IT Consultant | Project Delivery, Release Management & Quality Assurance Leader

ITIL-certified consultant with 17+ years of expertise in IT project delivery, system migrations, QA, and service management. Proven success in managing global teams, complex integrations, and cloud technology initiatives across industries including banking, transportation, telecom, and retail.

Proven track record of delivering IT transformation, QA excellence, and enterprise-wide migrations. Adept at leading cross-functional teams, optimizing release management, and ensuring seamless system integrations.

Core Competencies

- **Project & Release Management:** Led high-impact global IT projects, integrating cloud solutions (AWS, Azure, GCP) and ERP systems.
- **Quality Assurance & Testing:** Spearheaded test strategy, automation, and defect management to enhance software quality and deployment efficiency.
- **Data Migration & Integration:** Managed seamless data migration and system transformation initiatives for enterprise platforms.
- **Stakeholder & Vendor Management:** Fostered collaboration across onshore, offshore, and third-party teams for successful project execution.
- **Service Delivery & IT Operations:** Expertise in ITIL-based incident resolution, change management, and operational support.
