Address: Silver Spring, 20901 (US)

PROFESSIONAL SUMMARY

Seasoned Power BI Developer with 8+ years of experience in transforming raw data into actionable insights using Microsoft BI tools. Expertise in designing, modeling, and visualizing complex datasets to drive data-driven decision-making. Extensive experience working in the financial, health, hospitality, and engineering sectors.

Power BI & Data Transformation: Skilled in Power Query Editor and Azure Data Factory, enabling seamless data extraction, transformation, and loading (ETL) for optimized analytics.

Advanced Data Modeling & DAX: Proficient in **Power BI Desktop**, leveraging **Data Analysis Expressions (DAX)** to create efficient models and high-performing reports.

Interactive Dashboard Development: Adept at building dynamic **Power BI Service** dashboards with real-time data visualizations to support strategic business planning.

SSRS & Paginated Reporting: Experienced in SSRS and **Power BI Paginated Reports**, developing **interactive, drill-down, and drill-through reports** using multiple data sources.

SQL & Database Expertise: Strong background in **Azure SQL Database, SQL Server, and T-SQL**, with hands-on experience in writing **complex queries, stored procedures, and views** for data retrieval and manipulation.

Cloud & Microsoft BI Stack: Extensive knowledge of **Azure solutions, MSBI tools (SSIS, SSRS)**, and enterprise-level **Power BI deployment and governance**.

Data Governance & Security: Implemented best practices for **version control, access management, and Row-Level Security (RLS)** to ensure data integrity and confidentiality.

Results-Driven & Collaborative: Highly motivated and performance-driven professional, excelling in high-pressure environments while delivering innovative BI solutions that exceed business objectives.

EXPERIENCE

August. 2023 - Present Maimi, Florida	Power BI Developer, Consor Engineers LLC • Worked closely with business stakeholders, gathering requirements to develop tailored BI solutions.
--	---

- Translated business requirements into technical specifications for Power BI reports and dashboards.
- Developed and optimized interactive Power BI dashboards and reports, ensuring data accuracy and high performance.
- Designed and built visually rich and interactive Power BI dashboards that convey complex data insights effectively.
- Expert in utilizing Microsoft Fabric for data integration, transformation, and analytics, streamlining data workflows.
- Designed and implemented data models for improved query performance and data visualization efficiency.
- Built and managed ETL pipelines using Azure Data Factory, ensuring seamless data ingestion from diverse sources.
- Utilized Power Query and DAX to clean ,transform and model data creating efficient and optimized data models.
- Developed robust data storage and processing solutions using Azure Synapse Analytics, enabling high-speed analytical queries.
- Created relationships between datasets to ensure seamless data integration and enhanced reporting capabilities.
- Employed advanced visualization techniques to highlight key performance indicators (KPIs) and trends.
- Created custom visuals and implemented themes to align dashboards with corporate branding and user preferences.
- Managed the entire Power BI lifecycle from initial development and testing to deployment and ongoing maintenance.
- Implemented best practices for version control, data security, and access management, including Row-Level Security (RLS), to ensure data confidentiality, integrity, and controlled access based on user roles.
- Wrote complex SQL queries to extract, transform, and manipulate data for reporting and analytical use cases.
- Expert in leveraging Azure SQL Database to efficiently retrieve, manipulate, and manage data for reporting and analytics.
- Developed and optimized complex SQL queries, stored procedures, and views to support business intelligence and data transformation needs.
- Designed and implemented high-performance database solutions ensuring scalability, security, and data integrity.
- Integrated Azure SQL with Power BI, Azure Data Factory, and Synapse Analytics to enable seamless data processing and visualization.
- Designed and developed SSRS reports, providing pixel-perfect, high-precision business intelligence reports.
- Created Power BI Paginated Reports using multiple data sources, including semantic datasets, ensuring rich and structured insights.
- Expert in Power BI Report Builder, delivering high-fidelity reports with intricate formatting and design.
- Developed Tableau dashboards, effectively presenting insights with interactive and aesthetically optimized visuals.

