Summary

Software Engineer with a master's in computer science experience in developing scalable software solutions. Proficient in range of programming languages & DevOps tools. Eager to apply my expertise to innovative and challenging software engineering roles, driving excellence in every project.

Work experience

Khoj Information Technology, Inc, Ramsey, NJ

2023-01 - present

Software Development Engineer

- Designed, developed, and maintained Enterprise Application Integration (EAI) solutions across multiple ERP systems using Microsoft Azure and SQL databases to ensure reliable data synchronization.
- Leveraged Azure Integration Services, including Logic Apps, to implement middleware layers that streamlined financial processes such as open balance reports, invoices, statements, and payments.
- Created automated workflows in Microsoft Power Platform to enhance operational efficiency by reducing manual reporting tasks.
- Developed and enhanced the System Management Console (SMC), a web application tailored for Dynamics 365 and other business applications, providing advanced traceability and monitoring of integration workflows.
- Integrated front-end technology such as JavaScript with backend services like Azure API Management (APIM), Function Apps, and Logic Apps to meet specific client requirements for system monitoring.
- Incorporated Azure Application Insights into the SMC for detailed performance tracking of resources along with actionable analytics on resource usage and application health.
- Ensured scalability and reliability of the web application to support high transaction volumes while meeting stringent performance standards, enhancing usability across enterprise systems.
- Reduced downtime through enhanced error-handling mechanics within integration workflows while improving overall system reliability through real-time monitoring solutions.
- Delivered a customized web application solution that achieved a 30% improvement in operational oversight by facilitating better tracking and management of integrations across systems.
- Improved customer satisfaction and ensured data integrity by simplifying complex enterprise integrations within large-scale dispersed environments.

Commvault Systems, Tinton Falls, NJ

2022-05 - 2022-12

Software Developer Intern

- Orchestrated the migration of over 30 APIs from V2 to V4 using Liquid, achieving a 10% reduction in API response time and enhancing overall system performance.
- Created detailed Swagger documentation for all migrated APIs, specifying supported operations, parameters, outputs, and endpoints to improve integration ease for developers and clients.
- Collaborated with cross-functional teams to ensure a seamless transition during the API migration with minimal disruption to existing systems and processes.
- Conducted comprehensive testing and debugging of migrated APIs, promptly identifying and resolving issues to ensure reliability and optimal functionality.
- Offered constructive suggestions during code reviews, enhancing code quality and maintainability while adhering to software development best practices.
- Demonstrated adherence to industry standards by delivering high-quality code aligned with project deadlines and specifications.
- Improved system stability through effective troubleshooting during API migrations, ensuring smooth integration into the broader infrastructure.
- Enhanced developer experience by providing clear technical documentation that streamlined onboarding onto new API versions.
- Maintained strong cross-team communication throughout the migration process to align objectives, resolve challenges, and meet performance targets efficiently.
- Contributed actively to enhancing operational efficiency by adopting modern coding practices for scalable system development.

Temenos Private India Limited, Bangalore, India

2020-01 - 2021-07

Software Engineer

- Demonstrated expertise in source code and API development by packaging APIs into WAR files and deploying them on application servers, including JBoss, to ensure optimal functionality and performance.
- Developed scalable REST APIs using Java and Spring frameworks to enable seamless integration with custom business solutions.
- Enhanced build efficiency by optimizing Jenkins jobs through Ant and Maven scripts across 20+ Bitbucket repositories, reducing build and deployment times by 20%.
- Led the end-to-end design and implementation of a front-end architecture for a Migration Tool, delivering browser-based business solutions with multiple screens and components.
- Strengthened system reliability through effective collaboration with cross-functional teams to debug and resolve critical application issues.
- Provided technical mentorship to junior developers, fostering skills in Java, Spring, and continuous integration workflows.
- Directed thorough unit testing processes to ensure high-quality API performance across diverse business applications.
- Championed best practices in software engineering by maintaining clean code standards and conducting regular peer code reviews for improved team output.

Temenos Private India Limited, Bangalore, India2018-01 - 2019-12Associate Software Engineer

- Integrated advanced rule-based logic with backend API endpoints, optimizing database communication and processing over 50,000 transactions daily in an end-to-end migration system.
- Strengthened system security by designing and implementing custom Java rules for user authentication, achieving a 35% reduction in unauthorized access attempts and safeguarding data integrity.
- Authored and maintained comprehensive project documentation across all phases, facilitating knowledge sharing and ensuring seamless collaboration across teams.
- Enhanced development workflows by refining code management processes in Jenkins, streamlining continuous integration practices for improved efficiency.
- Utilized Bitbucket for effective version control, enabling robust coding practices and maintaining project consistency across team contributions.
- Designed scalable application solutions by implementing efficient design principles for both frontend interfaces and backend services.
- Collaborated with cross-functional teams to ensure the successful execution of migration projects within strict timelines and technical specifications.
- Demonstrated strong problem-solving skills by resolving complex software issues promptly, contributing to the reliability and performance of deployed solutions.

Education

State University Of New York Binghamton2021-08 - 2023-05Master of Science in Computer Science - (GPA: 3.6/4.0)

M S Ramaiah Institute of Technology, Bengaluru, India2014-08 - 2018-05Bachelor of Technology in Computer Science and Engineering- (GPA: 8.6/10.0)

Skills

Strong Sense of Ownership	Python
JavaScript	My SQL

Competence

- **Programming Languages:** Java, Python, JavaScript, C++, C#, HTML, CSS, .NET,
- **Technologies:** Microsoft Azure, Apache Camel, Junit, RESTful API, JSON, XML, XACML, Swagger, Spring Boot, JMS,ASP.NET MVC, SOAP.
- **Development Tools:** Jenkins, Jira, Git, Visual Studio, Eclipse, Bitbucket, Maven, Azure logic apps, Ant, Docker, Kubernetes, React JS, AngularJS, Node JS, Java 8, TypeScript, React Native.
- **Database:** MySQL, Oracle, SQLite, MongoDB, Amazon DynamoDB, SQL server, Azure SQL.
- **Core Competencies:** Strong Sense of Ownership, Attention to Details, Process improvement, Active listening, Problem-solving, Accountability, Big Picture Thinking.
