

Bulbul Gupta

Full Stack AI Developer | Python Developer | Data Scientist | Machine Learning Engineer

■ +91-7354237524 | ✉ bulbul.kgn@gmail.com | LinkedIn: linkedin.com/in/bulbul-gupta-19ab72155

Summary

Full Stack AI Developer with 1 year of experience in building AI-powered applications. Skilled in Python, Flask, FastAPI, React.js, and cloud platforms (AWS/GCP/Azure). Hands-on expertise in NLP, Deep Learning, and Data Visualization with proven ability to deliver scalable solutions that reduce response time by 30% and increase data processing efficiency by 40%.

Skills

Languages & Frameworks: Python, Flask, FastAPI, Django, React.js, Node.js, Express.js, SQL, HTML, CSS

Data Science & ML: TensorFlow, PyTorch, Machine Learning, Deep Learning, NLP, Computer Vision, Hugging Face Transformers, BERT, GPT

Databases: PostgreSQL, MySQL, MongoDB, SQL Server

Cloud & Tools: AWS, GCP, Microsoft Azure, Docker, Kubernetes, Git, GitHub, Tableau, PowerBI, REST API, GraphQL, CI/CD pipelines

Methodologies: Agile, Scrum, Microservices Architecture, Data Pipelines

Experience

Full Stack AI Developer | HulkHire | Hyderabad & Remote (July 2023 – July 2024)

- Developed and deployed AI-powered applications using Python, Flask, FastAPI, Django, and React.js
- Designed RESTful APIs and integrated ML/DL models with measurable impact (accuracy >95%, latency <1.5s)
- Improved API response time by 30% and increased data processing efficiency by 40%
- Delivered key projects: Conversational AI Chatbot, Data Visualization Dashboard, Image Classification, Web Scraping Tool
- Deployed scalable solutions on AWS/GCP with Docker and CI/CD pipelines
- Collaborated in Agile/Scrum teams with cross-functional members to deliver production-ready applications

Key Projects

Data Science NLP Chatbot (GenAI)

- Designed chatbot using Hugging Face Transformers & GPT/BERT
- Achieved 90% accuracy in intent detection and reduced latency to <1.5s
- Built with Python (FastAPI), React.js, PostgreSQL; deployed on AWS/GCP

Data Visualization Dashboard

- Developed an interactive dashboard using React.js, D3.js, and Flask
- Integrated PostgreSQL for real-time data filtering & analytics
- Used Chart.js, Plotly.js for visualization; deployed with CI/CD on AWS

Other Projects: Image Classification (Deep Learning CNNs, accuracy >95%), Automated Web Scraping Tool (50+ websites, reduced data collection time by 70%)

Education

B.Tech, Computer Science & Engineering

Rajiv Gandhi Proudlyogiki Vishwavidyalaya (RGPV), Bhopal

July 2013 – June 2017

Achievements

- 3rd Runner-up in Smart India Hackathon for project 'Inventory of Chemical and Petrochemical'
- Delivered AI/ML projects across NLP, Computer Vision, and Data Analytics domains

- Published multiple projects on GitHub with strong community feedback
- Completed certifications in Data Analytics / Machine Learning / Cloud Computing

Core Strengths

Agile Development, Problem-Solving, Analytical Thinking, Cross-functional Collaboration, Leadership, Critical Thinking, Innovation
