administrator | Oct 2015 – Present

- Designed, implemented, and managed Oracle RAC clusters (2-8 nodes) using ASM. Successfully performed RAC and ASM upgrades, minimizing downtime.
- Expert in identifying and resolving performance bottlenecks through server-side and application tuning, leveraging AWR and OEM.
- Developed and implemented RMAN-based backup, recovery, and cloning strategies, ensuring minimal RTO and RPO. Knowledge of handling backup appliances and managing backups, restores on Cohesity, Rubrik and Data Domain.

- Led numerous successful Oracle database upgrades and migrations, including complex cross-platform and on-premise to AWS RDS migrations using AWS DMS. Good with managing databases on Exadata along with migrating Oracle databases from non-Exadata to Exadata and vice versa.
- Implemented robust disaster recovery solutions using Oracle Data Guard and other standby technologies.
- Proficient in Oracle GoldenGate for real-time data replication, performance tuning, and monitoring.
- Experienced with AWS cloud services, including RDS for Oracle, DMS, and Redshift. Utilized Terraform for infrastructure as code.
- Automated routine DBA tasks (monitoring, backups, reporting) using shell scripting and Python.
- Implemented Oracle database security measures, including SSL/TCP configuration, user/privilege management, auditing, and data encryption.
- Served as SME for Oracle database backup and recovery and UNIX shell scripting.
- Installed ASM environments and migrated databases from non-ASM to ASM.

Tech Mahindra

Oracle Database Administrator | Feb 2012 – May 2015

(Santander Consumer Bank, Austria)

- Designed, implemented, and managed Oracle Data Guard solutions for DR and HA.
- Implemented and managed RMAN-based backup & recovery strategies for standalone, RAC Databases on Linux.
- Successfully recovered production databases from backups following failures and corruption.
- Performed database cloning for various environments using RMAN and other methods.
- Managed multi-terabyte Oracle databases (10g, 11g) on RAC and standalone configurations. Performed upgrades and migrations, minimizing downtime.
- Performed performance tuning and application monitoring using tools like Toad, AWR, and Explain Plan. Managed database elements, security, and provided troubleshooting support.
- Automated administrative tasks and developed optimized SQL/PL/SQL scripts.

Hewlett-Packard (HP), Malaysia

IT Service Delivery (Oracle DBA) | Feb 2011 – Feb 2012

(Nokia Telecom)

- Collaborated with developers to optimize database interactions through code review.
- Developed and maintained shell scripts for data processing and database support.
- Proactively managed database capacity and performed database object maintenance.
- Executed database migrations, including standalone to RAC conversion and TDE implementation.
- Automated database administration tasks using shell and SQL scripts.

Satyam Computers, India

Oracle DBA | Jan 2007 – Oct 2010

(GE Money Bank Austria)

- Managed Oracle database environments, including setup, maintenance, and support.
- Automated key database administration tasks, including backup and recovery.
- Proactively monitored database health and performance, resolving issues like deadlocks and corruption.
- Supported development teams with SQL query writing and troubleshooting.

Education and Certifications

- B.Tech in Information Technology and Computer Science, JNTU, India – 2006
- Oracle 11g Database Certified from Oracle Corporation

Awards and Recognition

- Pursuit of Excellence Award (Satyam, 2010)
- BRAVO Award (Tech Mahindra, 2014)

- 3 Rockstar Awards (Salesforce, 2020, 2023, 2024)
- Runner-up, Ignited Innovation Award (Tech Mahindra, 2015)
- Multiple Pat-on-the-Back (POB) Awards (Satyam, 2009; Tech Mahindra, 2013)
