

Chitrabhanu Ponna

JAVA FULL STACK DEVELOPER

TX, USA | +1 908-521-0388 | chitrabhanu07@gmail.com | [LinkedIn](#) | [Github](#)

SUMMARY

- Java Full Stack Developer with 4 years of hands-on experience in designing, developing, and deploying applications.
- Proficient in Java, SQL, Spring Framework, C++, and various front-end technologies like React JS and Angular.
- Skilled in database management with a proven track record of working with relational databases (MySQL, PostgreSQL) and NoSQL databases (DynamoDB, MongoDB).
- Experienced in using a wide range of development tools, including IDEs like IntelliJ IDEA and NetBeans, version control with Git/GitHub, and CI/CD pipelines with Jenkins.
- Familiarity with cloud computing platforms (AWS Cloud), containerization with Docker, and orchestration with Kubernetes.

SKILLS

Front-End Technologies	HTML5, CSS3, Bootstrap, UI Material, JavaScript, Typescript, ES6, React JS, Redux, React Hooks, Angular
Back-End Technologies	Core Java, Java 8, Streams API, C++, Spring Boot, Spring MVC, Web Services, REST API, RESTful API, Microservices, Hibernate ORM
J2EETechnologies	Servlets, JSP, JDBC, JMS, Maven, Multi-threading
IDEs	Visual Studio Code, IntelliJ IDEA, Eclipse, Maven, Gradle, NetBeans, Spring Tool Suite
Web Services	RESTful, SOAP
Databases	SQL, MongoDB (NoSQL), PostgreSQL, MySQL, Oracle
CI/CD & Tools	Jenkins, Code Ship
Testing tools	JUnit, Mockito, React Testing Library, Jest
Cloud & Deployment	AWS, Docker
Web Server	Apache Tomcat, WebLogic
Other Technical Skills	Kafka, RabbitMQ, Agile, Jira, IBM RTC, SVN, Ant, Git, Scrum, GitHub, Kubernetes, Bitbucket, Swagger Open API, SonarQube, Postman, Splunk
Operating System	Windows, LINUX, Mac OS

WORK EXPERIENCE

Java Full Stack Developer | PayPal, TX

Aug 2023 – Present

- Designed and implemented a robust microservices architecture, enabling independent scaling and deployment of services which can facilitated quicker updates and improved fault isolation, leading to a 30% increase in transaction handling efficiency.
- Developed backend services using Java and Spring Boot, using its powerful features for dependency injection and aspect-oriented programming and this allowed for rapid development cycles and reduced boilerplate code, enhancing the maintainability of the codebase.
- Created a responsive user interface with Angular, incorporating Material Design principles for an intuitive user experience. This resulted in a 20% increase in user engagement, as users found it easier to navigate and complete transactions on the platform.
- Integrated AWS Lambda for serverless functions that processed asynchronous events, enabling real-time data processing without the need to manage server infrastructure, which improved operational efficiency.
- Utilized PostgreSQL for robust data storage, implementing advanced indexing and query optimization techniques. This reduced data retrieval times by 40%, ensuring that users experienced minimal latency during transactions.
- Defined resources such as transactions, users, and payments, with each resource represented by a unique URL, promoting a clean and organized API structure that enhances maintainability.
- Implemented an event-driven architecture using Apache Kafka to enable real-time data streaming and processing, which resulted in a 50% reduction in latency for processing user transactions and allowed the system to react to events in real time, improving overall user satisfaction by 30%.
- Enhanced the continuous integration and continuous deployment (CI/CD) pipeline by 50% through automated Docker-based deployments, ensuring faster and more reliable releases while minimizing downtime during updates.

- Conducted sprint planning sessions to define and prioritize backlog items, ensuring that the team focused on high-value features, leading to a 20% increase in delivered features per sprint.

Java Full Stack Developer | Capgemini, India

Sept 2019 – Aug 2022

- Developed and maintained server-side applications using Node.js, ensuring high performance and scalability.
- Architected and optimized microservices communication through REST API, HTTP requests and JSON format.
- Experienced in testing various aspects of Node.js applications, including API endpoints, database interactions, and business logic, using Jest's powerful testing capabilities.
- Designed and implemented a microservices architecture that enabled the development of independent, loosely coupled services, enhancing scalability by 60% and improving application maintainability by 30%, resulting in faster feature development cycles.
- Made dynamic, reusable components using React.js, adhering to a component-based architecture that enhanced code maintainability by 40% and facilitated a 30% reduction in development time for new features.
- Implemented Hibernate for Object-Relational Mapping (ORM), simplifying database interactions and providing a robust way to manage entity relationships while improving data access performance.
- Utilized JavaScript for client-side scripting and DOM manipulation.
- Implemented Spring Security to enforce authentication and authorization protocols, ensuring secure access to APIs and sensitive data within the application, which resulted in a 50% reduction in unauthorized access attempts and improved compliance with security standards by 40%.
- Collaborated with front-end developers to integrate server-side logic with client-side components.
- Conducted code reviews and performed debugging to ensure code quality and reliability.
- Familiar with cloud infrastructure and services, including Azure SDK and AWS, for interaction with storage, compute, and networking resources.
- Proficient in configuring Swagger in Spring Boot for auto-generating API documentation.
- Deployed applications to cloud platforms like AWS, configuring and managing server environments.
- Stayed updated with the latest trends and best practices in Node.js development to continually improve development processes and deliver high-quality solutions.
- Acknowledged with the Pat on Back Batch for exemplary adaptability to new environments and technologies, swiftly resolving critical production issues within tight deadlines.

EDUCATION

Master of Science in Computer Science | Fairborn, Ohio, USA

Wright State University

Bachelor of Technology in Computer Science Engineering | Hyderabad, India

JNTUH College of Engineering