- Provided support to end-users enabling them to maximize the value of Power BI reports and dashboards.
- Leveraged Power Automate and Logic Apps to automate report distribution, data refreshes, and workflow integrations.
- Created custom workflows to enhance data processing, reducing manual effort and improving efficiency.
- Stayed up-to-date with the latest Power BI features and industry trends to continuously enhance reporting capabilities.
- Actively sought feedback from users and stakeholders to identify areas for improvement and implement iterative enhancements.
- Technical Stack & Tools:
- **Power BI (Desktop, Service, Report Builder, Paginated Reports, Semantic Models)**
- **Microsoft Fabric & Data Factory**
- **Azure Synapse Analytics**
- **SQL Server, SSRS, Power Automate, Logic Apps**
- **Tableau**

October. 2019 - July. 2023
Miami, Florida

Power BI Developer, Royal Caribbean Group

- Extracted data from diverse sources, including industry specific databases, reservation systems, ensuring data accuracy and integrity crucial for operational insights.
- Utilized Power Query and DAX to clean, transform, and model data, creating efficient and optimized data models tailored to the cruise and hospitality context.
- Created relationships between datasets to ensure seamless data integration and enhanced reporting capabilities across various departments, such as guest services, bookings, and operations.
- Designed and built visually rich and interactive Power BI dashboards that effectively convey complex data insights, enhancing decision-making for cruise and hospitality management.
- Employed advanced visualization techniques to highlight key performance indicators (KPIs) and trends specific to the industry, such as occupancy rates, guest satisfaction scores, and revenue per passenger.
- Created custom visuals and implemented themes to align dashboards with corporate branding and user preferences, ensuring a consistent and engaging user experience.
- Collaborated closely with clients and stakeholders within the cruise and hospitality sectors to gather and document business requirements.
- Translated business requirements into technical specifications for Power BI reports and dashboards, ensuring alignment with strategic goals and operational needs.

- Provided support to end-users, enabling them to maximize the value of Power BI reports and dashboards, and facilitating data-driven decision-making across teams.
- Stayed up-to-date with the latest Power BI features and industry trends to continuously enhance reporting capabilities and adapt to the dynamic needs of the cruise and hospitality industry.
- Actively sought feedback from users and stakeholders to identify areas for improvement and implement iterative enhancements, ensuring the tools remain relevant and valuable.

March. 2017 - August. 2019
Nashville, TN

POWER BI DEVELOPER, Community Health Systems

- Collaborated with healthcare professionals and stakeholders to gather and document business requirements specific to healthcare operations.
- Translated healthcare-related business objectives into technical specifications for Power BI and SSRS solutions.
- Extracted data from various sources, including electronic health records (EHRs), patient management systems, and other healthcare databases.
- Utilized Power Query, DAX, and SQL to clean, transform, and model healthcare data, ensuring accuracy and compliance with industry standards.
- Developed data models that supported seamless integration and reporting across multiple healthcare facilities.
- Designed and developed interactive dashboards using Power BI to visualize healthcare metrics, patient outcomes, and operational efficiencies.
- Developed and maintained SSRS reports to meet diverse reporting needs and ensure consistency across platforms.
- Employed advanced visualization techniques to highlight key performance indicators (KPIs) relevant to healthcare, such as patient satisfaction, treatment outcomes, and resource utilization.
- Stayed up-to-date with the latest Power BI features, SSRS capabilities, and healthcare industry trends.
- Continuously improved reporting capabilities through the application of new techniques and technologies.

April. 2016 - February. 2017

SQL Developer, Cenlar FSB

- Gathered requirements from the business analyst and prepared POC documents for the design & development of BI solutions (ETL/Reporting).

- Developed and maintained SQL queries and scripts to support data analysis and reporting needs for loan processing, underwriting, and customer service departments.
- Created and updated SQL reports to track key metrics, such as loan approval rates, delinquency rates, and borrower profiles.
- Collaborated with data analysts and senior developers to design and implement data models that enhance operational efficiency and decision-making.
- Assisted in monitoring and optimizing database performance, identifying opportunities to improve query efficiency and reduce system load times.
- Contributed to process improvement initiatives by identifying areas for enhancement in data handling and reporting practices.
- Implemented feedback from senior developers and business users to refine SQL queries and reports, ensuring high-quality deliverables.

EDUCATION

2007	Bachelor Degree • Mekelle University,
