

CHANDRA SHEKHAR REDDY

Full Stack Java Developer

Texas, USA | Contact: +1(940) 8436740 | Email: chandrashekhhar300899@gmail.com | [LinkedIn](#)

■ PROFILE SUMMARY

- Detail-oriented **Full Stack Java Developer** with 5+ years of experience in all the phases of **Software Development Life Cycle (SDLC)** including **Requirement Analysis, Design, Implementation** and **Product Testing** in both the Web based and Enterprise applications with emphasis on **Object Oriented, Java/J2EE and Client Server technologies** across **finance and healthcare domains**.
- Experienced in all phases of SDLC, including design, development, testing, deployment, and integration of enterprise and web-based applications using **Java 11/18**.
- Strong expertise in **backend development** with **Spring Boot, RESTful APIs, Microservices**, and **MongoDB/SQL Server** for scalable, high-performance systems.
- Proficient in **frontend technologies** including **Angular 12/17, React.js, HTML5, CSS3, JavaScript**, delivering responsive and cross-browser compatible UIs.
- Proficient in RDBMS implementation and development using **SQL Server, Oracle, MYSQL** and experience in working with **SQL, PL/SQL** programming languages and **NoSQL databases** like **MongoDB**.
- Hands-on experience with **cloud platforms: AWS (EC2, S3)** and **Azure**, deploying and managing applications in production environments.
- Skilled in **CI/CD pipelines** using **Jenkins** and **Azure DevOps**, along with containerization using **Docker** and orchestration with **OpenShift**.
- Strong experience in writing **SQL, PL/SQL** stored procedures functions, triggers and packages on database (RDBMS) packages like **MySQL, DB2, Oracle** and pleasant experience in working with **NoSQL databases** like **MongoDB**.
- Proficient in automated testing using **JUnit, Mockito, Cypress, and Playwright** to ensure high-quality, reliable software delivery.
- Successfully developed and integrated **REST and SOAP Web Services**, implementing secure communication and API integration across enterprise systems.
- Applied **design patterns** (Singleton, Factory, MVC, DAO) and modern Java features (Lambdas, Streams, Functional Interfaces) for maintainable and efficient code.
- Familiar with **DevOps, logging, and monitoring** tools like **Splunk** and **ELK Stack** for performance optimization and incident resolution.
- Effective in Agile/Scrum teams, collaborating with cross-functional stakeholders to deliver robust technical solutions aligned with business requirements.

■ TECHNICAL SKILLS

Programming Languages	Java 11/18, JavaScript, C#, HTML5, CSS3
Frontend Frameworks & Libraries	Angular 12/17, React.js, React Native, Bootstrap
Backend Frameworks & Technologies	Spring Boot, RESTful APIs, Microservices, SOAP Web Services, OAuth, Hibernate, JPA
Databases	SQL, PL/SQL, MongoDB, SQL Server, Oracle, MySQL
Cloud Platforms & Services	AWS (EC2, S3), Azure
CI/CD & DevOps Tools	Jenkins, Azure DevOps, Docker, OpenShift, Git
Testing & QA Tools	JUnit, Mockito, Cypress, Playwright
Monitoring, Logging & Analytics	Splunk, ELK Stack
Documentation & API Tools	Swagger, Confluence
Design & Architecture Skills	Microservices Architecture, SOA, Design Patterns (Singleton, Factory, MVC, DAO)
Methodologies & Practices	Agile/Scrum, TDD, SDLC

■ PROFESSIONAL EXPERIENCE

<i>Full Stack Java Developer</i> JPMorgan Chase & Co, Texas	Jul 2024 – Present
• Involved in all phases of the Software Development Life Cycle (SDLC) using Agile/Scrum methodology, delivering incremental updates in 2-week sprints. • Designed and implemented scalable backend services using Java 18, Spring Boot, REST APIs, and MongoDB, improving response times by 30%.	

