

BHUMIKA PANCHAL

Wisconsin, USA • +1(779) 775 - 3045 • bhumika.p@aogjob.com • [LinkedIn](#)

SUMMARY

- Highly skilled ServiceNow Professional with 4+ years of experience in development, administration, and ITSM configurations including Service Catalog, Service Portal, Incident, Change, Problem, Asset and Knowledge Management modules.
- Demonstrates expertise in developing and maintaining workflows, customizing UI and Service Portals, and implementing integrations using REST APIs, LDAP, and Active Directory.
- Experienced in configuring CMDB, ITAM, GRC, and HRSD modules to enhance operational efficiency and ensure data integrity. Adept at optimizing processes and aligning solutions with ITIL best practices, while delivering scalable, cross-functional solutions in fast-paced environments.
- Led agile teams to deliver top-tier solutions under stringent security protocols. Expert at utilizing data analytics platforms like Tableau and Power BI, with proficiency in JavaScript, Python, and SQL to transform complex data into strategic insights and optimize system performance.

EDUCATION

Master of Science in Management Information Systems Northern Illinois University (Graduated with honors from Phi Beta Delta - Zeta Gamma Chapter of NIU)	Jan2023 – Dec2024 Dekalb, Illinois, USA
---	---

PROFESSIONAL EXPERIENCE

JPMorgan Chase ServiceNow Software Engineer	NY, USA Jul 2024 – Dec2024
--	---

- Administered ServiceNow ITSM modules, ensuring system stability, performing upgrades, and managing patches.
- Developed and maintained workflows, UI customizations, and integrations with third-party systems like LDAP and Active Directory.
- Developed and implemented HR cases to capture employee requests, including leave of absence and automate HR processes such as onboarding and offboarding for streamlined case management.
- Designed and published customer-facing knowledge articles to outline common issues and potential solutions, reducing customer intervention and speeding up resolutions.
- Managed Update Sets to transfer customizations between instances, ensuring smooth migration and consistency across environments.
- Integrated ServiceNow with enterprise tools like Jira & Microsoft Teams for improved workflow coordination.
- Worked on sprint and stories, ensuring optimal workflow integration.
- Configured Business Rules, Client Scripts, Server Scripts, GlideRecord, GlideAjax, UI Policies, Data Policies, Flow Designer and ACL to optimize system functionality and user experience.
- Leveraged knowledge of new ServiceNow releases by implementing emerging features to strengthen platform capabilities and performance.
- Spearheaded the integration of ServiceNow with external tools using REST APIs and automated workflows to enhance efficiency and process automation.

Itarium Technologies ServiceNow Software Engineer	Pune, India May 2021 – Nov2022
--	---

- Developed complex scripted REST APIs to enable dynamic integration between ServiceNow and third-party systems.
- Designed and implemented dashboards and reports to track performance metrics, driving data-informed decision-making, and managed weekly scheduling of reports. (key indicators, time charts, analytics, drill downs, and dashboards.)
- Worked on cloning the production environment to the testing environment on a weekly basis, ensuring synchronized data for testing and development.
- Managed the lifecycle of customizations and integrations, ensuring smooth execution and successful deployment across environments. Tracked project progress through clear milestones, managed risks, and maintained consistent communication with key stakeholders to secure timely delivery and alignment with business goals.
- Created and deployed surveys in ServiceNow to gather user feedback, driving continuous improvement and enhancing service delivery.
- Administered data import/export activities, safeguarding accuracy and integrity through expert handling of transform maps and import sets.
- Developed and optimized ServiceNow features, including Service Catalogs, Order Guides, Record Producers, and Workflows, to improve system functionality and user experience.
- Integration of service now with LDAP for authentication.
- Analyzed bin logs via database access through Bastion Host to pinpoint the root cause of issues in both production and non-production environments.
- Conducted comprehensive testing of applications using ServiceNow's Automated Test Framework (ATF), including unit tests, integration tests, and user acceptance tests (UAT).
- Led weekly backlog reviews, assigning tasks to team members based on their expertise to enhance productivity and efficiency.

Column Software Solutions ServiceNow Consultant	Pune, India Apr2020 - Dec2020
--	--

- Enhanced user satisfaction by 20% by designing an intuitive Service Portal with self-service capabilities, simplifying issue resolution and service request processes.
- Guided team members through comprehensive training on processes and platform knowledge, promoting skill growth and platform expertise.
- Built custom tables and ACL rules to manage sensitive data while adhering to security protocols.
- Customized and optimized the approval workflow for Standard Change Proposals, streamlining processes and enhancing operational efficiency.
- Improved Service Level Agreements (SLAs) & Schedules by customizing escalation workflows to meet business priorities (Response & Resolution).
- Managed instance upgrades, patch upgrades, hotfix upgrades, cloning, and post-fix implementation.
- Orchestrated efficient inbound and outbound email notification processes, enhancing communication flow and delivery accuracy.
- Led production support ITSM global team member with a prime responsibility in responding to service requests- resolving critical incidents, and root cause analysis with ServiceNow suite- closed 95% of trouble incident tickets on the first call without escalation.

Emergence Pvt. Ltd. ServiceNow Software Consultant	Mumbai, India Jun2019 - Mar2020
---	--

- Configured and customized core modules like Incident, Problem, Change, Asset Management to meet organizational needs.
- Maintained and administered the deployed ServiceNow instance, performing tasks such as configuring existing fields (users, firms, sites, and locations), Support Groups, assignment rules, classifications, CI data, SLA, and other elements.
- Developed custom ServiceNow UI pages, transform maps, and scheduled jobs to automate processes and boost system performance.
- Developed order instructions so that clients can request many things (such as a laptop, keyboard, mouse, monitor, badge, etc.) with a single service catalog request
- Developing the SLAs for Incident and Service Requests with both Response and Resolution types.
- Designed a user-friendly portal to enhance ease of access for end users in creating requests, incorporating user feedback for improvements.
- Optimizing daily health check reports for client companies and analysing errors.
