WORK EXPERIENCE

05 2023 – 06 2025	Software QA Engineer <i>Triage Staffing (formerly RTG Medical)</i>	Fremont, NE
	- Acted as the sole QA engineer across three large-scale projects, including a .NET-based internal recruiter platform and an MSP platform, collaborating closely with developers to identify bugs, improve performance, and streamline release workflows. - Reviewed and interpreted C#/.NET and SQL Server backend code to validate system logic, identify issues, and inform test coverage. - Reduced average feature delivery time by over 70% (from 18 weeks to 4–6 weeks) by establishing Agile processes and automated testing pipelines. - Built and maintained end-to-end automated test suites using Playwright (TypeScript), Python, and SQL, ensuring stable deployments and catching regressions early. - Designed and led user acceptance testing (UAT) with non-technical stakeholders, collecting real-world feedback and reducing post-deployment issues. - Frequently debugged and triaged full-stack application behavior, including data inconsistencies and logic errors, by querying MSSQL databases and cross-referencing code and API behavior.	
08 2022 – 05 2023	Licensed Stock Broker <i>Charles Schwab (formerly TD Ameritrade)</i>	Omaha, NE
	- Passed FINRA SIE, Series 7 Top-Off, and Series 63 licensing exams. - Developed a strong understanding of financial markets, investment products, and regulations. - Ensured accuracy in financial transactions by verifying stock prices, analyzing balance sheets, and scrutinizing financial statements. - Assisted clients with account clerical work and explained complex concepts in an understandable manner.	
01 2022 – 08 2022	Stocker <i>Walmart</i>	Omaha, NE
	- Loaded and unloaded shipments, organized backroom spaces, constructed displays, and stocked shelves. - Operated heavy machinery such as forklifts and balers. - Placed items in their correct locations, mentored new-hire associates, and ensured store cleanliness and organization.	
03 2021 – 11 2021	Caregiver <i>Visiting Angels</i>	Omaha, NE
	- Aided clients with routine tasks including feeding, dressing, exercising, toileting, and socializing. - Monitored and recorded client vitals and behavior. - Transferred patients using gait belts and other tools while respecting patient privacy and dignity.	

TECHNICAL PROJECTS

05 2023 – 06 2025	RTG Core Application <i>Recruiting Platform / CRM</i>	Triage Staffing
	- Frequently navigated and interpreted the platform’s C#/.NET codebase to identify logic flaws, trace bugs across layers, and validate implementation against business requirements. - Wrote SQL queries against Microsoft SQL Server to audit data integrity and assist developers with diagnosing user-reported issues. - Documented complex backend workflows and created reproducible test cases that accelerated developer fixes and improved team velocity.	
08 2023 – 06 2025	RTG Exchange / Triage Plus <i>MSP Management Platform</i>	Triage Staffing
	- Assisted in validating API and frontend behavior by mapping out data flow between UI components, controller logic, and database entries. - Used Postman and Python scripts to simulate edge-case workflows and verify business logic without a UI. - Collaborated with backend developers to explore potential improvements in testability and internal API reliability.	

EDUCATION

01 2020 – Present	Southern New Hampshire University <i>Bachelor of Science, Computer Science</i>	Manchester, NH
	Member of the President’s List 2021 - Present	

SKILLS

Python	C++	Project Management
HTML	MacOS	Documentation
Java	Linux	Testing
C#	Windows	Technical Writing
PC	Playwright	Data Analysis
TypeScript	Software Troubleshooting	Customer Service
CSS	Financial Products	Microsoft Office Suite
	Securities Regulation