- Designed, developed, and deployed **Spring Boot microservices with RESTful endpoints**, integrated using **Kafka** for asynchronous communication, containerized with **Docker**, and deployed on **AWS EC2 and Lambda**.
- Built interactive **Angular 17 modules**, enabling reusable UI components and improving front-end maintainability.
- Developed responsive **React.Js components**, optimizing client-side performance and reducing load times by 25% across enterprise applications.
- Deployed applications to **AWS EC2 and S3**, ensuring high availability and secure cloud hosting.
- Developed the **REST based Microservices** using the **Spring Boot**.
- Implemented **Spring boot microservices** to process the messages into the **Kafka** cluster setup.
- Wrote complex **PL/SQL** queries using joins, Stored Procedures, Functions, Triggers, cursors, and indexes in Data Access Layer.
- Automated CI/CD pipelines using **Jenkins, Docker, and Git**, enabling continuous integration and faster delivery.
- Developed clean, semantic **HTML5 and CSS3** layouts with JavaScript, enhancing UI consistency and accessibility.
- Implemented automated UI testing using **Cypress and Playwright**, reducing manual testing efforts by 50%.
- Assisted in hybrid mobile development using **React Native**, providing seamless cross-device functionality.
- Monitored application performance using logging and metrics tools, resolving issues proactively to ensure 24/7 uptime.
- Collaborated with UX designers, product owners, and Agile teams to deliver high-quality features with zero-defect releases.

Environment: Java 18, Spring Boot, REST APIs, MongoDB, React.Js, React Native, Angular 17, HTML5, CSS3, JavaScript, Cypress, Playwright, Jenkins, Docker, Git, AWS EC2, AWS S3, Agile/Scrum

Full Stack Java Developer

Jul 2019 – Jul 2023

Cognizant, India

- Participated in end-to-end SDLC using Agile methodology for enterprise-scale policy management systems.
- Developed and maintained scalable **Java-based microservices** using **Spring Boot** and **RESTful APIs** to support high-volume business transaction systems.
- Developed backend microservices using **Java 11, Spring Boot, REST APIs, and MongoDB**, supporting high-volume transactions.
- Building cloud **Microservices** and implemented backend using **Spring Boot**. Implemented **Spring Boot** services in combination with **Angular11** as front end to form a **Micro-service-oriented** application.
- Implemented **Spring Boot Micro services** to divide the application into various sub modules.
- Built **NoSQL** schemas and maintaining sessions by **MongoDB**.
- Wrote **SQL Queries** and **stored procedures** to interact with **Oracle DB**.
- Built reusable **Angular 12 components**, improving UI consistency and development efficiency.
- Implemented **React front-end components**, enhancing responsiveness and user experience across multiple modules.
- Executed deployments using **Azure DevOps CI/CD pipelines**, automating builds and reducing manual intervention.
- Containerized services with **Docker** and orchestrated using **OpenShift**, improving scalability and fault tolerance.
- Designed interactive UI using **HTML5, CSS3, and JavaScript**, ensuring cross-browser compatibility.
- Applied unit testing frameworks **JUnit and Mockito**, achieving **90%+** code coverage across critical modules.
- Secured REST APIs using **OAuth**, enabling authentication and authorization across microservices.
- Monitored applications and debugged production issues using **Splunk and ELK Stack**, ensuring minimal downtime.
- Documented APIs and application flows using **Swagger and Confluence**, supporting knowledge sharing and faster onboarding.
- Coordinated daily with offshore QA and BA teams to ensure timely delivery and defect resolution.

Environment: Java 11, Spring Boot, REST APIs, MongoDB, React, Angular 12, HTML5, CSS3, JavaScript, Azure DevOps, Docker, OpenShift, JUnit, Mockito, OAuth, Splunk, ELK Stack, Swagger, Confluence, Agile/Scrum

■ EDUCATION & CERTIFICATION

M.S. in Computer Science from University of North Texas, Denton, TX, USA

B.Tech. (Electrical & Electronics Engineering) from M S Ramaiah Institute of Technology, Bangalore, India

Certifications:

- **Oracle Certified Professional: Java SE 11 Developer** | Oracle
- **Microsoft Certified: Azure Developer Associate (AZ-204)** | Microsoft
- **Spring Certified Professional (VMware Certification)** | VMWare
