PROFESSIONAL SUMMARY

8 years as a Senior Java Full Stack Developer specializing in scalable enterprise applications using Java, Spring Boot, and Golang. Successfully developed microservices for data extraction and integration across Banking, Healthcare, E-commerce, and Automotive sectors. Well-versed in Agile methodologies, cross-functional collaboration, and modern front-end frameworks like React and Angular, delivering reliable and secure solutions.

TECHNICAL SKILLS

- **Programming Languages:** Java, J2EE, Jakarta EE, C, PL/SQL, JavaScript, Python, Golang
- **Web Technologies:** HTML5, CSS3, AJAX, JSON, Bootstrap, jQuery, React JS, Angular 6/8/10/12/14, Redux, NodeJS, Express JS, Vue JS, Next JS, Spring Boot, JBPM, Front-end Frameworks
- **Java EE Technologies & Frameworks:** Servlets, EJB, JSP, JSF, JDBC, SOAP, WSDL, REST, XML, JAXP, JAXB, JPA, JMS, Spring3.x/4.x/5.x, Hibernate, Spring MVC, Spring Boot, Spring Data, Spring Batch, Spring cloud, Dump Analysis, Microservices
- **Databases:** Oracle 10g/11g/12c, MS-SQL Server, NoSQL, DB2, Mongo DB, Dynamo DB, Couch DB, SOA, OPA, CASSANDRA, PostgreSQL
- **Application/Web Servers:** Oracle Web logic, IBM Web Sphere, JBoss, Glassfish, Apache Tomcat
- **Messaging Services:** JMS, Active MQ, Rabbit MQ, IBM MQ, Apache Kafka
- **Web Service Frameworks:** JAX-RS, JAX-WS, Axis, Jersey
- **Software Methodologies:** Agile, Scrum, TDD, Waterfall
- **Build & Configuration Tools:** Ant, Maven, Gradle, Jenkins, Bamboo, Gulp, Grunt, Webpack, NPM, Bower
- **Testing Tools:** Junit, TestNG, Mockito, Jasmine, Karma, Mocha, Selenium, Protractor
- **Version Control Tools:** GIT, SVN, CVS, Bitbucket, TFS
- **Project Management Tools:** JIRA, Rally, Microsoft Project
- **Cloud Technologies & DevOps Tools:** AWS, PCF, EC2, EBS, S3, Docker, ECS, EKS, SQS, SNS, RDS, S3, Glacier, Lambda, Kubernetes
- **Operating System:** Windows, Linux, Unix, MAC-OS
- **IDEs:** Eclipse, Visual Studio, IntelliJ, Spring Tool Suite, Sublime Text, WinSCP, Putty

PROFESSIONAL EXPERIENCE

Bank of America

May 2024 - Present

Sr Software Engineer

New York

- Developed scalable web applications by integrating REST APIs with Spring frameworks and leveraging full stack technologies such as AngularJS and Node.js.
- Engineered microservices with a focus on performance and security, utilizing Spring Boot approaches while also ensuring real-time data exchange using Socket.io and MongoDB.
- Customized Node.js servers and implemented MVC patterns to facilitate robust front-end (AngularJS) to back-end (MongoDB) communication and real-time web APIs.
- Optimized API Gateway for runtime governance and security, contributing to scalable microservices architecture.
- Migrated on-premise infrastructure to cloud environments using AWS and Azure, emphasizing secure deployment practices and high availability.
- Designed and developed microservices integrating MongoDB for data monitoring and business reporting, ensuring seamless application performance.
- Performed performance tuning on Mongo queries by implementing effective indexing and shard key strategies.
- Utilized a range of web technologies including JavaScript, HTML, CSS, and Bootstrap to create responsive and accessible user interfaces.
- Developed RESTful and SOAP web services using frameworks like Jersey and Spring, reinforcing the robustness of enterprise application communication.
- Integrated centralized configuration using Spring Cloud and implemented logging and troubleshooting with Kibana ELK tools.

