PROFESSIONAL SUMMARY

As an experienced SharePoint Developer and Administrator with expertise in SharePoint Framework (SPFx), Power Platform, SharePoint migration, customization, automation, and governance, I bring a methodical and performance-driven approach. I specialize in developing responsive solutions, automating workflows, optimizing search functionalities, and ensuring governance and security compliance. My proficiency in SharePoint architecture, security, workflows, and performance tuning enables me to work effectively in Agile environments and collaborate with cross-functional teams to deliver high-quality solutions. My goal is to ensure seamless SharePoint Online and hybrid implementations while enhancing user experience and business efficiency.

CORE COMPETENCIES

- Developed custom SharePoint Online solutions using SPFx, React.js, TypeScript, JavaScript, HTML5, and CSS3, ensuring modern and responsive UI/UX design.
- Built and optimized responsive SharePoint web parts, user controls, page layouts, and themes using Office UI Fabric and Fluent UI for improved user engagement.
- Integrated SharePoint with REST APIs, Graph APIs, GraphQL APIs, Node.js, and third-party services to enhance interoperability and data exchange between applications.
- Led SharePoint migration projects from SharePoint 2013/2016/2019 On-Prem to SharePoint Online using Sharegate and Metalogix, ensuring minimal downtime and data integrity.
- Configured and maintained SharePoint Farm environments, including permissions, metadata, content types, governance policies, and compliance measures, to ensure security and compliance adherence.
- Developed and automated workflows using Power Automate, PowerApps, Power BI, and Power Virtual Agents to improve business intelligence, productivity, and operational efficiency.
- Implemented governance strategies, retention labels, sensitivity labels, Microsoft 365 security policies, and Data Loss Prevention (DLP) for enterprise-wide data security and compliance.
- Optimized SharePoint search functionality by configuring search schemas, query rules, custom result sources, and developing tailored search solutions using SPFx, PnP JS, and REST API.
- Designed and developed custom workflows, business processes, and automation solutions for seamless collaboration within Microsoft Teams, Viva Engage, and SharePoint Online.
- Ensured seamless content management, collaboration, and data sharing by integrating OneDrive, Microsoft Teams, and SharePoint Online across distributed teams and departments.
- Provided comprehensive end-user training, documentation, and support for SharePoint Online, PowerApps, Power Automate, and workflow automation, increasing adoption and efficiency.
- Performed backup, restore, and disaster recovery procedures while automating monitoring and reporting processes using PowerShell scripts and Kusto queries.
- Administered and maintained Microsoft 365 Security & Compliance, Retention & Sensitivity Labels, Conditional Access Policies, and Risk-Based Authentication to enhance security posture.
- Developed OOTB solutions for SharePoint to maximize functionality with minimal customization.
- Supported Azure DevOps, Google Cloud Platform (GCP), and Azure Data Lake integrations.
- Developed and integrated SSRS (SQL Server Reporting Services) within SharePoint to improve dashboarding and data visualization capabilities.
- Designed and implemented InfoPath forms for data collection, approval workflows, and business process automation within SharePoint, streamlining form-driven processes.

TECHNICAL SKILLS

SharePoint:	SharePoint Online, SharePoint SE, 2016, 2013, 2010, Office 365, OneDrive, REST API, SPFx, PnP, Microsoft Teams, Business Connectivity Services (BCS), MetaTags, OOTB
Development:	JavaScript, TypeScript, React.js, Vue.js, Angular, HTML5, CSS3, jQuery, SQL Server, Graph API, GraphQL, IIS, PowerShell, C#, ASP.NET, VB.NET, Node.js, Web Services
Migration Tools:	Sharegate, Metalogix, DocAve, Nintex
Power Platform:	PowerApps, Power Automate, Power Virtual Agents, Power BI, COE Toolkit, ALM
Security & Governance:	Microsoft 365 Security & Compliance, Data Loss Prevention (DLP), Audit Logging, Retention & Sensitivity Labels, Conditional Access
Administration:	SharePoint Farm Administration, Backup/Restore, SharePoint Server, Windows Server, Performance Tuning, Active Directory, Azure Integration
Tools:	Visual Studio Code, Postman, Microsoft 365 Admin Center, Gulp, Yoeman, CMAT, Microsoft InfoPath, SQL Management Studio (SSMS), SharePoint Management Shell

