

Chandrika Gogineni

Full Stack Java Developer

Location: Texas, USA | Ph: 972-302-9017 | chandrikag1708@gmail.com | [Linkedin](#)

PROFESSIONAL SUMMARY

Full Stack Java Developer with 4 years of experience in designing, developing and deploying robust and scalable web applications. Expertise in building and maintaining complex microservices architectures using Spring Boot, Spring Cloud and Kubernetes. Proficient in front-end technologies such as React.js, Redux and Material-UI, delivering user-centric and engaging user interfaces. Strong understanding of relational databases, SQL and NoSQL technologies like Elasticsearch. Experienced in implementing CI/CD pipelines with Jenkins and Azure DevOps, ensuring efficient and reliable software delivery. Adept at adhering to security best practices, including OAuth 2.0, JWT and data encryption, to safeguard sensitive data. Proven ability to collaborate effectively in agile development environments, leveraging Git for version control and participating in code reviews.

TECHNICAL SKILLS

Programming Languages:	Java, JavaScript (React.js, Angular), SQL, HTML, CSS
Backend Development:	Spring Boot, Spring Cloud, Hibernate/JPA, Microservices, RESTful APIs
Frontend Development:	React.js, Angular, Material-UI, Redux
Database Management:	MySQL, PostgreSQL, Hibernate, JPA, Flyway, Liquibase, Elasticsearch
Cloud & DevOps:	AWS, Azure, Kubernetes, Jenkins, Docker, AWS CloudWatch
Version Control:	Git, GitHub, Bitbucket
CI/CD & Automation:	Jenkins, Docker, Azure DevOps
Security:	OAuth 2.0, JWT, Spring Security, Data Encryption Techniques
Performance Monitoring:	Prometheus, Grafana
Healthcare Standards:	HL7, FHIR, ICD-10, CPT Codes
Software Development Methodologies:	Agile, Scrum, CI/CD
Monitoring & Logging:	Prometheus, Grafana, CloudWatch
Other Technologies:	Spring Cloud, Netflix OSS, Flyway, Liquibase, Elasticsearch

PROFESSIONAL EXPERIENCE

Full Stack Developer | Cigna, TX | Aug 2023 – Current

- Reduced claim processing time by 35% by designing and implementing an optimized microservices architecture leveraging Spring Boot and Kubernetes.
- Achieved 99% system uptime by establishing a robust CI/CD pipeline with Jenkins and Azure DevOps, ensuring seamless application deployment.
- Ensured 100% HIPAA compliance by implementing secure protocols, including OAuth 2.0, JWT-based authentication and advanced data encryption techniques.
- Developed & maintained RESTful APIs for healthcare interoperability, ensuring compliance with HL7 and FHIR standards for data exchange. Utilized Elasticsearch for real-time data analysis & implemented alerts for claim anomalies, enhancing error detection.
- Designed dynamic, user-friendly React.js interfaces integrated with Redux and Material-UI for claim submission, tracking and status updates. Used Git & Bitbucket for version control and peer code reviews, ensuring a maintainable & high-quality codebase.
- Built scalable server-side logic using Spring Boot, utilizing Hibernate/JPA for database operations, ensuring efficient data management. Ensured compliance with ICD-10, CPT codes & other healthcare data standards, maintaining regulatory adherence.
- Monitored application performance and availability using Prometheus and Grafana, ensuring optimal system performance.
- Performed database migrations with Flyway and Liquibase, maintaining data integrity during system updates and deployments.

Full Stack Developer | Accenture, India | Jan 2020 – July 2022

- Developed and implemented secure RESTful APIs specifically for payment processing, which resulted in a significant 25% reduction in transaction processing time.
- Designed and optimized complex SQL queries tailored for real-time financial reporting, enhancing data retrieval speed by 40% and improving operational efficiency.
- Spearheaded the automation of CI/CD pipelines using Jenkins and Docker, achieving a remarkable 50% reduction in deployment time and streamlining the release process.
- Designed and developed user interfaces for transaction monitoring systems leveraging Angular and React.js, enhancing user experience and operational transparency.
- Developed backend services using Spring Boot and Hibernate, supporting essential core banking functionalities and ensuring high availability. Monitored application performance using AWS CloudWatch, promptly resolving incidents to maintain service uptime.
- Implemented stringent security measures using Spring Security and OAuth 2.0, safeguarding sensitive financial data against potential breaches.
- Developed a microservices architecture utilizing Spring Cloud and Netflix OSS, significantly enhancing application scalability and maintainability.
- Managed version control & code repositories using Git & GitHub, ensuring code integrity & facilitating collaborative development.

EDUCATION

Masters in Computer and Information Sciences, University of North Texas, TX, USA.

Bachelors in Electronics and Communication Engineering, Rajiv Gandhi University of Knowledge Technologies, India.