Macy's

Jan 2023 - Apr 2024

Sr Software Engineer

Torrance, CA

- Designed and developed REST-based microservices using Spring Boot and Spring Data with JPA to support scalable application architectures.
- Implemented full stack solutions by integrating Spring Framework modules (Spring IOC, Spring Security, Spring Batch) with modern front-end frameworks such as AngularJS and ReactJS.
- Enhanced application performance through multi-threaded Java development techniques and efficient resource management.
- Integrated front-end components with back-end REST APIs, demonstrating proficiency in building interactive UI experiences using AngularJS and jQuery UI.
- Deployed microservices within Docker containers and leveraged AWS EC2 services, ensuring cloud-ready, scalable deployments.

- Configured continuous delivery pipelines using Jenkins CI, supporting agile development and fast release cycles.
- Utilized enterprise-level Node.js programming to support service-based applications and integrated Apache Kafka for effective messaging.

Goldman Sachs

Aug 2021 - Dec 2022

Software Engineer

Dallas, TX

- Supported core Java backend processes while interfacing with NOSQL AWS and MySQL databases, underscoring expertise in database integration.
- Developed RESTful APIs using JAX-RS and enhanced communication between services by applying Go/Java design patterns within a microservices architecture.
- Built full stack applications by integrating AngularJS and React for front-end development with Spring Boot based back-ends.
- Demonstrated proficiency in developing scalable microservices and cloud-native applications using Spring, Hibernate, and Spring Boot.
- Enhanced production support by troubleshooting and resolving integration challenges using ELK stack and centralized logging practices.
- Engineered modern web portals using AngularJS and Spring Boot technologies, deployed within Docker containers on AWS EC2.
- Built progressive web applications (PWA) with React, Material-UI, and Redux, showcasing a full stack development approach.

CVS Healthcare

May 2020 - Jun 2021

Software Engineer

Woonsocket, RI

- Developed robust and scalable web applications using J2EE technologies, including Servlets, JSP, and JDBC, with a focus on maintainable code architecture.
- Implemented MVC patterns with Spring MVC and Spring Boot to enable a clear separation of concerns and efficient back-end processing.
- Designed cloud-integrated solutions on Azure, AWS, and other hybrid cloud platforms, ensuring continuous integration and deployment.
- Enhanced front-end user experiences using JavaScript, HTML, CSS, and AngularJS, contributing to responsive and interactive UI designs.
- Leveraged RESTful API development using Python micro-frameworks and integrated Kubernetes with CI/CD pipelines for streamlined deployments.
- Optimized database interactions with PL/SQL and MySQL, ensuring data integrity and efficient access patterns.
- Adopted Agile methodologies (SDLC, XP, Scrum) to drive iterative development and cross-functional collaboration.

Toyota

Aug 2017 - Dec 2019

Jr. Java/J2EE Developer

India

- Designed and implemented multi-tier full stack applications using Java 8, Spring Boot, and AngularJS, aligning with modern software development practices.
- Developed comprehensive web-based solutions by integrating back-end Java components with dynamic front-end interfaces built on HTML5, CSS3, and JavaScript.
- Utilized core Java, J2EE, and JDBC to establish robust, scalable service layers while ensuring seamless integration with AngularJS-driven user experiences.
- Supported enhancements and optimizations in web and client-server applications using Python and Django, reinforcing full stack development capabilities.
- Implemented API-driven architectures and integrated diverse data sources (Oracle, PostgreSQL, NoSQL) within a cohesive application framework.
- Leveraged build and configuration tools such as Maven, Jenkins, and Git to streamline development cycles and maintain high code quality.

EDUCATION DETAILS

Cleveland State University

Jan 2020 - Aug 2021

Masters, computer and Information Science

JNTU University

Aug 2014 - Aug 2018

Bachelors of Technology, Computer Science & Engineering