PROFESSIONAL EXPERIENCE

Sr. SharePoint Developer IEHP	May 2024 - Present Rancho Cucamonga, CA
Environment: <i>SharePoint Online, React.js, CSS, JavaScript, PnP, CSOM, SPFx, Graph API, Windows PowerShell 7, Fluent UI, PnP JS, Azure DevOps, API Integrations.</i>	
- Developing and optimizing modern SharePoint Online solutions using SharePoint Framework (SPFx), React.js, JavaScript, Fluent UI, and CSS to improve platform functionality and usability. - Led Jive to SharePoint Online migration, ensuring data consistency, governance, and minimal downtime. - Managing site provisioning automation using advanced PowerShell scripts and site template extraction techniques to standardize and accelerate deployments. - Enhancing SharePoint security by integrating Active Directory authentication, implementing governance policies, and automating access control procedures. - Creating and managing site creation scripts using extracted site templates to ensure uniformity, faster setup, and compliance with organizational standards. - Configuring and fine-tuning Employee Search functionalities in SharePoint Online, improving user experience by optimizing query performance and search relevance. - Developing custom SharePoint applications leveraging PnP JS, Graph API, and CSOM to extend SharePoint capabilities and streamline business operations. - Collaborating with Agile teams using Azure DevOps for sprint planning, backlog management, release tracking, and continuous integration across SharePoint projects. - Providing comprehensive user training and developing in-depth documentation for SharePoint Online solutions, increasing adoption and reducing support dependency. - Writing and maintaining document migration scripts to automate large-scale content transfers between different SharePoint environments while maintaining data integrity. - Implementing and managing version-controlled SharePoint templates, automating deployment processes, and reducing manual efforts in site creation. - Developing and customizing SharePoint themes, branding solutions, and user interfaces using Fluent UI and CSS to enhance visual appeal and usability. - Managing integration of SharePoint with third-party systems through API development, enabling seamless data exchange and improving operational workflows. - Performing SharePoint performance tuning, troubleshooting site issues, and enhancing overall system efficiency through continuous monitoring and optimization.	

Office 365/SharePoint Developer

Nov 2021 - Apr 2024

Independent Health

Buffalo, NY

Environment: *SharePoint Online, SPFx, React.js, TypeScript, Fluent UI, PnP JS, REST API, Graph API, Power Automate, PowerApps, Virtual Agents, Viva Engage, Azure Functions, PowerShell, Sharegate, ALM, Power BI*

- Developed and deployed modern SharePoint solutions using SharePoint Framework (SPFx), React.js, TypeScript, and Fluent UI, ensuring optimal user experience and performance.
- Built custom web parts, extensions, and workflows leveraging PnP JS, REST API, and Microsoft Graph API to enhance business functionality.
- Automated complex business processes with Power Automate, PowerApps and Power Virtual Agents, reducing manual effort.
- Managed SharePoint Online governance, retention policies, sensitivity labels, and compliance frameworks to enforce security and regulatory requirements.
- Designed and implemented SharePoint Search Schema enhancements, optimizing query performance and improving enterprise-wide search experiences.
- Integrated Microsoft Teams, OneDrive, and Viva Engage with SharePoint for seamless digital collaboration and productivity.
- Developed custom Microsoft 365 applications using Azure Functions, Microsoft Graph API, and PowerShell for advanced automation.
- Led migration initiatives from SharePoint 2016/2019 to SharePoint Online, utilizing Sharegate for content migration and tenant-to-tenant moves.
- Implemented ALM strategies for SharePoint and Power Platform, ensuring smooth development, testing, and deployment workflows.
- Created Power BI dashboards integrated with SharePoint data sources to provide real-time analytics and insights.
- Designed and implemented adaptive card-based experiences in Microsoft Teams using SPFx and Bot Framework, improving workflow interactions.
- Developed and optimized SharePoint tenant-wide extensions for branding consistency and enhanced user engagement.
- Implemented AI-driven automation using Power Automate AI Builder to extract insights from SharePoint.
- Managed Microsoft Syntex models, automating metadata extraction and content classification.

