

Charles Cloud

Woodstock, GA | charlescloud080389@gmail.com | (678) 925-9233 | www.linkedin.com/in/charles-cloud

PROFESSIONAL SUMMARY

Senior Software Engineer with 12+ years of experience designing full-stack applications and enterprise-scale systems across Java, Python, Kotlin, Node.js, React, and Angular. Expert in CI/CD pipelines, cloud-native architectures, and database optimization, with a proven ability to lead cross-functional teams, mentor engineers, and deliver high-impact solutions. Strong communicator and problem-solver with a focus on Agile methodologies, technical documentation, and innovative engineering practices.

TECHNICAL SKILLS

Languages: Java, Python, Kotlin, JavaScript, TypeScript, SQL

Frontend: React, Angular, HTML5, CSS3, Redux, Material-UI

Backend: Node.js, Spring Boot, Django, Express.js, RESTful APIs, GraphQL

Cloud & DevOps: AWS, GCP, Docker, Kubernetes, Jenkins, GitHub Actions, Terraform

Databases: PostgreSQL, MongoDB, Oracle, Redis, DynamoDB

Tools: Git, JIRA, Postman, Swagger, Selenium, JUnit, ELK Stack

Methodologies: Agile, Scrum, TDD, CI/CD, Microservices, OOP

PROFESSIONAL EXPERIENCE

SENIOR SOFTWARE ENGINEER | GENERAL MOTORS | ROSWELL, GA

October 2021 – Present

- Led full-stack development of a logistics management platform using Java/Spring Boot and React, improving operational efficiency by 30% for 500+ dealerships.
- Designed Kubernetes-based microservices on AWS, reducing deployment time by 50% via CI/CD automation with Jenkins and GitHub Actions.
- Optimized PostgreSQL query performance by 40% through indexing and Redis caching, enabling real-time analytics for 1M+ daily transactions.
- Mentored 5 junior engineers in Angular and Agile practices, accelerating sprint velocity by 25% and reducing defects by 35%.

SENIOR SOFTWARE ENGINEER | TEKSYSTEMS | ROSWELL, GA

December 2020 – October 2021

- Developed Kotlin/Spring Boot APIs for a healthcare platform, improving interoperability with RESTful services and reducing integration errors by 40%.

- Migrated legacy systems to AWS using Docker, cutting infrastructure costs by 25% while ensuring HIPAA compliance.
- Built a Node.js middleware layer for real-time data processing, handling 500k+ requests/day with 99.9% uptime.
- Streamlined CI/CD pipelines with Terraform, reducing deployment failures by 60% and enabling zero-downtime releases.

RELEASE TRAIN ENGINEER | PHILIPS | GREATER ATLANTA AREA

October 2019 – November 2020

- Directed Agile Release Trains for 3 teams, improving sprint velocity by 35% through backlog prioritization and JIRA workflows.
- Designed AWS-based solutions for healthcare analytics, leveraging Kubernetes to achieve 99.9% uptime.
- Revamped PostgreSQL schemas and optimized ETL workflows, reducing report generation time from 15 minutes to 3 seconds.
- Built a React-based admin portal, improving data visualization and reducing support tickets by 25%.

SOFTWARE ENGINEER II | DAUGHERTY BUSINESS SOLUTIONS | GREATER ATLANTA AREA

November 2017 – April 2018

- Developed Java APIs for a financial analytics platform, reducing transaction processing time by 35% through multithreading.
- Automated SQL Server ETL workflows with Python, cutting manual effort by 80% and ensuring SOX compliance.
- Designed a Node.js service for real-time fraud detection, reducing false positives by 25% using machine learning.
- Built Angular dashboards for executive reporting, improving data accessibility and decision-making speed by 30%.

SOFTWARE ENGINEER | PHILIPS WELLCENTIVE | GREATER ATLANTA AREA

May 2016 – November 2017

- Optimized PostgreSQL performance for patient analytics, reducing query latency by 40% through indexing strategies.
- Developed Python scripts for data cleansing, improving dataset accuracy by 25% for ML model training.
- Built React interfaces for clinician portals, enhancing usability and reducing training time by 30%.
- Automated CI/CD for legacy systems using Jenkins, cutting deployment time from 4 hours to 30 minutes.

EDUCATION

GEORGIA INSTITUTE OF TECHNOLOGY | ATLANTA, GA

Bachelor of Science in Computer Science | 2008 – 2012
