

Bhavani Sai Sivani Chandaka

Software Engineer

bhavani.s@myjobsmails.com | +1 (904) 274-0139 | [LinkedIn](#) | Sunnyvale, CA

SUMMARY

A highly skilled software engineer with over five years of experience building scalable web applications, particularly within the financial sector. Proficient in both back-end development using Java, Spring Boot, and Hibernate, and front-end technologies like Angular and React, creating dynamic and responsive solutions. Expertise extends to RESTful API implementation, SQL database optimization, cloud technologies (AWS, Docker, Kubernetes), and real-time data processing with Spark and Kafka.

EXPERIENCE

Java Developer **Feb 2024 - Current**

Compnova Inc

- Developed and optimized Java microservices, resulting in a 20% reduction in API response time and a 15% decrease in server load.
- Implemented RESTful APIs, integrating 12 third-party services, automating key business processes and reducing manual data entry by 30%.
- Created responsive React.js UIs, leading to a 10% increase in user engagement (measured by time spent on the application).
- Deployed and managed applications on AWS using Docker and Kubernetes, automating deployments and reducing release cycles by 25%.
- Maintained highly scalable backend systems using Java and Spring Boot, ensuring performance and reliability.
- Implemented CI/CD pipelines using Jenkins and GitLab CI, test, and deployment processes, resulting in a 30% reduction in release cycle time.
- Contributed actively to all phases of the software development lifecycle (SDLC), from requirements analysis and design through implementation, testing, and deployment.

Software Engineer - Member of Technical Staff **Aug 2020 - Jul 2022**

ProdigitalWorx

- Engineered Java/Spring Boot microservices with RESTful APIs and Apache Kafka, improving transaction processing throughput by 25% and reducing latency by 15%.
- Developed a Spring Cloud real-time calculation module, optimizing computational accuracy by 10% and reducing processing time by 20%.
- implemented Spring Data JPA and Hibernate for database interaction, resulting in a 25% improvement in data access performance.
- Designed and documented system architecture, including microservice decomposition and API specifications.
- Collaborated with cross-functional teams using Agile methodologies to deliver high-quality software.
- Built and deployed Spring Boot applications on AWS using Docker and Kubernetes, automating deployments and reducing release cycles by 30%.
- Designed and implemented RESTful APIs using Spring MVC, integrating with 10+ internal and external services, automating key business processes.

Software Engineer **May 2018 - Jul 2020**

Informative Web Solution, India

- Developed and deployed production-ready microservices to serve machine learning models (TensorFlow, Scikit-learn) using Flask/FastAPI, reducing prediction latency by 20% and increasing throughput by 15%.
- Integrated machine learning models into existing Java/Spring Boot applications via RESTful APIs, automating data-driven decision-making and reducing manual processing by 25%.
- Designed and implemented data ingestion and processing pipelines using Python and Apache Airflow, integrating with existing data warehouses.
- Collaborated with data scientists to implement and optimize machine learning model serving infrastructure, ensuring efficient resource utilization.
- Developed robust unit and integration tests for machine learning model serving components, ensuring code quality and system stability.
- Monitored and maintained production machine learning systems, identifying and resolving performance bottlenecks and ensuring system reliability.
- Built and maintained CI/CD pipelines for machine learning model training and deployment, automating the process and reducing cycles by 30%.
- Optimized database queries and implemented caching strategies to improve application performance.
- Developed and executed comprehensive unit and integration tests using JUnit and Mockito to ensure high code quality, application stability, and reduce the number of production bugs.

EDUCATION

University of Texas at Dallas, Dallas, TX

Master of Science in **Computer Science - (Data Science)**

Maharaj Vijayaram Gajapathi Raj College of Engineering, JNTU-K, India

Bachelor of Technology, Computer Science and Engineering

TECHNICAL SKILL

- Methodology** : SDLC, Agile, Waterfall
- ML/AI** : NLP, Deep Learning, AWS, Azure Cloud Services, BigData Analytics, Data Pipeline Development, RAG
- Programming Languages** : Java, C, C++, R, Python, Pyspark, SQL, Flutter, PHP, Bash
- Frameworks** : Spring MVC, Spring, Hibernate, Spring Boot, Spring Security, Node.js, Angular JS,
- Web Technologies** : HTML5, CSS3, Tailwind, JavaScript, RESTful APIs, TypeScript, jQuery, Ajax, XML, JSON, Bootstrap
- Databases/ IDEs** : Oracle, MySQL, SQL Server, PostgreSQL, Prisma, MongoDB, IntelliJ IDE, Visual Studio Code
- J2EE Technologies** : Servlets, JSP, JDBC, JUnit, JMS, JSTL, Multi-threading, JavaBeans, JSF, JSTL, Multithreading
- Version Control & Other Tools** : Git, SVN, Gitlab, Bit Bucket, Maven, Gradle, Ant, Jenkins
- DevOps** : Docker, Kubernetes
- Cloud Platforms** : AWS, Azure
- Soft Skills** : Effective verbal and written communication, Problem-solving, and Troubleshooting skills
- Operating System** : Windows, Linux

ACADEMIC PROJECTS

Recurrent Neural Networks (RNN) for Currency Exchange Prediction

- Achieved 99.9G% forecasting accuracy using LSTM, with an MSE of 0.005 and R² of 0.98, demonstrating exceptional precision in time series prediction.

Telemedicine Platform Development

- Designed a user-friendly platform, reducing appointment scheduling time by 40%, increasing patient bookings by 30%, and improving billing transparency by 25%.
