

Bhavya Sri Billuri Software Engineer

+1 (573) 290-2303 | bhavyasribilluri01@gmail.com | <https://www.linkedin.com/in/bhavyasribilluri/>

PROFESSIONAL SUMMARY

Results-driven Software Engineer with **3+ years of experience** in full-stack development, cloud-native solutions, and scalable system design. Proficient in **Python, Java, JavaScript (React/Angular), AWS/Azure, Kubernetes, and DevOps (Terraform, Docker, CI/CD)**. At **Deloitte**, built **high-performance microservices (Spring Boot/FastAPI)** and migrated legacy systems to **AWS EKS**. At **Wipro**, optimized **MySQL/PostgreSQL** databases, modernized legacy apps to **Python/FastAPI**. Passionate about **AI/ML (PyTorch, LangChain)** and **secure, scalable architectures (OAuth2, RBAC, SOC2)**. Adept at **Agile/DevOps** practices and delivering measurable business impact.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (ES6+), TypeScript, Go, SQL, Bash

Cloud Platforms: AWS (EC2, S3, Lambda, EKS, RDS), Azure (App Services, AKS, Cosmos DB), GCP

DevOps & IaC: Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, Grafana

Web & APIs: Angular, React, Next.js, Node.js, Express, FastAPI, Spring Boot, REST/GraphQL, WebSocket

Databases: PostgreSQL, MongoDB, MySQL, Redis, Cassandra, Snowflake

AI/ML & Data: PyTorch, TensorFlow, LangChain, OpenAI, Spark, Pandas, Scikit-learn

Security: OAuth2, JWT, RBAC, VPC, IAM, SOC2 Compliance

Tools: Git, JIRA, SonarQube, Postman, Datadog, Splunk, Apache Kafka

PROFESSIONAL EXPERIENCE

Deloitte | Software Engineer

Jan 2025 – Present | Remote, USA

- Developed and deployed high-performance cloud-native microservices using **Spring Boot (Java)** and **FastAPI (Python)**, reducing API latency by **35%** through asynchronous processing with **AWS Lambda** and **SQS** for a Fortune **300 client's billing platform**.
- Led the end-to-end migration of a legacy monolithic application to **AWS EKS (Kubernetes)**, containerizing services with **Docker** and automating CI/CD pipelines using **GitHub Actions**, which cut deployment time by **50%** and improved scalability.
- Designed and implemented a dynamic **React/Angular frontend** with **TypeScript** for a client-facing analytics dashboard, integrating **REST/GraphQL APIs (Node.js/Express)** and **MongoDB** to visualize real-time data for **10K+ monthly active users**.
- Enhanced security for a multi-tenant SaaS product by implementing **RBAC** and **JWT-based authentication**, leveraging **OAuth2** and **AWS IAM** to enforce granular permissions across **100+ enterprise clients** while ensuring SOC2 compliance.
- Automated infrastructure provisioning for **Azure App Services** using **Terraform (IaC)**, reducing environment setup time from **8 hours to 30 minutes** while enforcing security via **VPC peering** and **encryption at rest**.
- Collaborated on an AI-powered document processing pipeline using **PyTorch** and **LangChain**, which reduced manual data entry errors by 90% for a healthcare client's billing system, saving **200 hours/month** in manual reviews.

Wipro | Software Engineer

Jun 2020 – Jul 2023 | Hyderabad, India

- Built a scalable full-stack logistics tracking system using **Java/Spring Boot backend** and **Angular frontend**, reducing shipment status update delays by **40%** via WebSocket integration for real-time tracking.
- Scaled a high-traffic **MySQL database** for an e-commerce platform by sharding customer data and optimizing queries, supporting **1M+ daily transactions** and improving checkout throughput by **25%** during peak sales.
- Modernized legacy VB6 applications by refactoring them into **Python/FastAPI microservices** deployed on **Azure App Services**, reducing cloud costs by **30%** through auto-scaling and Redis caching for session management.
- Created secure **REST APIs (Node.js/Express)** for a **CRM system**, integrating **MongoDB** for data modeling and reducing third-party dependency costs by **\$50K/year** through in-house development.
- Automated end-to-end testing for a banking portal using **Postman** and **Jest**, increasing test coverage from **65% to 95%** and reducing regression bugs by **70%** in bi-weekly Agile sprints.
- Mentored 4 junior engineers on **Git workflows, Jenkins pipelines, and Agile best practices**, accelerating team onboarding time by 3 weeks for a mission-critical client project.

EDUCATION

Master of Science in Computer Science

Aug 2023 – May 2025 | Carbondale, IL

Southern Illinois University

Relevant Coursework: Machine Learning, Cloud Computing, Distributed Systems, Advanced Databases

PROJECTS

Online Food Delivery System | Angular, Node.js, MongoDB, Stripe

- Developed a **full-stack web application** with JWT-based authentication, real-time order tracking via **WebSocket**, and **Stripe payment integration**.
- Designed a responsive UI with role-based dashboards (admin/customer/driver), reducing order processing time by **30%**.

SaaS Automation Builder | Angular, Firebase, Tailwind CSS, Stripe

- Built a **no-code platform** for auto-generating SaaS websites, featuring custom landing pages, OAuth authentication, and subscription billing via **Stripe**.
- Reduced deployment time from **days to minutes** by leveraging **Firebase Hosting** and **Firestore** for dynamic content management.

E-Commerce Website | Angular, Node.js, Stripe, MongoDB

- Engineered a **scalable e-commerce platform** with product filtering, secure checkout, and admin analytics.
- Integrated **Stripe** for payments and optimized MongoDB queries to handle **10K+ products** with sub-second response times.

CERTIFICATIONS

- Microsoft Certified: Azure Data Fundamentals ([LINK](#))

- AWS solution architect ([LINK](#))