SharePoint Administrator

Aug 2017 - Oct 2021

Cantor Fitzgerald

New York City, NY

Environment: *SharePoint (2016, 2019, Online), PnP, REST API, C#, ASP.NET, ADO.NET, Web APIs, PowerShell, Power Automate, DLP, Sharegate, Metalogix, BCS, Graph API, SSRS, InfoPath, Nintex Forms*

- Managed and maintained SharePoint 2016/2019 On-Premises and SharePoint Online, ensuring platform stability, security, and high-performance availability.
- Led SharePoint migration projects, transitioning from SharePoint 2013 to SharePoint 2016/2019, utilizing Sharegate for incremental content migration and Metalogix for bulk document transfer and metadata preservation.
- Configured and optimized SharePoint Farm environments, including backup/restore operations, patching strategies, performance tuning, and disaster recovery planning.
- Administered Microsoft 365 (Office 365) ecosystem, managing OneDrive, Microsoft Teams, and Exchange Online to enhance collaboration, governance, and compliance.
- Designed and enforced SharePoint security policies, implementing role-based access control (RBAC), sensitivity labels, and Data Loss Prevention (DLP) to ensure compliance with corporate policies.
- Developed Power Automate workflows to streamline business processes, automate approval chains, and eliminate manual inefficiencies in enterprise workflows.
- Customized SharePoint Online site collections, hub sites, and modern page layouts, integrating PnP, Graph API, and REST API to extend functionality and improve user experience.

- Implemented Business Connectivity Services (BCS) and hybrid search solutions, enabling seamless integration with external data sources and enhancing search capabilities.
- Provided technical support and comprehensive training to end-users and IT teams, improving SharePoint adoption, operational efficiency, and governance compliance.
- Managed SharePoint governance frameworks, enforcing site provisioning policies, metadata taxonomy, security compliance, and content lifecycle management.
- Developed SharePoint custom web parts and applications using .NET (C#, ASP.NET, ADO.NET) for automating advanced business processes and data-driven applications.
- Created RESTful services and web APIs to facilitate seamless data integration between SharePoint, Microsoft 365, and external business applications.
- Designed and optimized SQL Server databases for SharePoint-based applications, ensuring high query performance and efficient data management.
- Built InfoPath and Nintex Forms for enhanced data collection and workflow automation, reducing input errors.
- Developed PowerShell scripts to automate SharePoint administrative tasks, including user provisioning and performance monitoring for system efficiency.

SharePoint Consultant

Feb 2016 - Aug 2017

IMF

Washington, DC

Environment: *SharePoint (2013, 2016), SharePoint Designer, SharePoint Farm Administration, InfoPath Forms, Business Connectivity Services (BCS), Governance Policies, Permissions Management*

- Developed custom SharePoint solutions using SharePoint 2013/2016 On-Premises and SharePoint Designer, leveraging OOTB features to streamline document management and workflows.
- Built custom lists, libraries, metadata structures, and permissions management to enhance SP collaboration.
- Designed and implemented InfoPath forms for business process automation, improving data entry efficiency and approval workflows.
- Configured and managed SharePoint Farm environments, including permissions, content types, and governance policies to ensure compliance and security.
- Developed and maintained SharePoint Designer Workflows, automating approval processes and enhancing operational efficiency.
- Assisted in SharePoint migration planning from SharePoint 2010 to SharePoint 2013, ensuring minimal downtime and seamless data transition.
- Provided end-user training and documentation to improve adoption and usability of SharePoint solutions.
- Performed backup, restore, and disaster recovery for SharePoint environments, ensuring business continuity.
- Integrated Business Connectivity Services to enable external data connections, improving data accessibility.
- Implemented metadata-driven navigation and content type structures to enhance information management.
- Created customized permission levels and access control policies to balance security with user collaboration.

EDUCATION & CERTIFICATIONS

- Bachelor of Computer Science, Vellore Institute of Technology (2008–2012).
- Master of Computer Science, University of Buffalo (2013–2015).
- Microsoft Certified Technology Specialist (MCTS) in 70-573: SharePoint 2010 Application Development.
- Microsoft Certified Professional (MCP) in 70-483 and 70-486.
- Trained in Microsoft SharePoint Online, 2019, 2016, 2013, 2010, and SE.
